## PART IV.

### Prospectus for the Government Technical School, Lucknow.

*The aim of the school.*—The Government Technical School, Lucknow, was established for the purpose of providing a sound technical training in various trades connected with Engineering.

Without technical training a mechanic who aspires to the post of overseer or foreman in a large works or to be an Engineer in charge of a small factory would find it difficult to succeed, because the ordinary workshop has not the time to devote to the training of the individual. Consequently a lad who enters a workshop without any technical training has to pick up knowledge as best he can and does not get individual instruction.

*Class of training.*—The training which is given in the Government Technical School combines both theory and practice, and is so arranged that when the pupil leaves the school the instruction which he has received should not only make clear to him the principles of the particular trade he wishes to take up but will have developed his intelligence and ability.

*Scope of work.*—The theoretical subjects include Elementary Physics, Practical Mathematics, Applied Mechanics, Electricity and Magnetism, Steam and Heat Engines, Machine Construction and Drawing and Workshop practice. The teaching in all these subjects is practical and the pupils are encouraged to do a large number of experiments for themselves. Throughout the training the pupil is taught to understand the different operations and processes which are involved in the management of machines and engines and their erection and adjustment.

A pupil who has profited by the school course should be able to make much more rapid progress and ultimately attain a higher position than he would otherwise have been able to secure.

*Prospects of employment.*—After completing the school course the pupil has to serve a practical apprenticeship of two years in a railway or other workshops and these apprenticeships are ordinarily found for the students. During this period of apprenticeship a stipend of Rs. 8 per month is paid to the student, provided, that he fulfils the terms of his indenture, and when he has successfully completed this apprenticeship he receives a certificate and is free to take up

employment any-where. Some students will naturally decide to continue to serve for a further period in the works where they have been apprenticed in order to gain further practical experience. Others will probably find openings in the Public Works, Military Works, and similar departments requiring the services of men with technical training. But, generally speaking, the passed students will, after a short term of practical work, be qualified to take independent charge of the mechanical side of any small factory, and as the industries of the province develop there should be many openings of this character. There is also a standing demand for trained mechanics and assistant overseers in many of the factories now existing in the provinces.

On the completion of the school course the student is permitted to appear before the Government Board of Examiners at Cawnpore for the Second Class Engine Driver's Examination and then with intervals of a year's service successively for the First Class Engine Drivers and the Second and First Class Engineers Examination.

*Posts obtained by passed students*—Students who completed their apprenticeships in 1915 and 1916 have obtained posts as assistant foremen, engineers, and drivers in factories and at waterworks in these provinces on pays varying from Rs 50 to Rs. 100 per mensem.

*Equipment.*—The school possesses large well-lighted class, lecture and drawing class rooms, and a laboratory for experiments in Mechanics and Elementary Physics. A large number of models and charts are provided for instruction in machine construction and steam and heat engines. The workshops are electrically driven (current being generated in the school powerhouse) and are designed to give a technical training in various trades. The powerhouse and workshops are equipped with modern plant and tools.

#### Classes

The school session commences on the 1st August and ends on the 31st May. Admissions will be made only once yearly, at the commencement of the session.

There are three sections in the school—

1. Junior section.
2. Mechanics section.
3. Artisan section.

Also classes for automobile drivers, oil engine drivers, and painters.

#### Junior section

The age for admission is not less than 12 years or more than 15. The qualifications for admission to this section is the upper primary or 4th class examination of Anglo-Vernacular schools. This course will generally be for three years but may be shorter according to the student's educational qualifications on admission. The number of admissions is at present limited to 15 yearly. This section in addition to instruction in Practical English, Practical Mathematics, and Industrial Drawing will do manual work for about two hours or more daily, in the carpenters or other shops to habituate their hands to manual dexterity.

Passing the 3rd-year examination in the Junior section qualifies for admission to the Mechanics section.

#### Mechanics section.

The entrance to this section will be obtained through an entrance examination as detailed below. For admission to this section a boy must not be less than 14 years of age or more than 18 on the date of his admission to the school. The length of the course is three years. Instruction in this section is arranged so that half the day is devoted to practical work in the shops and half to theoretical work as follows:—

	<i>Practical</i>	<i>Theoretical.</i>
First year	... Pattern shop and foundry ...	Elementary Physics, Practical Mathematics, Applied Mechanics, Dimension Sketching.
Second year	... Forge and machine shop ...	Practical Mathematics, Applied Mechanics, Electricity and Magnetism, Steam and Heat Engines, Machine Construction, and Drawing.

	<i>Practical.</i>	<i>Theoretical.</i>
Third year	... Fitting and Machine shops and Power House.	Practical Mathematics, Applied Mechanics, Electrical transmission of power, Steam and Heat Engines, Lighting and Fan Circuits, Machine construction and Drawing.

At the end of the school course the student has to serve a practical apprenticeship of two years. He will be required to undertake to keep the hours and rules specified by his employer and not to leave his employment during the two years and will only then obtain the school certificate.

During the last two years of practical apprenticeship, apprentices (if vacancies can be obtained for them) will receive in addition to any wages given by their employers scholarships of Rs. 8 a month from the school tenable for two years. The scholarship will be given on the condition that the apprentice works hard, and honestly carries out the terms of his indenture. Employers pay a minimum wage of Rs. 12 per mensem.

Applications for admission by outside candidates to the entrance examination should reach the Principal complete in all respects not later than 1st May. The entrance examination will be held in the second whole week in May. The applications should be accompanied by a statement showing—

- (a) Date of birth of the candidate.
- (b) The school or schools at which he has been educated and duration of previous training.
- (c) The name, caste, profession, and residence of father or guardian.
- (d) A recommendation of the head master of the school in which a candidate has been instructed, showing that the candidate is of good character and industrious, and shows a marked aptitude for mechanical pursuits.

The entrance examination is competitive and the first ten outside candidates who stand highest on the list will be admitted. Marks obtained will not be published. The remainder of the class will be filled up by students who have passed the 3rd year examination of the Junior section. In the event of there not being sufficient candidates from the Junior section outsiders will be admitted up to a total of 25 on the nomination of the Principal.

Full discretion rests with the Principal to remove any student who appears to be unlikely to profit by the training.

Removal under this rule will imply no reflection on the student's character.

Selected candidates for the Mechanics class will be required to submit—

- (a) scholar's register.
- (b) a certificate of sound health and physical fitness for the duties of a mechanic on the following form:—

**Medical certificate to accompany application of candidate for admission to the  
class of the Government School**

I CERTIFY that I have carefully examined \_\_\_\_\_, that his eyesight is of the standard prescribed,\* that he is fairly robust and his constitution is sound, and that he has no disease, or bodily or mental infirmity, unfitting him now, or likely to unfit him in the future, for active outdoor service.

*Dated* \_\_\_\_\_

*N.B.*—The above certificate must be signed, within a month before date of submission, by a commissioned medical officer or by a medical officer in charge of a civil station, and must include a description giving clearly the personal marks of identification of the candidate who has been medically examined. No other certificate will be accepted, nor will applications be entertained unless the above rules be strictly complied with.

\* Standard of eyesight required for admission to the

1. If myopia in one or both eyes exists, a candidate may be passed, provided the ametropia does not exceed 3.5 D, and if, with correcting glasses not exceeding 3.5 D, the acuteness of vision in one eye equals  $\frac{5}{6}$ , and in the other  $\frac{4}{5}$ , there being normal range of accommodation with the glasses.

2. Myopic astigmatism does not disqualify a candidate, provided the lens or the combined spherical and cylindrical lenses, required to correct the error of refraction does not exceed 3.5 D, the acuteness of vision in one eye, when corrected, being equal to  $\frac{5}{6}$  and in the other  $\frac{4}{5}$ , together with normal range of accommodation with the correcting glasses, there being no evidence of progressive disease in the choroid or retina.

3. A candidate having total hypermetropia not exceeding 4 D is not disqualified, provided the sight in one eye (when under the influence of atropine) equals  $\frac{5}{6}$ , and in the other eye equals  $\frac{4}{5}$ , with + 4 D glasses or any lower power.

4. Hypermetropic astigmatism does not disqualify, provided the lens or combined lenses required to cover the error of refraction do not exceed 4D, and that the sight of one eye equals  $\frac{5}{6}$ , and the other  $\frac{4}{5}$ , with or without such lens or lenses.

5. A candidate having a defect of vision arising from nebula of the cornea is disqualified if the sight of one eye be less than  $\frac{2}{7}$ . In such a case the better eye must be emmetropic. Defects of vision arising from pathological or other changes in the deeper structures of either eye, which are not referred to in these rules, may exclude a candidate.

6. A candidate is disqualified if he be unable to distinguish the principal colours (achromatopsia).

7. Paralysis of one or more of the exterior muscles of the eyeball disqualifies a candidate for admission.

All caution money deposited by students will be returned to them in full on leaving the School if apparatus, etc., used by them is left in a satisfactory condition.

*Oil-engine drivers' class.*

A special class for the training of oil engine drivers has been opened at the School; admissions to this class will be made on the 2nd of August, and the 2nd of January each year. The number of admissions will be limited to ten. The length of the course is five months.

Instruction will be given in the working and management of the following types of oil engines :—

Kerosene oil engine gravity feed.

Ditto pump do.

Crude oil engine pump feed compressed air and electrical starting ignition.

ditto ditto starting gear and hot bulb ignition.

Application for admission should be submitted to the Principal during the months of May and December. Every application must be accompanied by a statement giving the following particulars :—

Name.	Date of birth.	School or schools at which educated.	Name, caste profession, and residence of father or guardian.	Particulars of any previous mechanical training, if any.	Sig-nature.

No educational qualifications are required and no fees are charged in this class. Preference will be given to applicants who have had some workshop experience.

*Painting class.*

There is also a class for giving instruction in painting and lettering, including carriage-painting and varnishing and line work, to boys of the painter caste whose parents are actually working as painters. The duration of the course is from two to three years. After completing the school course students will be apprenticed at the Railway Workshops as opportunity occurs and will be granted scholarships from the School of Rs. 3 per mensem in addition to the

pay they may receive during their two years' apprenticeship. No educational qualifications are required for admission to this section and no fees are charged.

*Automobile Driver class*

1. A class will be formed yearly on the 2nd August for persons who have resided for not less than three years in the United Provinces.

2. The object is to turn out men who not only can drive but have a knowledge of the mechanism of a car and its electrical connections and are competent to carry out small repairs and keep a car in running order.

3. A practical examination in turning and fitting will be held in the School Workshops at 8 a. m. on the 1st August each year.

Candidates who are found to be already trained turners and fitters will at once join Division B. Other approved candidates will be required to go through the Workshop course specified in Division A before joining Division B (Division A is a Workshop course, Division B a Motor course as detailed in the Syllabus).

The maximum number of students to be admitted to Division B is ten.

*Rule 4.*—For admission to the class candidates must not be less than 18 years of age.

*Rule 5.*—Applications for admission to the entrance examination should be submitted to the Principal by the 31st May and must be accompanied by a certificate of good character, signed by the head master of the school last attended or by applicant's employer, and a statement in the following form:—

Name.	Date of birth.	School or schools at which educated.	Name, caste, profession, and residence of father or guardian.	Duration of previous training in school.	Where he has obtained his mechanical training.	Signature of candidate.

(Place and date.)

*Signature of Head Master of school, or employer.*

6. Selected candidates will be required to furnish a certificate of sound health and physical fitness in the prescribed form.

7. Full discretion rests with the Principal to remove any student who appears to be unlikely to profit by the training. Removal under this rule will imply no reflection on the student's character.

8. Scale of fees will be as follows:—

For pupils who have completed two years in the School Workshops

and therefore entering direct into section B ... For the course ... .. Rs. 20

For others ... .. section A ... 8 As. per mensem.

Do. ... .. do. B ... For the course Rs. 30

The fees for section B to be paid in advance.

Students will be provided with free quarters if available, but no member of a student's family will be allowed to reside with him.

9. Tools and materials will be supplied free for the use of students, but will remain the property of the School and all work turned out during working hours will be the property of the School.

10. The course for Division A will last from August 2nd to May 31st. No time limit is laid down for Division B. When, in the opinion of the Principal, after due examination, an apprentice is a skilled driver, competent to earn his livelihood, he will be granted a temporary certificate stating that he has passed the school course. It will, however, be noted on this certificate that it is incomplete till the bearer has obtained a satisfactory certificate.

from an employer after six months' service. In the event of a student obtaining this certificate from his employer, his temporary school certificate will be exchanged for a final certificate of competence.

11. The School does not undertake to find employment for any man, though it will give all the assistance it can. Passed students are expected to find employment for themselves in the open market.

## PART IV.

### UNIVERSITY OF ALLAHABAD.

*Dated Allahabad, the 16th May, 1918.*

No. 1626.—In accordance with provisions of section 20 of the Allahabad University Act, 1887 (XVIII of 1887), the following additions and amendments to the existing University Regulations which have been made by the Senate of the Allahabad University and sanctioned by the Local Government under section 25, sub-section (i) of the Indian Universities Act, 1904 (VIII of 1904) are hereby notified for general information:—

#### IN CHAPTER I

Add the following additional regulation after regulation 32:—

No speech in the Senate, other than that of the chairman, shall exceed ten minutes.

#### IN CHAPTER XII

(i) Insert the words "Agra and at" between the words "Science at" and the word "Nagpur" in regulation 12.

(ii) Add the following clause to the above-named regulation:—

Only candidates from the colleges at Agra, Jaipur, Ajmer, Jodhpur, and Gwalior shall be permitted to appear at the examination held at Agra for the Degree of Bachelor of Arts and of Bachelor of Science.

(iii) Add the word "once" after the word "failed" in the first line of regulation 16, and substitute the word "undergraduate" for "candidate."

(iv) Add the following section after section 16 as section 17:—

17. An undergraduate who has failed more than once in the University Examinations in Arts, may be admitted to a subsequent examination without attending a regular course of study in an affiliated college provided always—

(i) that he remains a member of the college at which he last studied and keeps his name on the college roll ;

(ii) that he has pursued his studies elsewhere than at a college or educational institution of any kind ;

(iii) that not less than six months before the date fixed for the next examination he sends an application to the Registrar through and recommended by the Principal of the college at which he last studied in the prescribed form setting out—

(a) the conditions under which he has been studying and is now proposing to continue his studies ;

(b) the dates of his failing in the examination.

Candidates who pass the examination under these conditions shall be declared to have qualified without being placed in divisions, and their names shall be published in a separate list.

(v) *Add* the following transitory regulation to the regulations:—

That candidates for admission to the University under chapter XII, 3(a) (1) of the regulations, shall be deemed to have qualified for Matriculation, provided that (1) they were candidates from a recognised European school in the United Provinces for the Senior Cambridge Local Examination of December, 1917 ; (2) they offered in this examination not less than five subjects in accordance with regulations 4, 5, 6, and 7 of chapter XIII of the regulations ; (3) they produce a certificate signed by the Inspector of European Schools, United Provinces, certifying that after careful examination of their school records and all other available evidence he is of opinion that they would have passed the said examination in the subjects specified in proviso (2) ; (4) they have paid all necessary fees to the University ; and (5) this regulation cease to have effect on and from 1st January, 1919.

#### IN CHAPTER XIII

*Add* the following transitory regulation to regulation 4 :—

Provided that candidates who fail in the examination of 1918, and had taken Agriculture with Surveying, shall be permitted to offer that subject in the examination of 1919.

#### IN CHAPTER XXV

*Amend* regulation 12 as follows :—

12. At this examination every candidate shall be examined in—

(i) Anatomy.

(ii) Physiology.

(iii) Materia Medica and Pharmacy.

A candidate who passes in (i) Anatomy and (ii) Physiology and who obtains not less than 50 per cent. of the aggregate in these two subjects taken together, but fails in (iii) Materia Medica and Pharmacy, may appear for examination in Materia Medica and Pharmacy alone at one or two subsequent examinations, provided that he does not appear more than three times in all.

At the subsequent examination he must obtain at least 50 per cent. of the marks in Materia Medica and Pharmacy.

A student who fails in Anatomy and Physiology, but who has obtained not less than 50 per cent. of the marks in Materia Medica and Pharmacy, shall not be required to pass again in Materia Medica and Pharmacy.

## Intermediate Examination in Science only.

2344 Netai Chandra Shome ... Lucknow, Canning College.

ALLAHABAD :

M. G. V. COLE, M.A.,

REGISTRAR,

The 6th June, 1918.

University of Allahabad.

## UNIVERSITY OF ALLAHABAD.

## CIRCULAR No. 2 OF 1918.

FROM

THE REGISTRAR, UNIVERSITY OF ALLAHABAD,

TO

THE PRINCIPALS OF AFFILIATED COLLEGES AND INSPECTORS OF SCHOOLS

*Dated Allahabad, the 21st January, 1918.*

THE undersigned has the honour to state that in the Examinations of 1919, question on " Unseens " will be set in B.A. Sanskrit paper III instead of in papers I and II.

## CIRCULAR No 5 OF 1918.

FROM

M. G. V. COLE, Esq., M.A.,

REGISTRAR, UNIVERSITY OF ALLAHABAD,

TO

THE DIRECTOR OF PUBLIC INSTRUCTION,  
THE INSPECTORS OF SCHOOLS,  
THE HEAD MASTERS OF RECOGNISED SCHOOLS.

*Dated Allahabad, the 6th May, 1918.*

THE undersigned has the honour to state that the question, whether applications for alteration of age of Matriculation candidates should be entertained after the date appointed for sending the fees for examination had expired, was considered by the Syndicate at its meeting held on the 7th March, 1918, when it was *resolved*, that the age entry as shown in the school record on the date of the application and entered on the application be treated as final.

2. No applications for alteration of date of birth of a candidate for the Matriculation Examination will, therefore, be entertained after the date for sending in the fee to the University has expired.

## CIRCULAR No. 6 OF 1918.

To

THE PRINCIPALS OF COLLEGES AFFILIATED  
IN ARTS AND SCIENCE.*Dated Allahabad, the 7th May, 1918.*

SIRS,

I AM directed to forward the following recommendations for the guidance of Colleges affiliated in Arts and Science, made by the Syndicate, in its meeting held on the 13th April, 1918, in supersession of those made in Syndicate Resolution no. 93(a), dated the 4th April, 1908. Further recommendations relating to the minimum number of lectures and hours of work, etc., are under consideration and will be issued later.

General recommendations for the guidance of Colleges affiliated in Arts and Science :—

(1) In no class or section of a class should the number of students exceed 60 in any circumstances and preferably the number of admissions should be limited to 45.

(2) No professor or lecturer should be required to work with his students in College for more than 24 hours a week.

(3) In the case of a professor undertaking M.A. or M.Sc. teaching, the total number of hours' work with students in all classes should be limited to 18 hours a week.

(4) A College should not offer instruction in alternative courses of study unless it can provide a teacher or teachers specially qualified in each such course of study.

(5) A College and a School must not share the same staff, buildings, equipment or grounds.

(6) The finances of a College must not be combined with those of a School.

(7) A College and a School must not share the same Hostel.

(8) With regard to "a regular course of study" as defined in Chapter XXVIII, Regulation 5, sub section (d), a student should be required to attend not less than 75 per cent of the lectures delivered in each year.

**Curriculum for Vernacular Schools for Boys, United Provinces,  
for 1918-19.**

---

---

The following points regarding the Curriculum should be carefully noted:—

*Arithmetic.*

CLASS IV

Simple lessons in account-keeping (*roznamcha* and *khata*) should be introduced wherever the teacher is capable of giving such instruction.

*Object lessons.*

In no case is the new course to be introduced in a school unless the inspecting officer is satisfied that there is a teacher on the staff who is competent to teach it. Where no such teacher is available, object lessons should be given according to existing practice.

*Temperance Teaching.*

Informal talks in class on the evils, both physical and moral, resulting from intemperance should be held by teachers at intervals during the session. Such talks are preferable to a course of set lessons according to a prescribed syllabus, but head teachers should see that the subject is not neglected, nor the teaching merely perfunctory.

NOTE—The book recommended provisionally for the use of teachers is "Manual of Temperance" (Urdu or Hindi), by M. Mewa Ram B.A., Offg. Inspector of Schools, Jhansi Division.

Ideas of fractions  $\frac{1}{2}$ ,  $\frac{1}{3}$ ,  $\frac{2}{3}$  to be taught by concrete examples. Tables up to  $10 \times \frac{1}{2}$ ,  $10 \times \frac{1}{3}$ ,  $10 \times \frac{2}{3}$  to be constructed and learnt.

4. *Object lessons*.—As in the scheme prescribed. (Vide Appendix.)

5. *Physical exercises*.—The following exercises given in Kempster and Kaye's Physical Drill in Urdu or Hindi, Macmillan & Co :—

CHAPTER I.—Exercises 1 to 9.

„ II.—Opening the ranks.

„ III.—Exercises 1 to 7.

#### Class II.

1. *Reading*.—To read accurately at sight from the text-book and to explain the meanings of words and sentences. To recite 30 lines of poetry.

*Urdu*.—Urdu Reader for Class II of Vernacular Schools, published by the Newal Kishore Press, Lucknow.

*Hindi*.—Hindi Reader for Class II of Vernacular Schools, published by the Newal Kishore Press, Lucknow.

2. *Writing*.—To write on paper sentences to dictation; copy-slips should be used. Simple letters to be composed and written by boys.

*Copy-slips—Urdu*.—Copy-slip, No. I, published by the Indian Press, Allahabad.

*Hindi*.— Ditto ditto.

3. *Arithmetic*.—The four compound rules in Indian money and weights and measures in common use with miscellaneous examples. Indian symbols for sums in money and weights also to be taught.

NOTE.—Boys reading Nagari will learn the Hindi symbols and those reading Urdu will learn the raqams, but any boy may learn both.

Tables up to  $20 \times \frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{1}{8}$ ,  $1\frac{1}{2}$ ,  $2\frac{1}{2}$  to be constructed and learnt.

4. *Geography*.—The meaning and use of a map; the points of the compass; explanation of simple geographical terms by reference to a map or diagram. Illustrations by means of models to be encouraged. Teachers should be required to draw large-scale maps of the village to be fastened to the wall and used with the class.

5. *Object lessons*.—As in the scheme proscribed. (Vide Appendix.)

6. *Physical exercises*.—The same as for class I.

NOTE.—In the course of the "object lessons" given in Classes I and II the teachers should make drawings of simple objects referred to in the said lessons and encourage pupils to copy them.

#### UPPER PRIMARY SECTION.

##### Class III.

1. *Reading*.—To read at sight from the text-book and to explain the words and sentences. To recite 40 lines of poetry. Practice in reading simple specimens of script.

*Urdu*.—Urdu Reader for Classes III and IV of Vernacular Schools, published by the Newal Kishore Press, Lucknow, and Sawad-i-Urdu by Khan Sahib Maulvi Muhammad Ismail, published by the Newal Kishore Press, Lucknow.

*Hindi*.—Hindi Reader for Classes III and IV of Vernacular Schools, published by the Newal Kishore Press, Lucknow, and Hindi Praveshika (revised edition of 1918) published by the Indian Press, Allahabad.

2. *Grammar*.—Oral teaching of elementary grammar in its practical application.

3. *Writing*.—To write passages to dictation from the text-book or from books of equal difficulty. Copy-books or slips to be used. Letters to be composed and written by the boys with proper forms of address.

*Copy-slips—Urdu*.—Copy-slip, No. II, published by the Indian Press, Allahabad.

*Hindi*.— Ditto Ditto.

4. *Arithmetic*.—L. C. M. by factors. Vulgar fractions. Exercises both oral and written on the rules already learnt and having a direct bearing on matters of every-day concern.

5. *Geography*.—Map of the district with simple notes on historical events.

6. *Object lessons*.—As in the scheme proscribed. (Vide Appendix.)

7. *Physical exercises*.—The following exercises given in Kempster and Kaye's Physical Drill in Urdu or Hindi, Macmillan & Co. :—

CHAPTER I.—The whole.

„ II.—Opening the ranks.

„ III.—Exercises 1 to 11.

Races and jumps.

##### Class IV.

1. *Reading*.—To read at sight from the text-books and from other books, and to explain words, allusions and sentences. Reading of the script, more particularly *patwari's* papers (in rural schools) and such documents as *pattas* and *qanuniyats*. To recite 60 lines of poetry.

*Urdu*.—Urdu Reader for Classes III and IV of Vernacular Schools, published by the Newal Kishore Press, Lucknow, and Sawad-i-Urdu by Khan Sahib Maulvi Muhammad Ismail, published by the Newal Kishore Press, Lucknow.

*Hindi*.—Hindi Reader for Classes III and IV of Vernacular Schools, published by the Newal Kishore Press, Lucknow, and Hindi Praveshika (revised edition of 1918) by the Indian Press, Allahabad.

2. *Grammar*.—Parts of speech, syntax, and etymology of words.

3. *Writing*.—To write passages to dictation from a book of equal difficulty with the text-books. To compose and write complete letters on ordinary topics with proper forms of address; also brief descriptions of common objects.

4. *Arithmetic*.—Simple proportion by unitary method; simple interest; practice; simple lessons in account-keeping (*roznamcha* and *khata*). Simple lessons in compound interest. Urdu and Hindi figures for weights and measures.

5. *Geography*.—Principal features, provinces, and the most important towns of India to be taught from the map; United Provinces to be taught in detail.

6. *Object lessons*.—As in the scheme prescribed. (Vide Appendix.)

7. *Physical exercises*.—The same as for Class III.

NOTES.—1. In Classes III and IV practice in drawing should be continued in connection with the object lessons.

2. The literary readers (*Sawaid-i-Urdu* and *Hindi Praveshika*) prescribed for use in Classes III and IV should not be commenced until the scholar has made sufficient progress in the common language to enable him to study the literary reader with advantage.

#### MIDDLE SECTION.

##### Class V.

1. *Language*.—(a) Literary course with grammar.

*Text-books—Urdu*.—*Adib-i-Urdu* (prose—up to the end of the lesson “*Swamiji ka dusra safar*” and poetry—up to the end of the *qasida* on “*Jalsa-i-Madrassa Tibbiya Delhi*”), by Khan Sahib Maulvi Muhammad Ismail, published by the Newal Kishore Press, Lucknow.

*Hindi*.—Hindi Middle Reader, Part I, published by the Indian Press, Allahabad.

(b) Translation or paraphrase into modern idiomatic prose from standard authors not read in the class.

(c) Letter-writing in current idiomatic style and in the proper form of courtesy and address.

2. *Mathematics*.—(a) *Arithmetic*.—Revision with special attention to mental problems with small numbers. Simple calculations in the four simple rules with decimal fractions (excluding recurring decimal). Conversion of vulgar fractions into decimal fractions to a given number of places and *vice versa*. The four compound rules and reductions in British weights and measures in common use, instruction to be as realistic as possible. Oral and written problems in the above.

(b) *Geometry*.—Drawing and measurement of straight lines and angles; parallel straight lines; angles of a triangle; construction of triangles and parallelograms.

*Text-book*.—Pierpoint's *Elements of Geometry in Theory and Practice, Part I, Experimental section*, in Urdu or Hindi (pupil's edition), published by the Indian Press, Allahabad.

3. (a) *History*.—Stories from Indian History.

*Text-book*.—*Easy Stories from Indian History* in Urdu or Hindi, Macmillan & Co.

(b) *Geography*.—Shape, size and surface of the earth; sphere and hemisphere; poles and equator; circumference and diameter; land and water hemispheres; eastern and western hemispheres; the five oceans and five continents.

The essentials of the Geography of India:—

Position; coasts and islands; the main physical features; climate; productions; provinces and chief Native States; the most important towns.

NOTE.—In connection with the climate of India there should be a preliminary treatment of the following points of physical geography:—

Factors determining the climate of a place—distance from the equator, distance from the sea, height above sea-level, and distribution of rain.

4. *Object lessons*.—As in the scheme prescribed. (Vide Appendix.)

5. *Second vernacular*.—(a) Literary course as for Class III (omitting grammar).

(b) Translation from Urdu into Hindi and *vice versa*.

Or

*Drawing*.—In connection with object lessons, simple common objects, consisting chiefly of easy curves, such as leaves, fruits, flowers, seeds, stalks, eggs, kite, ball, onion,

peapod, and similar objects. The drawing and measurement of straight lines and angles, parallel straight lines, triangles and parallelograms. In all cases actual dimensions should be given and actual measurement insisted upon.

6. *Physical exercises*.—The following exercises given in Kempster and Kaye's Physical Drill in Urdu or Hindi, Macmillan and Co. :—

Chapters I—II.—The whole.

Chapter IV.—The whole (optional). Races, jumps, and tug of war.

#### Class VI.

1. *Language*.—(a) Literary course with grammar.

*Text-books—Urdu*.—Sarf-naya i-Urdu (prose—from the lesson "Waqt" to the end of the prose portion, and poetry—from the ghazal by Khan Bahadur Saiyid Akbar Husain Akbar to the end of the poetry portion), by Saiyid Ahmad Ashraf Ashrfi, published by Saiyid Muhammad Murad Ashraf, Allahabad.

*Hindi*.—Hindi Middle Reader, Part II, published by the Indian Press, Allahabad.

(b) Translation or paraphrase into modern idiomatic prose from standard authors not read in the class.

(c) Letter-writing in current idiomatic style and in the proper form of courtesy and address.

2. *Mathematics*.—(a) *Arithmetic*.—Revision, measurement of the area of a rectangle and the volume of a rectangular solid, when the lengths of the sides are given in feet or inches to one place of decimal. Square root; simple and compound proportion; oral and written problems in the above.

(b) *Geometry*.—Pierpoint's Elements of Geometry in Theory and Practice, Part I in Urdu or Hindi (pupil's edition), published by the Indian Press, Allahabad, as follows :—

Urdu or Hindi version.—Theoretical section (up to the end of theorem 21).

3. *History* (a).—Indian History in outline to the decline of the Moghal Empire with reference to the following :—

Introductory.—The country and its people.

(1) *The Hindu Period*.—The Aryans; how we learn about the past; Buddha and his story; Alexander the Great in India; Chandra Gupta and his court; Asoka; Kanishka; the Gupta Empire—Fahien; Harsha—Hsien Tsang; the Rajputs.

(2) *The Muhammadan Period*.—Mahmud of Ghazni; Muhammad Ghor; Sultan Razia and Balban; Alauddin; Muhammad Tughlak; Firoz; Timur; Baber; Humayun and Sher Shah; Akbar; Jahangir and Shahjahan; Aurangzeb; Sivaji; decline of the Moghal Empire; the Mahrathas.

*Text-book*.—Urdu History of India, Part I, by E. Marsden and Jia Ram, Macmillan & Co., or Hindi History of India, Part I, by E. Marsden and Sita Ram, Macmillan & Co.

(b) *Geography—General*.—The essentials of the Geography of Asia; position; coasts and islands; the main physical features; brief description of climate; most important productions; main political divisions and most important towns.

*Physical*.—Evaporation. Cooling effect of evaporation. The presence of water vapour in the air. Hot air can hold more water vapour than cold air. Condensation. Formation of clouds. Dew and mist. Rain. Formation of springs. The three stages of a river. Wind. The monsoons. Factors which determine climate.

4. *Second Vernacular*.—(a) Literary course as for Class IV (omitting grammar).

(b) Translation from Urdu and Hindi and *vice versa*.

Or

*Drawing*.—Simple common objects having straight lined or curved and straight lined forms, such as bottles, boxes, envelope, book, inkpot, drawer handle, candle, hockey-stick, etc. Drawing to scale of *takhtia*, *belan*, *chakla*, doors, windows, tables, etc.

5. *Physical exercises*.—The course prescribed for Class V.

#### Class VII.

1. *Language*.—(a) Literary course with grammar.

*Urdu*.—Urdu Final Reader, published by the Indian Press, Allahabad.

*Hindi*.—Hindi

ditto

ditto.

(b) Translation or paraphrase into modern idiomatic prose from standard authors not read in the class

(c) Letter-writing in current idiomatic style and in the proper form of courtesy and address.

2. *Mathematics*—(a) *Arithmetic*—Revision. Proportional parts. More difficult examples in percentage and in simple and compound proportion. Profit and loss. Oral and written problems in the above

NOTE.—Pupils should be taught how to solve a simple equation with one unknown quantity and should be encouraged to use symbols in the solution of questions in Arithmetic.

(b) *Geometry*.—Pierpoint's Elements of Geometry in Theory and Practice in Urdu or Hindi, Parts I—III (pupil's edition, published by the Indian Press, Allahabad, as follows:—

Urdu or Hindi version.—Part I—Theoretical section (from definition 39 to the end of the section) Practical section (the whole) Parts II and III—Experimental section (up to the end of the chapter on the theorem of Pythagoras) Theoretical section (up to the end of theorem 23). Practical section (the chapter on the practical determination of the areas of irregular rectilinear figures)

3 (a) *History*.—Indian History in outline from the decline of the Moghal Empire to 1858, with reference to the following:—

(1) The coming of the European traders (2) Dupleix and Clive. (3) Rise of the East India Company to the supremacy in India. Warren Hastings. Cornwallis Wellesley (4) The Company as the paramount power in India. Lord Hastings and his three wars—the Burmese wars—Lord William Bentinck and his reforms. The Afghan and Sikh wars. Dalhousie's administration—the Mutiny—Queen Victoria's proclamation.

*Text-book*.—Urdu History of India, Part II, by E. Marsden and Jia Ram, Macmillan & Co, or Hindi History of India, Part II, by E. Marsden and Sita Ram, Macmillan & Co.

(b) *Geography*—General—Outline of the Geography of the world: Europe, America, Canada, Australia, New Zealand, and British South Africa. The outline to consist of a brief description of the following:—The most prominent physical features, the climate, the life and work of the people, and the very great towns.

*Physical*—The earth; morning, noon and night; latitude and longitude; the zones; the seasons.

4. *Second Vernacular*.—(a) *Readers*—The course prescribed for Class V

(b) *Grammar*—As for Class IV.

(c) *Composition*

(r)

*Drawing*.—Drawing of more difficult forms of flower, leaves, fruit and common objects and objects of natural history such as feathers, &c Preparation of diagrams to scale of rooms, roads, fields, Map construction.

5 *Physical exercises*.—The course prescribed for Class V.

ALPHABET CHARTS AND TEXT-BOOKS

Alphabet Charts

Class A.

The following charts are approved for use:—

Urdu.—Urdu Chart, No I (illustrated, showing simple letters (Price Re. 1-8-0), Indian Press, Allahabad

Urdu Chart (unillustrated) showing simple letters in thick type (Price Re. 1), Gulab Singh and Sons, Lahore

Urdu Chart, No II (unillustrated), showing simple and compound letters (Price As. 12), Indian Press, Allahabad.

Urdu Chart, No III (unillustrated), showing combination of vowels (Price As. 12), Indian Press, Allahabad.

Hindi.—Hindi Charts, Nos. I and II (illustrated), showing simple letters (Price Rs 3 for both), Indian Press, Allahabad.

Two Alphabet Charts (unillustrated) showing combination of vowels (Price Re. 1-8-0 for both), P. Girdhar Lal Pacholi, Chah Chand, Allahabad.

Alphabet Chart (unillustrated) showing combination of consonants in two colours (Price Re. 1), Newal Kishore Press, Lucknow.

**APPENDIX.**

**SCHEMES OF OBJECT LESSONS.**

**Instructions to Teachers.**

**OBJECT LESSONS**

*Aims.*—The chief aims of these lessons are to train children to observe accurately and to quicken their interest in the world around them. In the preparatory stage these are the sole aim. In the higher classes the lessons will farther be used to train children to reflect on the results of their observations and to reason about things; they will compare and contrast things. The lessons may be used for other purposes; they may add to the children's intelligent knowledge of common things, and be made the basis of instruction in language and drawing. While it is of importance to keep these additional aims in mind, we must regard them as of secondary importance; if we endeavour to impart to children information, however useful it may be, without making them handle and examine things for themselves, we shall fail to make our teaching the means of developing habits of observation, and the information imparted will be superficial and inaccurate.

*Choice of objects.*—Familiar objects, chosen from the locality in which the school lies, are recommended. These are better than unfamiliar objects, as a means of training children to use their eyes; we shall make them observant if we get them to see what they had failed to notice in obvious things. Thus, the majority of children regard all leaves as having the same shape and structure, until their attention is drawn in an observation lesson to differences. Further, objects which can be so easily procured that all children may bring a specimen to the class and examine it, will give more interest to the lessons than objects which can be shown from the teacher's desk or by pictures. A lesson on milk would therefore be a much wiser choice than a lesson on sodium, and a lesson on a parrot than one on a rhinoceros.

The objects should be chosen with reference to the season of the year and to the age of the pupils. Thus, lessons in which flowers are being examined should be taken in the months of March and April, when the children will have opportunities of examining many varieties; and while a lesson on germination would be suitable for Class IV, it would be too difficult for Class II.

In order to give opportunities for comparison, the objects chosen should have some connection with each other. In the lowest classes they will be linked together by dealing with similar groups of objects (e. g., common crops), between which the pupils may note comparison and contrast. In the higher classes there should be more continuity of subject; the series of lessons should give the children opportunities to make deductions, and should lead them to the statements of simple general truths such as "Animal life is dependent on plant life." By association in this way the lessons will gain greatly in interest, and will admit of gradual progress in difficulty along particular lines.

The actual objects should, wherever possible, be obtained. Nearly all the lessons in the following lists can be illustrated by objects which the children can bring to school. If the teacher encourages his pupils to exert themselves in this way, he will help greatly to make his lessons a success. Pictures are a poor substitute for the real object and should be used in the place of objects only when lessons are given on certain animals which cannot be shown in the school, e. g., camel, crocodile, but which may form the subject of a lesson if children are familiar with them.

It is not necessary to have many objects in a course. The teacher should not attempt to give lessons on all the objects mentioned in the following lists; he should make a selection. Habits of observation are better cultivated by examining a few objects thoroughly than by cursorily looking at many.

*Method of teaching.*—The first necessity in an object lesson is an object to observe. It would not be necessary to say this, were it not a fact that many teachers are content with a picture, a model, or even a description from a book. A picture or model will help to make a description more vivid, but cannot take the place of the object itself.

The teacher should first find out from the class all they know about the object. He should then lead them to examine it more closely and notice things which formerly they had failed to observe. Finally, he should lead them to see how the object is adapted by its structure to its uses, ways of living, or mode of growth.

The most common fault of these lessons is that the children do nothing but listen. The teacher should guard against the temptation of imparting much information in one lesson, for children become tired and bewildered by many facts and descriptions. The information should only be such as the object itself gives; any further information may, if necessary, be given in other lessons. Thus a lesson on stamps may be an object lesson, but an account of the way in which letters are conveyed from one place to another should be left to the reading or composition lesson; while the growth of particular plants may be studied in the observation lesson, the distribution of crops in a particular part of the country should be taught in the geography lesson.

"One thing at a time" is a good rule. But while it is not desirable in one lesson to deal with several kinds of objects, there should always be several specimens of an object in the class and, if possible, each pupil should have a specimen before him.

Questions should be put at the beginning of a lesson to find out what the children already know about the object. In the course of the lesson questions should be put in order to stimulate the children to think and to look at things for themselves. At suitable stages or at the end of the lesson the teacher should question the class to find out what they have grasped. He should also at the end of suitable stages encourage the class to ask him questions.

The teacher's language should be simple and his own (i. e., not quoted from a text-book), and if he uses technical terms these should only be such as the boys are likely to use subsequently. The value of the lesson as a means of training pupils in the correct use of language in speaking and writing should not be overlooked. The pupils should therefore be encouraged to express the results of their observations by accurate description in speaking or writing, and while the teacher should not make his lesson one on grammar or composition, he should not allow careless expressions to pass uncorrected. In the preparatory classes the

lessons should take the form of conversations between teacher and pupils. In Classes I and II the children should be asked to write the name of the object and, where possible, to make drawings. In Classes III and IV simple records should be made, and children should invariably be asked to make simple drawings. The records may at first be copies of the teacher's summaries on the blackboard, but these should be replaced as soon as possible by simple descriptions, written by the pupils in their own words.

More and more will be expected of pupils as they grow older. In the Preparatory stage the sole aim of the lessons will be to awaken in children an interest in the things around them, the lessons must be short and bright, and questions will be put solely to make children examine things. In Classes I and II the objects chosen will be more difficult of analysis and will require more careful examination than those of the Preparatory classes; pupils will be led to compare and contrast things, and will be questioned to make them think why the properties and structure of the object are specially adapted to its uses, ways of living, or mode of growth. In Classes III and IV there will be a greater demand than in previous classes on the reasoning powers; things will be classified, deductions will be made, general truths will be arrived at and a training will be given in exact measurement.

Diagrams and drawings by the teacher on the blackboard are valuable as a means of giving interest to a lesson, but these should follow, not precede, the children's observations. The blackboard sketches should not be elaborate drawings. The fewer lines in them the better; each drawing should bring out only one or two points, for any elaboration will only distract the class.

When experiments are performed information should not be given as to what may be expected to happen; when the experiment has been carried out the children should be questioned and led to reason out for themselves what it teaches.

For successful teaching, the *teacher's interest* is the first essential. If instead of depending solely on books, he works at the objects himself saying: "How can I kindle the interest of children in these? How can I awaken their curiosity and stimulate them to observe and enquire?" his teaching will be successful.

#### SCHEME OF OBJECT LESSONS.

Teachers should select their lessons from the following lists:—They should choose from lists objects which are found in the district in which the school is situated, and are best suited to the ages of the children.

#### PREPARATORY CLASSES A AND B.

*Common things.*—Simple forms: sphere, cube, cylinder—illustrated by balls, pieces of sugarcane, pencils, *picikiri* (syringe), *bansari* (flute), bricks. Colours: the children should be taught to distinguish the colours white, black red, green, yellow and blue. The following should be used as illustrations: Flowers, coloured paper, cloth, wool, beads and *churries* (bangles).

*Common animals and birds.*—Cow, goat, sheep, cat, dog, parrot, pigeon, *titar*.

*Common fruits.*—Guava, mango, orange, tamarind, *ber*.

*Common articles of food.*—Mil, water, bread, *dal* (lentil), *ghee* (clarified butter), *dahi* (curds).

#### Class I.

*Common things.*—*Tukhti*, slate, knife, *khurpa* (hoe), *phiruz* (spade), *khupra* (tile), *ghara* (pitcher).

*Common animals and birds.*—Buffalo, horse, ass, camel, sparrow, *maina*.

*Common crops.*—Wheat, barley, gram, maize, rice, *bajra*, peas.

*Common vegetables.*—*Sag* (spinach), *bhindi* (lady's finger), *gajar* (carrot), *mul* (radish), potato, *kohra* (pumpkin).

#### Class II.

*Common things.*—Stamps, metals (iron, brass, copper), coins, clay, sand, sulphur, saw, *chheni* (chisel), *burmi* (borer), *hal* (plough), harrow, *kolhu* (sugar mill).

*Common animals.*—Elephant, monkey, fish, snake, squirrel, rabbit, frog (to be selected only if they are frequently seen in the locality, and if suitable pictures are available), peacock, crow, blue-jay.

*Common trees and plants.*—Mango, *pipal*, *nim*, tamarind, bamboo, cotton, castor plant.

## Class III.

Serial number.	Subject.	Detailed syllabus	Month of the year in which the subject is to be taught.
1	Classification of objects.	Living and non-living objects. Natural and artificial objects.	July.
2	Plants and their parts.	Examination of a number of the common flowering plants of the neighbourhood with reference to their flowers, leaves, stems, roots, fruits and seeds, and also to the following:— (a) Flowers yield seeds and fade away (b) The stem holds the leaves up to the sunlight and supports the flower. (c) The root fixes the plant in the soil.	July and August.
3	Flowers ...	Examination of some of the common flowers of the season with reference to the following parts:—petals, sepals and stamens. The following are examples which may be studied:— <i>Rhira</i> (cucumber), <i>bhindi</i> (lady's finger), <i>lunki</i> (gourd), <i>jasmine</i> , <i>rose</i> , <i>dhotura</i> , <i>gul hazara</i>	August and September.
4	Fruits ...	Examination of some of the common fruits of the season with reference to differences in colour, smell, taste, shape and size, and also to the fact that fruits contain seeds. The following fruits may be examined:— Custard-apple ( <i>sharifa</i> ), lemon, orange, cucumber.	September and October.
5	Leaves and their classification.	Classification of leaves of different plants; leaves to be brought by pupils. (a) By shape— (i) long and narrow, e.g. grass, especially the following:— <i>Khus</i> , <i>nolla</i> , <i>sarkanda</i> , wheat, rice, barley (ii) needle-shaped, e.g. <i>chir</i> (iii) oval shaped, e.g. <i>tildana</i> , <i>chajra</i> (b) By structure— (i) simple (one blade, e.g. mango, <i>pupal</i> , <i>bargad</i> , mulberry, <i>keela</i> ) (ii) compound (blades divided into separate leaflets, e.g. <i>arhar</i> , <i>gram</i> , <i>nim</i> , <i>shisham</i> ). (c) By margin— (i) leaves with entire margins, e.g. mango, <i>bargad</i> , <i>mahua</i> , <i>gular</i> , bamboo, jack-fruit. (ii) leaves with toothed margins, e.g., mulberry, castor, rose.	November and December

Serial number	Subject.	Detailed syllabus	Month of the year in which the subject is to be taught.
		(d) By veining— (i) net-veined leaves, e.g., pipal, <i>bargad</i> , gourd, melon. (ii) parallel veined leaves, e.g., sugarcane, bamboo, <i>haldi</i> .	
6	Flowers ...	Examination (resumed) of some of the common flowers of the winter season with reference to their petals, sepals and stamens. The following may be studied:—Cotton, poppy, <i>bhanta</i> , mustard, <i>dhanaya</i> , peas.	January.
7	Trees ...	Identification of some of the common trees of the neighbourhood by their leaves of which drawings should be made by the pupils.  The following are examples which may be studied:— <i>Shisham</i> , <i>nim</i> , <i>mahua</i> , <i>sal</i> , mango, <i>pipal</i> , <i>bargad</i> , <i>katahal</i> , mulberry, bamboo, toddy palm, date palm.	January. and February.
8	Fruits ...	Examination of some of the common fruits of the winter season, as in September and October  The following are examples which may be examined:—Guava, plum <i>kamrak</i> , <i>anar</i> , <i>anjir</i> .	February.
9	Observation lessons	Observation lessons on the following:—Cotton jute, tobacco, wool, paper and pencil.	March and April.

## Class IV.

Serial number	Subject.	Detailed syllabus.	Month of the year in which the subject is to be taught.
1	Needs of a plant.	Plants require (1) sunlight, (2) air, (3) water. Plants are living things	July.
2	Flowers ...	Examination of some of the common flowers of the season with reference to their carpels, sepals, petals and stamens. The following are examples which may be examined:—  Rose and jasmine—to show petals.  Rose and <i>dhatūra</i> —to show sepals.  <i>Dhatūra</i> and <i>bhindi</i> —to show carpels.	August
3	Examination and classification of plants used for food.	A simple classification of plants used as food by men or animals and an examination and comparison of these. The following are examples:—  (a) Seeds used as food— <i>arhar</i> , <i>urd</i> , pea, gram, <i>mung</i> , bean.	September and October.

## Class V

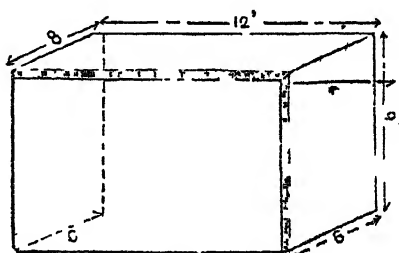

Serial number.	Subject.	Detailed syllabus.	Month of the year in which the subject is to be taught.
1	Seeds ..	Soak beans in water for a few hours and take off the skins. Note the white tip (future root), separate the fleshy parts, note the white stem lying between them.	July.
2	Germination	To grow and examine seeds, eg, beans, wheat, mustard, peas, onion, etc, and to make sketches showing the stages in growth of the seeds and also to examine the seedlings by pulling up a few at intervals of about two days.	July and August.
3	Chief things needed for germination	<p>(a) Supply of moisture. (b) Air. (c) A certain degree of warmth</p> <p><i>Experiments for (a) (b).</i></p> <p>(1) Fill a bottle with dry seeds, put some elastic bands about it and place it under water; after a few days the bottle will be burst by the swelling seeds.</p> <p>(2) Place some dry seeds in dry sawdust and others in moist sawdust (an inch below the surface); compare the results after a week or two.</p> <p>(3) Take three small wide mouthed bottles, two of which have good corks. Call these I, II, III</p> <p>Dry I, place in it some seeds (mustard, wheat, barley), cork, and seal with sealing wax.</p> <p>In II put two or three layers of blotting-paper (wet) at the bottom; then put in seeds and cork, and seal as before.</p> <p>Treat III like II, but leave the bottle uncorked. Put the bottles side by side and examine daily.</p> <p>In I they do not germinate, no water and little air.</p> <p>In II they grow for a little while but then die.</p> <p>In III they grow well if the paper is kept moist.</p> <p><i>Experiment for (c).</i></p> <p>Take two small flower pots and fill them with moist sawdust or sand. Sow some barley or wheat seed in each. Place one pot in another earthen vessel in which water is kept for cooling, taking care that the water does not reach the pot containing the seeds. Keep the other pot near the first but without cold water round it.</p> <p>Note that the seeds germinate quicker in the second pot than in the first. The germination is delayed with decrease of warmth and stops if there is no warmth at all (cf. how "doob" grass grows in the rainy season with moisture and warmth; when the latter is withdrawn in the cold season, little growth, if any, is made till February, when "warming up" begins again).</p>	August and September.

Serial number	Subject.	Detailed syllabus.	Month of the year in which the subject is to be taught.
4	Roots attract- ed by water	Fill a shallow box, having a bottom of coarse muslin, with a layer of sawdust. Plant mustard seeds. Tilt the box by a block of wood under one end. Keep the sawdust watered. Note that the roots pass out at the bottom but afterwards turn towards the moist sawdust. The same experiment may be tried with wheat and gourd.	October.
5	Mensuration ..	<p>Measurement of curved lines :—</p> <p>Supply pupils with bamboo cylinders (made by cutting a long piece of bamboo into portions 2" or 3" long). Determine the circumference thus :—Wrap a piece of thin paper round the cylinder; stick a pin through the overlapping of parts of the paper and measure the distance between the pin-pricks; or wrap thread round the cylinder 4 or 5 times and measure the length of the thread dividing the length so obtained by the number of times it has been wrapped round.</p> <p>Measure the perimeters of coins or other circular pieces of metal by making a mark on the rim and rolling the coin along the rule.</p> <p>Outside measurements :—</p> <p>Use a tape measure which may be made by the teacher, each boy being provided with a piece of string cut to length of the definite number of yards (e.g., four yards; then the string folded in half equal two yards and folded again half equal one yard).</p> <p>Distance to be measured and then stepped.</p> <p>Boys to find the length of an average step.</p> <p>Measurement of the dimensions of the school room or school garden. Exercises in estimating distances, and stepping to verify the guesses.</p> <p>Plans of compound to be made (the measurements being made by the use of the strings and foot-rule)</p>	<p>October and November.</p> <p>November and December.</p>
6	Flowers ...	<p>Examination of some of the common flowers of the season with reference to their various parts (revision). Functions of the different parts of a flower. Pollination and seed productions, the primary function of the flower.</p> <p>The relationship between insects and flowers; note only certain kinds of insects visit flowers; why insects come to flowers; advantage to flowers of insect visits.</p>	January and February.
7	Fruits and seeds.	<p>Dispersal of fruits and seeds; its reason. Seed dispersal and advantage because it prevents overcrowding.</p> <p>Dispersing agents. How dispersed :—</p> <p>(a) Wind--</p>	March and April.

Serial number.	Subject.	Detailed syllabus.	Month of the year in which the subject is to be taught.
		<p>Seeds or fruits that are carried by the wind—</p> <p>(1) Parachute fruits, e.g., thistle-down, <i>kans</i>, <i>parwal</i>, <i>sarkanda</i></p> <p>(2) Winged seeds, e.g., <i>kaner</i>.</p> <p>(3) Parachute seeds, e.g., cotton, <i>simal</i>, <i>madar</i>.</p> <p>(b) Animals—</p> <p>(1) Seeds enclosed in succulent fruits which are eaten by birds or animals; the seeds are rejected, sometimes at long distances away, e.g., <i>anar</i>, peas, guava, <i>jamun</i>, <i>gular</i>, <i>anjir</i>.</p> <p>(2) Seeds and fruits dispersed by attachment to animals :—</p> <p>(i) fruits with hooks, e.g., <i>latzira</i>, <i>gokhru</i>, spear-moss, <i>kutta</i> grass;</p> <p>(ii) sticky seeds, e.g., <i>cordia latifolia</i>.</p> <p>(c) Explosive or ejective mechanism in the fruit itself. Seeds liberated by the bursting of fruits, e.g., <i>arhar</i>, castor, <i>gulmenhdi</i>, <i>oxalis</i>.</p> <p>(d) Water, especially in the case of aquatic plants and also those which grow on the margins of streams</p>	

*Equipment for object lessons.*

It is suggested that schools in which object lessons are attempted should be supplied with flower pots, if possible one between every two children, and a sufficient quantity of sawdust so as to enable scholars to see root development. Provided that money be available it would still be better to supply the schools with germinating boxes made as in the sketch below :—

*Iron ribbon  
nailed to keep  
sides straight.*

These boxes are made open at the top with a pane of glass in front fitting into a groove and sloping inwards. By this means the development of roots is seen and can be measured: the difference in the branching of roots in the two main groups illustrated by any grass (barley, wheat, maize, rice, oats, etc.) and plants such as beans, peas, guards, etc., can be made out. These boxes are a never-failing source of interest and a valuable adjunct in teaching.

*Hindi*—1. *Tulsi Das Ramayan*, Aranya Kand, Indian Press, Allahabad.

2. The following selections from *Sanitya Nava Niti*, by P. Ambika Datta Vyasa, published by Pandit Radha Kumar Vyasa, Manager, Vyas & Co., Man Mandir, Benares City:—

Prem Sagar; Raj Sinha; Ashcharya Vrittant; Sharirik Sudhar; Parimit Vyaya; Padumavati; Chhatra Prakash; Ekantvasi Yogi; Kashi Varnan; Dasharath Vilap; Shakuntala.

3. *Hindi Middle Vyakaran*, Newal Kishore Press, Lucknow.

(b) Translation or paraphrase into modern idiomatic prose from standard authors not read in the class.

(c) Letter-writing in current idiomatic style and in the proper form of courtesy and address.

### II.—Second Language—

(a) *Reading*.—To read at sight from the text-books and to explain words, allusions and sentences.

The text-books prescribed are:—

*Urdu*—1. *Urdu Reader*, No. V, by Khan Sahib M. Muhammad Ismail, Newal Kishore Press, Lucknow.

*Hindi*—1. *Tulsi Das Ramayan*, Sundar Kand, Indian Press, Allahabad.

2. *Teth Hindi ka Tath*, by P. Ajudhya Singh Upadhyaya, Khadga Vilas Press, Bankipur.

(b) *Grammar*—

*Urdu*.—*Risala-i-Qawaid-i-Urdu*, Part I, Mission Press, Allahabad.

*Hindi*.—*Bhasa Vyakaran*, by P. Chandra Mauli Sukul, M.A., L.T., Indian Press, Allahabad.

(c) *Writing*.—To write passages to dictation from a book of equal difficulty with the text-book. To compose and write letters on ordinary topics, also brief descriptions of common objects.

NOTES.—(1) The students of the Training Schools in the Kumaun Division provided with an Urdu Teacher may read "*Urdu Reader for Classes III and IV of Vernacular Schools for Boys*," Newal Kishore Press, Lucknow, and "*Sawad-i-Urdu*," by Khan Sahib M. Muhammad Ismail, Newal Kishore Press, Lucknow, in lieu of "*Urdu Reader*, No. V," by the same author.

(2) The students of such Training Schools in the Kumaun Division as are not supplied with an Urdu Teacher are allowed to take the following additional course in Hindi in place of Urdu:—

1. *Satya Harish Chandra Natak*, by Bharatendu Harish Chandra, Khadga Vilas Press, Bankipur.

2. *Tulsi Das Ramayan*, Ayodhya Kand (up to the end of *do* 141), Indian Press, Allahabad.

### III.—*Arithmetic*.—The following with special reference to teaching the same:—

Numeration and notation; the four simple rules; the four compound rules and reductions in Indian weights and measures in common use in the United Provinces; H. C. F. by factors; L. C. M.; the four simple rules in vulgar fractions; vulgar fractions of concrete quantities; practice; account-keeping (*roznamcha* and *khata*); percentages; the unitary method; simple interest; easy examples in compound interest.

*Text-book*.—*Vernacular Final Arithmetic* (Urdu or Hindi), Macmillan & Co.

IV.—*Geography-General*.—Revision of the Geography of India and Asia, with special reference to the teaching of the Geography of India. Maps to be drawn.

*Physical.*—Factors which determine climate; evaporation; the presence of water vapour in the air; hot air can hold more water vapour than cold air, condensation, clouds, rain, dew, mist, the three stages of a river; winds; the monsoons; morning, noon and night.

The text-book recommended for use is :—

Vernacular School Geography (Urdu or Hindi) for Classes V—VII of Vernacular Schools, Longmans, Green & Co.

V.—*Principles and Practice of Teaching.*—As in *Risala-i-Talim-o-Tarbiyat*, Part I (Urdu or Hindi), by Pandit Iqbal Kishen or in *Hadi-ul-Mudarrisin* (Urdu or Hindi), by Lala Ladli Das.

NOTE.—Manual for Teachers of Primary Schools in India, by J. A. Richey (Macmillan & Co.), in Urdu or Hindi is recommended for the use of teachers.

#### VI.—*Drawing*—

##### Stage I.

- A.—The Circle ... .. Turned objects having a circular outline; as a plate, coin, hoop, wheel, clock-face, sun, moon, etc.
- B.—Modifications of the circle ... Orange, apple, *ghara*, football, pomegranate.

##### Stage II.

- A.—The ellipse ... .. Circular objects seen in perspective become ellipses; plate, coin, hoop, clock-face, rim of a vessel, etc. Also felt-cap, spectacle glass, etc.
- B.—Modifications of the ellipse ... Egg, guava, brinjal, *papita*, jackfruit, gourd, cocoanut, pear, etc.

##### Stage III. Simple straight lined objects.

- A.—Right angled ... .. Envelope, table-top, door-window, box-top, black-board, etc.
- B.—Modifications ... .. Flag, *takhi*, T-square, map, etc.
- C.—Perspective ... .. Any of the above classes of objects seen in perspective.

NOTE.—The method to be adopted in teaching the subject is given in the Appendix.

VII.—*Object Lessons.*—Revision of the courses in object lessons prescribed for primary schools and for Class V of middle schools with special reference to the teaching of the course prescribed for primary schools. (To be taught only where a qualified teacher is available.)

VIII.—*Physical Exercises*—The following exercises given in Kompster and Kaye's *Physical Drill* in Urdu or Hindi (Macmillan and Co) with special reference to teaching the course prescribed for primary schools :—

Chapter I—III.—The whole. Chapter IV.—The whole (optional), races, jumps and tug-of-war.

APPENDIX.  
TRAINING SCHOOL COURSE IN DRAWING.

**Method.**

The examination test is drawing on the blackboard only, but to enable students to pass this test they should be trained in the principles of object drawing by means of work on paper and subsequently apply these principles to instruction of a class from the blackboard.

As it is a teacher's course, the method to be adopted should be that of drawing on the blackboard to a large scale, i.e., 3 feet in each direction, as being a convenient stretch for the arm, and the drawing being then within the compass of the eye as seen by the teacher and yet large enough to be seen by the pupil at a distance of 20 feet.

The drawings should be executed in as free a manner as possible, the arm being straight but flexible and the teacher standing not less than 2 feet from the blackboard.

The principal aim of the drawing to be taught later is to furnish an illustrated class record of the study of the character, etc., of the things seen by the scholars in their object lessons. Thus it is necessary that the drawing should also be done in books so as to be available for future references.

These drawings should be free in character and, when possible, should be of the same size as the original; but if this is not possible, the scale of the enlargement or reduction should be stated below the drawing.

The standard of excellence in the drawing should not be that which shows the most neatly executed outline drawing of the subject studied, but rather that which most clearly conveys or records the point or points brought out in the lesson given.

It will be advisable therefore for the teacher (as well as his pupils) to combine his drawing lesson with his object lesson, and, to ensure this, the object lessons and drawing lessons should, if possible, be consecutive periods.

The method to be adopted when teaching this subject in the Vernacular Schools would be that in the object lesson the teacher will draw attention to certain facts and impress them on the minds of his pupils by large sketches on the blackboard. These should be carefully copied in their books, or other drawings should be made by the pupils themselves from the objects under study.

This principle should also be adopted in the teacher's study, but it will be expected that his resulting drawings will show more searching observation and be executed so as to record best the character of the object under study and to impress most clearly upon the class the point illustrated.

The drawings on the blackboard (if in outline only) should be drawn with white chalk, but if representation of solid things be attempted in a solid way, they should be drawn with coloured chalks in as nearly the true colours as possible.

Sometimes, where it is found difficult to make a true rendering on a black surface, a large sheet of brown or white paper should be used for chalk and charcoal work.

For work in books usually an HB pencil will be found sufficient.

In drawing fruits sectional drawings will be of great advantage.

In all possible cases, drawings should be executed without the aid of guiding lines, and even when necessary very few guiding lines should be used.

## Curriculum for Anglo-Vernacular Boys' Schools' United Provinces, for 1918-19.

### PREFATORY MEMORANDUM.

Head Masters and Managers of Secondary English Schools are permitted, with the approval of the Inspector, and in conformity with the general principles that underlie the curriculum, to make modifications in the class-wise distribution of the work in any subject. Permission is also given, with the approval of the Inspector, to re-group scholars in classes above the primary stage for Arithmetic, Drawing, Classical Languages, Manual Training, and Science, independently of the recognized classification.

English is no longer to be used as the medium of instruction in classes up to and inclusive of class VIII; History, Geography, Science, and Mathematics are to be taught in the student's own language; but the use of English technical terms should be encouraged in classes VII and VIII, and in Mathematics students should be examined in the English language at the end of the middle stage. In the high stage alone should English be used as the medium of instruction.

Object lessons have been prescribed in the curriculum as *Optional* subjects from class VI downwards, but they should not be introduced into any school without the permission of the Inspector, who should satisfy himself that trained teachers are available and can be spared for teaching them. In no case should the work be entrusted to untrained teachers.

The teaching of English by the Direct Method should not be attempted except by specially trained teachers. Where such teachers are not available in sufficient numbers for all classes, a teacher or teachers, qualified to give such instruction, might be employed to supplement the ordinary class teaching by taking classes separately for an hour or so a week each.

Informal teaching on the subject of good manners should be given in all schools, and Head Masters may add at their discretion to the reading matter of any class of the Middle section, such portions of *Madan-i-Tehzib* by Mirza Habib Husain, Khan Bahadur, as they may deem suitable for the class. The book is available in two parts at four annas each.

#### Temperance Teaching.

Informal talks in class on the evils, both physical and moral, resulting from intemperance should be held by teachers at intervals during the session. Such talks are preferable to a course of set lessons according to a prescribed syllabus, but Head Masters should see that the subject is not neglected nor the teaching merely perfunctory.

NOTE—(a) The book in English recommended for the use of teachers is—

*Alcohol and Human Body* by Sir Victor Horsely and Mary D. Sturge (Macmillan & Co.)

(b) The book in vernacular recommended provisionally for the use of teachers is—

*Manual of Temperance* (Urdu or Hindi), by M. Mewa Ram, B.A., Offg. Inspector of Schools, Jhansi division.

## MEMORANDUM ON HOME LESSONS.

(Issued under the authority of G. O. no. 790/XV—212, dated the 19th August, 1910,  
Educational department.)

FROM the frequent complaints received regarding the excessive amount of work set to scholars by teachers for preparation at home there is reason to believe that the proper relation between work done out of school by the scholar and work done in the class room is not always perfectly understood. Investigation has disclosed much divergence of opinion as to the amount of home lessons that may be reasonably exacted from the pupil in the different stages of his school career, the kind of work most suitable for preparation out of school hours, and the proper distribution of the time available for home preparation among the different subjects of study. Enquiries concerning the prevalent practice yield the conclusion that the matter is left too much to the discretion of individual teachers. Some times the pupil is expected to prepare for every lesson in school, and sometimes the work set is wholly unsuitable in both quantity and quality for study at home. The matter clearly does not receive the attention it deserves, and since the abuse of the system of home lessons may produce permanent injury, both physical and mental, it is necessary that steps should be taken to protect scholars from it. It is desirable, therefore, without prescribing any rigid uniformity of system, to lay down certain general principles for the guidance of teachers.

(1) The fundamental principle on which home work rests is one which, it is to be feared, is too often forgotten, viz., that teaching and learning are two complementary processes, neither of which can be dispensed with or divorced from the other without detriment to educational progress. Activity on the part of the teacher must correspond to activity on the part of the learner. If either is absent, the process becomes one-sided and the result barren. Accordingly the teacher who confines himself to the "delivery" of lessons in school, with which home work is not at all or imperfectly correlated, will be little less deserving of condemnation than the teacher at the opposite pole, who neglects his class teaching and endeavours to make up for it by setting long tasks to be done at home.

(2) Though axiomatic it is too often forgotten that home work must be adapted, both in quantity and quality, to the capacity and the age of the scholar. Home work should not exceed the quantity which a boy of average capacity can be expected to prepare without undue mental strain and without engrossing all his spare time. The clever boy will no doubt take rather less and the dull boy rather more than the approximate time for home preparation indicated below, for they have been estimated to suit the capacity of the scholar of average ability. The aim in setting home lessons should be that a boy should be able to prepare his tasks thoroughly, and yet have sufficient spare time to devote to healthy recreations, mental and physical, of his own choice:—

(a) In the Lower Primary and Preparatory Sections no home lessons should be set at all. If the school hours are properly utilized, there is ample time for the teacher to teach and for the scholar to learn and apply what he has been taught.

(b) In classes above the Lower Primary stages the approximate time to be devoted to home lessons should not exceed in the Upper Primary Section *one hour*, in the Lower Middle Section *one and a half hours*, in the Upper Middle Section *two hours*, and in the High Section from *two to three hours*.

(3) Home work should not be exacted from a scholar in too many subjects on the same day, nor too much in one subject. In this matter, the Head Master must exercise controlling authority over the class teachers. He should enquire from them from time to time what amount of work is set in the various subjects, and should see that too much time has not to be given to the study of one subject at the expense of another.

(4) Home work is one of the most important means whereby the student can be trained in the habit of doing things for himself. It must be something which he can accomplish on the basis of what he has learnt in school, not something beyond his powers which necessitates recourse to the assistance of a private tutor. A boy who is always being helped in the preparation of his home work by a private tutor loses confidence in himself and the habit of doing things independently. Moreover, work which is the result of collaboration with a private tutor, affords no criterion of the boy's capacity, progress or industry.

(5) Home work should be not only such as can be done without assistance but such as implies effort. It should never be a merely mechanical exercise which involves no intellectual exertion. It should not, for example, consist of the transcription of "rough" work done in school. Under the influence of unsound tradition there has been and still is much waste of labour in this way. Such work is manual, not mental, and should be altogether unnecessary for boys who have been trained in habits of neatness and accuracy.

(6) In the lower stages, it cannot be expected that boys should break much new ground for themselves. They should therefore be almost exclusively occupied in going over the ground already covered in class, and this work of assimilation should be tested by the teacher at the beginning of a fresh lesson. It may therefore be laid down as a general rule that written exercises upon matter not already taught in school should rarely be set in the Upper Primary section. The work at home should take the form of recapitulating the work done in the day and of training the memory, which at this stage may be most usefully exercised. But since scholars cannot be expected to take much interest in what they find neglected by the teacher, written exercises should be punctually corrected and returned to them as soon as possible. It is most important that the work of this nature should never be allowed to fall into arrears. In the higher classes, pupils will of course have to break ground for themselves, e.g., to solve "a deduction," to study the history or the literary text-book, for the next day's lesson.

(7) There is a tendency to relegate too much written work to out-of-school hours. It cannot be too strongly emphasized that the best means of training pupils to write clearly, to arrange their work neatly, and to take pains is to insist on these points in class note-books, used in school under the eye of the master. There is plenty of time in school for written work of the nature of applying knowledge, if the teacher arranges his lessons properly. It may, in fact, be laid down as an almost invariable rule that no written work should be set as part of home lessons in the following subjects:—Arithmetic, algebra, grammar, exercises, original composition, and science; nor should work be set in copy-book writing, in drawing or in elaborate map-making. In the higher classes, where a greater variety of subjects is taught, and consequently time has to be economized, sketch maps and geometrical constructions may have to be done at home.

The abatement of the evil of excessive or unsuitable home lessons is a matter of such urgency and importance that now that their attention has been directed to it, it is hoped that managers of schools and Head Masters will lose no time in making a searching enquiry into the practices prevailing in their own schools and take measures along the lines indicated above to prevent abuses in future. The responsibility for seeing that the nature and amount of home lessons set throughout the school are suited to the capacities of scholars, is an important part of a Head Master's duties, and he should from time to time assure himself that the teachers are acting strictly in accordance with his instructions.

5. Drawing or Brushwork or Manual Training.
6. Object Lessons (optional).
7. Drill.

## CLASS VI.

1. English.
2. Mathematics (Arithmetic and Geometry)
3. Vernacular (Urdu, Hindi or Bengali\*).
4. (a) History.  
(b) Geography (General and Physical).
5. One of the following alternative subjects.—  
(i) A classical language (Persian, Arabic or Sanskrit).  
(ii) Drawing.  
(iii) Brushwork.  
(iv) Manual Training.
6. Object Lessons (optional).
7. Drill.

NOTE.—Boys should not be promoted to class VII unless they can read and write to dictation from a lower primary vernacular reader in a second character.

## UPPER MIDDLE SECTION.

## CLASSES VII AND VIII—TWO YEARS' COURSE.

1. English.
2. Mathematics (Arithmetic, Algebra, and Geometry).
3. (a) History.  
(b) Geography (General and Physical).
4. Vernacular (Urdu, Hindi or Bengali\*)
5. One of the following subjects:—  
(i) A classical language (Persian, Arabic or Sanskrit).  
(ii) Drawing.  
(iii) Manual Training.  
(iv) Science.
6. Drill.

NOTE.—Boys should not be promoted to class IX unless they can read and write to dictation from an upper primary vernacular reader in a second character.

## HIGH SECTION.

## CLASSES IX AND X—TWO YEARS' COURSE.

The two classes of the High Section are in direct preparation for either the Matriculation or the School Leaving Certificate Examination.

The Matriculation Examination is held, and the courses of study are prescribed, by the Allahabad University.

The School Leaving Certificate Examination is held, and the courses of study are prescribed, by the Central Board of that examination.

\* NOTE.—Bengali may be taught in such schools only as are recognized by the Department for the purpose of teaching the subject.

### AIMS IN THE TEACHING OF ENGLISH.

The aims in the teaching of English are—

A. *Practical*.—To enable the pupil—

(1) to speak and read aloud English with correct pronunciation and some degree of facility ;

(2) to understand the language when spoken ;

(3) to write the language with grammatical correctness and with facility.

B. *Literary*.—To enable the pupil to read intelligently for pleasure modern English prose and poetry of moderate difficulty.

C. *Linguistic*.—To qualify the student by the systematic study of the structure of the language and by practice in its use for the further study of English literature.

### SYLLABUS OF THE COURSES IN ENGLISH.

#### UPPER PRIMARY SECTION.

##### CLASS III.

*Conversation and reading*.—The early stages of instruction will be mainly oral, and should include systematic training in the sounds of spoken English, in connection with the pronunciation of easy words. By the end of the year the class should be able to carry on simple conversation about familiar objects and actions.

To read with correct pronunciation an easy primer ; to render into the Vernacular easy sentences from the primer ; to use the words of the primer in simple sentences ; and to answer in English simple questions based on the matter in the primer.

*Spelling and writing*.—To spell the words of the primer ; copy-writing in ruled books of easy familiar words ; writing in copy-books (in the latter half of the course), dictation in ruled books of words and sentences previously read in the primer.

##### CLASS IV.

*Conversation and reading*.—To converse about common objects and actions ; to read with correct pronunciation from a reader ; to render into Vernacular easy sentences from the reader ; to use the words of the reader in simple sentences and to answer in English simple questions based on the matter in the reader.

*Spelling and writing*.—To spell the words of the reader ; dictation in ruled books of words and sentences previously read in the reader ; writing in copy-books.

*Grammar and composition*.—Formal grammar should be commenced ; division of a sentence into two parts : subject and predicate. To point out nouns, pronouns, adjectives, and verbs (without sub-classifications). Oral and written exercises in the above.

Easy written composition (at least once a week), e.g., completion of sentences. Easy written composition from the Vernacular into English idiomatic sentences (at least once a week).

#### LOWER MIDDLE SECTION.

##### CLASS V.

*Conversation and reading*.—To carry on simple conversation in English ; to read with correct pronunciation from a reader ; to render into the Vernacular passages from the reader ; to use the words of the reader in simple sentences and to answer in English questions based on the matter in the reader.

*Spelling and writing*.—To spell the words of the reader ; dictation in ruled books of words and sentences previously read in the reader ; writing in copy-books.

*Grammar and composition*.—Revision of previous grammar in connection with more difficult sentences. Number and gender of nouns and pronouns ; adverbs ; prepositions and conjunction (without sub-classification) ; interjections ; the definite and the indefinite articles. The conjugation of the three simple tenses ; the verb "to have" and the verb "to be." Oral and written exercises in the above.

Written composition (at least once a week), e.g., using the words and phrases of the reader in simple sentences. Written composition from the Vernacular into English idiomatic sentences (at least once a week).

##### CLASS VI.

*Conversation, reading, and recitation*.—To carry on simple conversation in English ; to read with correct pronunciation from a reader ; to render into the Vernacular passages from the reader ; to use the words of the reader in simple sentences, and to answer in English

questions based on the matter in the reader. To recite from memory passages chosen from the reader.

*Spelling and writing.*—To spell the words of the reader; dictation in ruled books of passages chosen chiefly from the reader; writing in copy-books.

*Grammar and composition.*—Revision of previous work in grammar; nouns in opposition; classification of nouns; pronouns; adjectives and adverbs; case of nouns and pronouns; direct or indirect object; verbs; number and person; transitive and intransitive; weak and strong; participles; conjugation of remaining tenses. Analysis of simple sentences. Oral and written exercises in the above.

Written composition (at least once a week), e.g., using the words and phrases of the reader in simple sentences, reproduction of simple stories, practice in answering in writing easy questions on the subject-matter of the text. Written composition from the Vernacular into English idiomatic sentences and continuous prose. In connection with the above incidental instruction in elementary points of arrangement, construction, and punctuation.

#### UPPER MIDDLE SECTION.

##### CLASSES VII AND VIII.

*Literary course (at least four periods a week).*—To carry on conversation in English; to read with correct pronunciation and expression from the prescribed text; to render into the Vernacular passages from the prescribed text; to form sentences and to answer questions in English based on the vocabulary of the text; to recite from memory suitable passages of English poetry and prose (to be selected by the Head Master).

*Supplementary reading.*—At least one easy book per session (for suitable books see proceedings of the Provincial Text-Book Committee).

*Dictation and writing.*—Dictation (at least once a week) of unseen passages of the standard indicated by the prescribed text. Writing in copy-books.

*Grammar and composition.*—Revision of previous work. Verbs; active and passive voices; moods; gerunds and verbal nouns; auxiliary verbs; complements of verbs; formal parsing; clause analysis of complex and compound sentences; elementary instruction in direct and indirect speech. Oral and written exercises in the above.

Written composition (at least once a week) including simple free composition, e.g., letter-writing and description and composition from the vernacular into English idiomatic sentences and continuous prose. Incidental instruction in arrangement, construction, and punctuation.

#### TEXT-BOOKS.

\* In classes III to VIII the following primers and readers are prescribed:—

Class.	Nelson's Readers.	Christian Literature Society's Readers.	Macmillan's Readers.	Tipping's Direct Method Books.	Longmans' series.
III	Primer .. ..	Primers, nos. I and II, Indian Readers.	King Primer ..	A first book of English and 3rd Standard Reader	1st year Teachers' book. For teachers' use only.
IV	Book I .. ..	Reader no. I ..	New English Reader I.	4th standard ..	1st year reading book.
V	Book II .. ..	Reader no. II ..	New English Reader II.	5th standard, omitting lessons 8, 17, 25, and 31.	2nd year reading book.
VI	Book III .. ..	Reader no. III ..	New English Reader III.	..	3rd year reading book.
VII	.. ..	..	New English Reader IV.	..	4th year reading book.
VIII	.. ..	..	New English Reader IVB.	..	..

\* Questions will not be set from a prescribed reader for the High School Scholarship Examination.

The English copy-books to be used are—

Class.	Series.			
	Longmans, Green & Co.		Gulab Singh & Sons.	Blackie & Sons (Vera Foster's)
	Upright.	Semi-Upright.		
III and IV .. ..	1, 2, 3	2, 3, 4	1, 2, 3, 4	1, 2
V .. ..	4, 5	6	5, 6	3, 4
VI .. ..	6, 7, 8	7	7, 9, 10	5, 6
VII and VIII .. ..	10, 11, 12	01 8.	12, 13	7, 8, 9, 10

The books approved for translation exercises are those by—

- (1) Gordon; (2) Stapley; (3) Munshi Dwarka Parshad; (4) Manual of Translation into English for Hindustani students, by E. S. Oakley; (5) Translation Practice in four Parts for Lower and Upper Middle Sections, by B. D. Gordon (for use of the Middle Section); (6) Exercise in Translation from Urdu into English, by J. R. Cornah, published by M. Gulab Singh & Sons, Lahore

The following books on English Grammar and Composition are recommended for use:—

- (1) A Primer of English Grammar } Published by the Christian Literature Society
- (2) A Manual of English Grammar } for India, Madras.
- (3) The Middle School English Grammar, Parts I and II (Standards V and VI) by L. Tipping, Macmillan & Co.
- (4) Longmans' Junior School Grammar for India, by D. Salmon and A. J. C. Oakley.
- (5) A Simple Grammar of Modern English, Longmans, Green & Co.
- (6) The Suggestive Composition Book, Parts 2, 3 and 4 (Blackie & Sons).
- (7) Lessons in English Composition, Books 1—3 by J. C. Nesfield, Macmillan & Co.
- (8) A Junior Course of English Composition, S. K. Nath and G. C. Nath, Calcutta.
- (9) Progressive Practice-Book in "Direct" English Composition—Oral and Written—by P. Wren (K. & J. Cooper, Bombay).
- (10) Picture Composition, Pupils' Book, by J. N. Fraser (K. & J. Cooper, Bombay).
- (11) An Easy Course of English Grammar and Composition, K. & J. Cooper, Bombay (for use in the High Section).

## AIMS AND METHOD IN THE TEACHING OF MATHEMATICS.

*Reasons for teaching Mathematics.*—We teach Mathematics with a two-fold aim. On the one hand we use the subject as a means of developing the intelligence of the pupil; on the other hand we endeavour to make him skilful in such operations with numbers as are likely to be of practical use. Thus the teacher will endeavour to make clear to pupils the reasons which underlie processes and will also train them to gain the power of rapid, accurate, and confident calculation.

*Neatness and arrangement in written work.*—Great stress should be laid on neatness and care in arrangement. Errors in working can often be traced to slovenly arrangement or badly-formed figures. Pupils should be trained to arrange their work in a series of logical steps for each of which a reason can be given. Particular care should be taken in the early stages that units are not omitted, and that every line is a correct statement.

*Oral work.*—All new processes should be introduced and fixed in the mind by means of examples worked on the blackboard. These should involve only small numbers, so that calculations may be performed without resort to pen and paper. Even after a new rule has been established "Mental Arithmetic" should be a feature of most lessons. A few minutes given daily to the oral solution of problems is a valuable means of revising past works and in training pupils to gain rapidity and confidence in calculation. Up to class IV the teaching should be largely oral. In Geometry definitions must be first explained and understood and then learnt by heart.

*Concrete illustrations.*—Wherever possible concrete aid should be used. In the earliest stages the various operations should be taught by means of illustrations with objects which can be easily procured, such as headless matches, nuts, etc. Tables of weights and measures should be visualized by measurements of lengths, areas, volumes, capacities, and weights; pupils should be practised in estimating the weights of common objects, the heights of tables, rooms and buildings, the areas of surfaces, the capacity of vessels and the distances between fixed points in the class-room and play-ground and should verify their estimates by experiments. At a later stage in the teaching of vulgar fractions and decimals the foot rule graduated in inches and twelfths of an inch and in centimetres and millimetres should be in constant use. The metric measures of length, area, volume, weight, and capacity should be learnt thoroughly; the class should be given exercises in measurement of length in the metric system, and allowed to handle metric measures of weight and capacity if available.

*Nature of examples.*—Once a rule has been learnt it should be applied to varied examples both oral and written. Examples should, as far as possible, relate to matters within the experience of pupils and the numbers employed should be such as are likely to occur in practice; thus although pupils should be made familiar with operations in British money, prices in problems should as a rule be given in Indian money. Operations with large numbers should be the exception, and when they are employed they should be taken from real life, census returns, statistics of trade, returns of revenue, etc. In multiplication and division of decimals the methods adopted in the early stages should be such as can be employed in contracted work at a later stage; thus the methods given in Hall, Stevens and Sims' School Arithmetic for Indian schools are preferable to the older methods. To test the grasp of a new process and to connect it with what has been already learnt, it should be applied to problems which involve also the application of previous rules, thus no preceding rule should be allowed to drop out of sight.

*Correlation.*—The teacher should take every opportunity to break down the partitions which usually separate the three branches of elementary Mathematics. Thus even at an early stage in Arithmetic "rules" should be expressed symbolically in the language of Algebra, thus the rule for the addition and subtraction of fractions may be stated in a general form as follows:—

$$\frac{a}{b} + \frac{c}{d} = \frac{ad+bc}{bd}$$

Algebraical methods should be freely employed in the solution of arithmetical questions, and the graphs should be used to solve questions both in Algebra and Arithmetic.

*Revision.*—In no subject is revision more necessary than in Mathematics. As the mental machinery of pupils becomes somewhat rusty from lying up for the vacation, such revision is especially necessary at the commencement of each session.

*Text-book.*—Even the best text-book cannot take the place of the teacher. He has to expand the theory, which is usually a brief summary ; he has also to provide the concrete illustration, to break down the artificial barriers which separate topic from topic and to supplement the lists of examples, by supplying oral questions and by inventing problems which are likely to bring the subject into close touch with the interests of the pupils.

## SYLLABUS OF THE COURSES IN MATHEMATICS.

### PREPARATORY SECTION.

#### CLASS A.

*Arithmetic.*—Notation and analysis of numbers in connection with concrete objects, as far as 50, and the writing of those numbers. Oral addition of any two numbers whose sum does not exceed 50, and subtraction of any two numbers neither of which exceeds 50. Simple oral problems in addition and subtraction. Construction and memorising of tables up to  $5 \times 10$ .

#### CLASS B.

*Arithmetic.—Revision.*—Notation of numbers as far as 1,000. Analysis of numbers as far as 100. Simple addition of numbers, the answer not to exceed 1,000. Simple subtraction of any two numbers, neither of which exceeds 1,000. Construction and memorising of tables up to  $10 \times 10$ . Simple multiplication by numbers not greater than 5. Simple oral and written problems in the above.

### LOWER PRIMARY SECTION.

#### CLASS I.

*Arithmetic.—Revision.*—Notation extended to one lakh (1,00,000). The four simple rules with no term or answer exceeding one lakh. Construction and memorising of multiplication tables up to  $10 \times 12$ . Addition and subtraction in Indian money with no term or answer exceeding Rs. 1,000. Simple oral and written problems in the above.

#### CLASS II.

*Arithmetic.—Revision.*—Further extension of notation to crores and millions. The four compound rules and reductions in Indian money and weights, in common use in the United Provinces, with miscellaneous examples. Simple oral and written problems in the above.

### UPPER PRIMARY SECTION.

#### CLASS III.

*Arithmetic.—Revision* of the previous work with special attention to (i) the best methods of working ; (ii) application to oral and written problems relating to things within the experience of the pupils ; (iii) rapidity in oral work ; and (iv) neatness and orderly arrangement in written work. The four compound rules and reductions in British money. Factors and prime numbers.

#### CLASS IV.

*Arithmetic.—Revision.*—G. C. M. or H. C. F. by factors. L. C. M. The four compound rules and reductions in British weights, and measures of length, time and capacity in common use ; instruction to be as realistic as possible. The four simple rules in vulgar fractions with easy examples. Oral and written problems in the above.

### LOWER MIDDLE SECTION.

#### CLASS V.

*Arithmetic.—Revision.*—More difficult examples in vulgar fractions. Vulgar fractions of concrete quantities. Practice, metric measures of length, weight, and capacity ; instruction to be as realistic as possible. Simple calculations in the four simple rules with decimal fractions (excluding recurring decimals). Conversion of vulgar fractions into decimal fractions to a given number of places, and vice versa (excluding recurring decimals). Oral and written problems in the above.

#### CLASS VI.

*Arithmetic.—Revision.*—Simple percentages. More difficult examples with decimal fractions (excluding recurring decimals). Decimal fractions of concrete quantities. The unitary method. Simple interest. Oral and written problems in the above.

*Geometry.*—Drawing and measurement of straight lines and angles ; parallel straight lines ; angles of a triangle ; construction of triangles and parallelograms.

## UPPER MIDDLE SECTION.

## CLASSES VII AND VIII.

*Arithmetic.—Revision.*—Measurement of the area of a rectangle and the volume of a rectangular solid in the British and Metric systems. Land measures in use in the United Provinces. Square root by factors. Simple and compound proportion. Proportional parts. Number percentages. Profit and loss. Oral and written problems in the above.

*Algebra.*—Symbolical expression. Substitution. Brackets. Addition. Subtraction. Easy multiplication. Easy division. Simple equations with one unknown quantity. Graphs of straight lines. Plotting of statistics. Simultaneous equations involving two unknown quantities (both equations linear). Graphical solution of simultaneous linear equations. Simple problems involving the above.

*Geometry*—As in the text book prescribed.

## TEXT-BOOKS.

The books recommended for use are—

## ARITHMETIC.

*For classes VII and upwards.*

- (1) A School Arithmetic for Indian Schools by Hall, Stevens, and Sims (Macmillan).
- (2) Longmans' Senior Arithmetic [Indian edition by Dexter, Garlick, and Pollard (Longmans, Green & Co.)].
- (3) A New Arithmetic for Indian Schools by Workman and Sime (Gulab Singh & Sons).
- (4) Modern Arithmetic by Banbury.

*For classes below VII.*

*Classes I and II.*—Vernacular School Arithmetic for classes I and II (Urdu or Hindi), published by Macmillan & Co.

*Classes III and IV.*—Anglo-Vernacular School Arithmetic for classes III and IV (Urdu or Hindi), published by the Newal Kishore Press, Lucknow.

*Classes V and VI.*—Anglo Vernacular School Arithmetic for classes V and VI (Urdu or Hindi), published by the Newal Kishore Press, Lucknow.

## ALGEBRA

Baker and Bourne's Shorter Algebra or Hall's School Algebra, Part I, for Indian Schools (Macmillan & Co.).

## GEOMETRY.

*For class VI.*

Pierpoint's Elements of Geometry, Part I, experimental section, Urdu and Hindi editions (Indian Press, Allahabad),

or

Hall and Stevens' Lessons in Experimental and Practical Geometry.

*For classes VII and VIII.*

Pierpoint's Elements of Geometry in Theory and Practice (The Indian Middle School edition), published by Longmans, Green & Co.,

or

Hall and Stevens' School Geometry, Parts I and II.

### AIMS AND METHOD IN TEACHING HISTORY.

*Class VI.*—Whether the pupils have copies of the text-book or not is immaterial. If they have, the greatest care must be taken that the lesson does not develop into a reading lesson. Spontaneous narrative alone will secure the desired ends. As the story proceeds, the teacher should question the class to see whether they follow the course of events, and should encourage free communication of the feelings which the narrative produces in the minds of the pupils. The pupils may at intervals be required to write out a story which they have heard, in their own words. No notes should be taken, for these will be memorised and reproduced. What is chiefly required of the teacher is a power of vivid narrative and of feeling the emotions which he strives to arouse. There should not be a written examination in this class, but occasionally the Head Master or a senior teacher should test the class as a whole by an oral examination.

*Classes VII and VIII.*—However simple the book may be there is an ever-present danger that the pupils will derive incorrect ideas from it. The lessons therefore should be read in class in sections of suitable length, the teacher confining his explanations of the text to making the meaning clear. After the reading he should, partly by narrative and partly by question, build up a connected account of the events described. During this he should, as far as the means at his disposal allow, bring to the aid of the text pictures, sketch maps, time charts, reproductions of coins, and other historical objects. The aim at this stage is to connect the main facts as a whole and to develop a sense of time and of cause and effect. He should not fail to seize any chance of showing how one event was the natural outcome of others. The treatment should be largely biographical. New ground should as a rule be broken with the help of the teacher; the pupils however should independently learn at home what has been previously taught in class. It will be found useful to set the class questions to answer in writing at fairly frequent intervals. This makes for clarity of ideas and expression.

*Classes IX and X.*—The treatment does not differ radically from that in classes VII and VIII, but the pupils should usually read each day's lesson before it is taken up in class. The teacher should emphasize the sequence of events. It is often found effective at this stage to follow a topical order in preference to a chronological one, as this consolidates and systematizes the pupil's knowledge better.

### SYLLABUS OF THE COURSES IN HISTORY.

#### LOWER MIDDLE SECTION.

##### CLASS VI.

Easy Stories from Indian History in the Vernacular (one period a week).

#### UPPER MIDDLE SECTION.

##### CLASSES VII AND VIII.

*History.*—*Class VII.*—Outline of Indian History up to the end of the Moghul Empire.

*Class VIII.*—Outline of Indian History from the decline of the Moghul Empire to 1858.

#### TEXT-BOOKS.

*Class VI.*—Allen's Heroes of Indian History in Urdu (revised edition) or Hindi, Longmans, Green & Co.,

or

Marsden's Stories from Indian History in Urdu or Hindi, Macmillan & Co.

*Classes VII and VIII.*—Urdu History of India, Parts I and II, by E. Marsden and Jiya Ram, or Hindi History of India, Parts I and II, by E. Marsden and Sita Ram, Macmillan & Co.,

### AIMS AND METHOD IN TEACHING GEOGRAPHY.

Geography is on the one hand a study of the configuration of the Earth—its continents, seas, mountains, forests, rivers, etc., on the other hand it is a study of the needs of man and how he makes provision for these needs. Thus we only partly teach geography if we limit our teaching to a study of physical facts; the chief value of these facts is that they help us to understand how men live and work in different parts of the earth.

In studying a country consider it first as a whole—its general build, the long and short slopes of the land, the way in which rivers run, where there are large fertile tracts, where desert and where forests. Then in more detail; the great mountain ranges, the chief river basins, the great plains, the climate, the population and occupations, the political divisions, the trade routes and towns. For each of these topics a separate map should be drawn on the blackboard and by the pupils.

The teaching should not be confined to a mere list of names. Facts are of value only if brought into relation with other facts. The teacher should point out why here there is a forest, there a desert, how the nature of the coast has promoted intercourse with other countries, how mountains have prevented intercourse, how rivers have promoted trade and density of population, what natural resources have given rise to particular industries, how the climate has influenced the life and work of the people. Facts are needed and must be learnt; but a fact is remembered with greater ease if it is understood, and facts are of use only if we can connect them with causes and results.

In giving facts to the class something more than a bare recital is needed. No subject makes greater demands on the descriptive powers of the teacher. He should endeavour to carry the pupils in imagination to the country he is describing; to do this he should, as far as possible, supplement vivid description by pictures, photographs, picture postcards, and, if suitable arrangements can be made, lantern slides.

*Sketch map by pupils.*—The pupil's note-book should contain a series of sketch maps for each country, each map illustrating a particular feature. Thus, one map should contain the mountain system, a second map the river system, a third the distribution of rainfall, and so on. Almost every topic discussed can be illustrated by a sketch map and benefits thereby. In order to draw these sketch maps it is not necessary for pupils to learn to draw the outline by heart, except perhaps in the case of India, whose outline is easily remembered. The teacher should supply blank outline maps (cyclostyled or printed), and these should be used to illustrate various topics. Many maps, each illustrating a single feature, are preferable to one elaborate map crowded with details.

*Blackboard map by the teacher.*—These should be built up as the lesson proceeds; each map should contain the elements essential to the lesson and no others. Coloured chalks are a valuable help; they make the various features stand out clearly from one another, and if the same colour be used consistently to represent the same features e.g., red for high land, blue for rivers, yellow for towns, etc., much time will be gained. Outline maps drawn on blackboard cloth are convenient as the basis for these maps; they may be procured from Messrs. G. Phillip and Son, through Messrs. Longmans, Green & Co., Bombay.

*Wall maps.*—The school should in addition possess for each continent (1) a photographed relief map, and (2) a plain orographical map, preferably without names. It is important that the map chosen should contain only essentials.

The teacher should make his own maps to illustrate special points, e.g., vegetation, density of population, rainfall, etc.

*Atlases.*—Each pupil should possess an atlas. The atlas should be brought regularly to the geography class, and should be constantly referred to during the course of the lesson.

*Books and apparatus.*—The teachers should consult the "Guide to Geographical Books and Appliances" published for the Geographical Association, by G. Phillip and Son (Messrs. Longmans, Green & Co., Bombay).

### SYLLABUS OF THE COURSES IN GEOGRAPHY.

#### UPPER PRIMARY SECTION.

##### CLASS III.

*General Geography.*—Measurement of distances; direction; North, South, East, West; North-East, North-West, South-East, South-West; drawing of North and South line in

play-ground by means of shadow cast by vertical stick ; meaning of scale ; plan of class-room, plan of school and play-ground ; explanation of the map of the district ; the meaning of a map to be explained as far as possible by excursions in the neighbourhood.

#### CLASS IV.

*General Geography.*—Revision of the work of Class III.

*India.*—Further explanation of the meaning of a map, by reference to a comparison of the map of India with a relief model of India as regards the following points :—The Himalayas, the Deccan Plateau, the Eastern and Western Ghats, the coast strips and the towns, Calcutta, Madras, Bombay, Delhi, Allahabad, Lucknow, Cawnpore.

Description of Northern India with reference to the nature of the country and the climate.

The following maps to be drawn by the pupils :—

(1) Map of India, showing the Himalayas, the Sulaiman Mountains, the Vindhya, the Indus with the five rivers of the Punjab, the Ganges with its main tributaries, the position of the United Provinces.

(2) Map of the United Provinces, showing divisions and their head quarters.

*The World.*—Shape of the Earth, its rotation, light and darkness, the poles and equator, land and water, the name and relative position on the globe of continents and oceans.

Where arrangements can be made oral lessons should be given describing typical scenery or life of man in various parts of the world. They should be illustrated by pictures, lantern slides, etc.

In preparing these lessons, the teacher should consult the following books :—World Pictures by J. B. Reynolds (Black), Man in Many Lands by Lyde (Black), and The Peeps at Many Lands Series (Black).

*Physical Geography.*—Explanation of the following terms by reference to the globe and map :—Continent, ocean, gulf, bay, lake, strait, cape, peninsula, isthmus, mountain, island. Description of the sea.

#### LOWER MIDDLE SECTION.

##### CLASS V.

*General Geography.*—Revision of previous work.

*India.*—Position, outline, nature of coasts, important harbours and neighbouring islands, the chief physical features, climate, production, provinces, chief Native States, and chief towns.

The following maps should be drawn :—

(1) Outline map with main harbours and neighbouring islands.

(2) Outline map with chief mountains and rivers.

(3) Outline map with provinces and principal Native States.

(4) Outline map with chief towns.

(5) Complete map including all the above.

*British Empire.*—Position of the following :—British Isles, Canada, Australia, New Zealand, South Africa, with very brief description of climate and nature of the country. As far as possible lessons should be illustrated by pictures.

*World.*—Where arrangements can be made oral descriptive lessons on the lines prescribed for Class IV.

*Physical Geography.*—Simple explanation of clouds and rain, the effect of mountains in producing rain, the monsoons, the formation of a delta.

##### CLASS VI.

*General Geography.*—Revision of previous work.

*Asia.*—Coast line, great mountain ranges and tablelands, great plains, chief rivers, countries, neighbouring islands, chief towns, people, climate, products.

*World.*—Where arrangements can be made oral descriptive lessons on the lines prescribed for Class IV.

*Physical Geography.*—Surface of the earth, volcanoes and earthquakes, the zones, latitude and longitude.

---

UPPER MIDDLE SECTION.

## CLASSES VII AND VIII.

*General Geography.*—Revision of previous work.

Europe, America, Africa and Australia : to be treated in the same way as Asia in Class VI.

*Physical Geography.*—Seasons, solar system, waves, tides and currents.

**TEXT-BOOKS.**

## UPPER MIDDLE SECTION.

**Geography.**

*Classes IV, V and VI.*—Anglo-Vernacular School Geography for Classes IV, V and VI (Urdu or Hindi), published by Longmans, Green & Co.

*Classes VII and VIII.*—Anglo-Vernacular School Geography for Classes VII and VIII (Urdu or Hindi), published by Longmans, Green & Co.

**SYLLABUS OF THE COURSES IN VERNACULAR (URDU, HINDI OR BENGALI\*).****PREPARATORY SECTION.**

*Class A—Reading.*—To read correctly words and easy sentences from a primer.

*Writing.*—To copy characters and easy words from a primer. Special *takhtis* with letters and figures in indelible ink are recommended for use.

*Class B—Reading.*—To read sentences at sight from the text-book in one form of the vernacular and to know the meaning of words.

*Writing.*—To copy sentences from the text-book, in Urdu, Nagri or Bengali\* character. Special *takhtis* with letters and figures in indelible ink are recommended for use.

**LOWER PRIMARY SECTION.****CLASS I.**

*Reading.*—To read accurately at sight from the text-book in one form of the vernacular, and to explain the meaning of words and sentences.

*Writing.*—To copy and to write sentences to dictation from the text-book. Special *takhtis* with letters and figures in indelible ink are recommended for use. Copy-books to be shown.

**CLASS II.**

*Reading.*—To read accurately at sight from the text-book in one form of the vernacular, and to explain the meaning of words, sentences and paragraphs; to turn verse into prose.

*Writing.*—To write sentences to dictation from the text-book, in Urdu, Nagri or Bengali\* character. Copy-books to be shown.

**UPPER PRIMARY SECTION.****CLASS III.**

*Reading.*—To read accurately at sight from the text-book in one form of the vernacular, and to explain the meaning of words, sentences and paragraphs. To turn verse into prose order.

*Writing.*—To write passages to dictation from the text-book. Copy-books to be shown.

*Grammar.*—To know the parts of speech.

**CLASS IV.**

*Reading.*—To read at sight from the text-book in one form of the vernacular, and to explain words, allusions and sentences.

*Writing.*—To write passages to dictation from a book of equal difficulty with the text-book, or an original letter on some ordinary topic, in Urdu, Nagri or Bengali\* character. Copy-books to be shown.

*Grammar.*—Etymology.

**LOWER MIDDLE SECTION.****CLASS V.**

The literary reader prescribed. Composition of letters in current idiomatic style, with the proper forms of courtesy.

*Grammar.*—Parts of speech and etymology of words.

**CLASS VI.**

The literary reader prescribed. Composition and grammar as in Class V.

**UPPER MIDDLE SECTION.****CLASSES VII AND VIII.**

The literary reader and the grammar prescribed. Original letter-writing.

**TEXT-BOOKS.****PRIMERS AND READERS.****PREPARATORY CLASS A.**

*Urdu.*—Urdu Primer, by Khan Bahadur Mirza Habib Husain, B.A., or Urdu ka Naya Qaida (revised edition), published by the Indian Press, Allahabad.

*Hindi.*—Hindi Primer, published by the Indian Press, Allahabad, or Hindi Kindergarten Primer (revised edition), by Babu Brijbasi Lal, B.A., or Illustrated Hindi Primer, by Pandit Girdhar Lal Pacholy.

\**Bengali.*—Barna Parichaya, Part I, by Ramanand Chattopadhyaya.

\*NOTE.—Bengali may be taught in such schools only as are recognized by the Department for the purpose of teaching the subject.

## PREPARATORY CLASS B.

*Urdu.*—Urdu Reader for Preparatory Class B of Vernacular Schools, published by the Newal Kishore Press, Lucknow.

*Hindi.*—Hindi Reader for Preparatory Class B of Vernacular Schools, published by the Newal Kishore Press, Lucknow.

\**Bengali.*—Barna Parichaya, Part I, by Ramanand Chattopadhyaya.

## CLASS I.

*Urdu.*—Urdu Reader for Class I of Vernacular Schools, published by the Newal Kishore Press, Lucknow.

*Hindi.*—Hindi Reader for Class I of Vernacular Schools, published by the Newal Kishore Press, Lucknow.

\**Bengali.*—Barna Parichaya, Part II, by Ramanad Chattopadhyaya.

## CLASS II.

*Urdu.*—Urdu Reader for Class II of Vernacular Schools, published by the Newal Kishore Press, Lucknow.

*Hindi.*—Hindi Reader for Class II of Vernacular Schools, published by the Newal Kishore Press, Lucknow.

\**Bengali.*—Sishu Siksha, Part III, by Madan Mohan Tarkalankar.

## CLASS III.

†*Urdu.*—Urdu Reader for Classes III and IV of Vernacular Schools, published by the Newal Kishore Press, Lucknow, and Sawad-i-Urdu by Khan Sahib Maulvi Muhammad Ismail, published by the Newal Kishore Press, Lucknow.

†*Hindi.*—Hindi Reader for Classes III and IV of Vernacular Schools, published by the Newal Kishore Press, Lucknow, and Hindi Praveshika (revised edition of 1918), published by the Indian Press, Allahabad.

\**Bengali.*—Kathamala by Ishwar Chandra Vidyasagar (Prose).  
Padyamala, Part I, by Manmohan Basu (Poetry).

## CLASS IV.

†*Urdu.*—Urdu Reader for Classes III and IV of Vernacular Schools, published by the Newal Kishore Press, Lucknow, and Sawad-i-Urdu by Khan Sahib Maulvi Muhammad Ismail, published by the Newal Kishore Press, Lucknow.

†*Hindi.*—Hindi Reader for Classes III and IV of Vernacular Schools, published by the Newal Kishore Press, Lucknow, and Hindi Praveshika (revised edition of 1918), published by the Indian Press, Allahabad.

\**Bengali.*—Akhyani Manjari, Part I, by Ishwar Chandra Vidyasagar (Prose).  
Padya Patha, Part I, by Jada Gopal Chattopadhyaya (Poetry).

For rapid reading:—

Chheleder Ramayan, by Upendra Kishore Rai Chaudhri.

## CLASS V.

*Urdu.*—Ahsanul-Intikhab, by Maulvi Muhammad Abdul Jalil, published by E. J. Lazarus & Co., Benares (prose—up to the end of the lesson “Dehatki Zindgi.” and poetry—up to the end of the ghazal by Asir), or Kumuk-i-Urdu by Khan Sahib Muhammad Ismail, published by the Newal Kishore Press, Lucknow (prose—up to the end of the lesson “Safar Nama” and poetry—up to the end of the ghazal by Siraj Uddin Bahadur Shah Zafar.)

*Hindi.*—Lower Middle Hindi Reader (revised edition), published by the Indian Press, Allahabad (prose—up to the end of the lesson “Sharirik Shram aur Bhojan”, and poetry—up to the end of the dohas by Vrinda Kavi).

\**Bengali.*—*Prose and Poetry.*—Kalyanmala by Rasik Chandra Basu.

*Grammar.*—Bangala Sishu Vyakaran by Kali Prasanna Vidyaratna.

\* Bengali may be taught in such schools only as are recognized by the Department for the purpose of teaching the subject.

† The literary readers (Sawad-i-Urdu and Hindi Praveshika) prescribed for use in Classes III and IV should not be commenced until the scholar has made sufficient progress in the common language to enable him to study the literary reader with advantage.

For rapid reading :—

Chheleder Mahabharat (first half) by Upendra Kishore Rai Chaudhri.

#### CLASS VI.

*Urdu*.—Ahsanul-Intikhab by Maulvi Muhammad Abul Jalil, published by E. J. Lazarus & Co., Benares (prose—from the lesson “Maujudat Talim-O-Tarbiyat ki Shahih” to the end of the prose portion, and poetry—from the qasida by Wasti to the end of the poetry portion), or Kumuk-i-Urdu by Khan Sahib Muhammad Ismail, published by the Newal Kishore Press, Lucknow, (prose—from the lesson “Hamdardi” to the end of the prose portion, and poetry—from the ghazal by Mirza Asad Ullah Khan Ghalib to the end of the poetry portion).

*Hindi*.—Lower Middle Hindi Reader (revised edition), published by the Indian Press, Allahabad (prose—from the lesson “Hasya ka Dushparinam” to the end of the prose portion, and poetry—from the poem “Varsha Ritu ka Varnan” to the end of the poetry portion).

\**Bengali*.—*Prose and Poetry*.—Sahitya Patha, Part II, by Jaggeshar Sharma.

*Grammar*.—Bangala Sishu Vyakaran, by Kali Parsanna Vidyaratna.

For rapid reading :—

Chheleder Mahabharat (second half) by Upendra Kishore Rai Chaudhri.

#### CLASSES VII AND VIII.

*Urdu*.—Safina i-Urdu by Khan Sahib Maulvi Muhammad Ismail (Newal Kishore Press, Lucknow).

*Hindi*.—Sangrah Shiromani (revised and reduced edition), published by the Indian Press, Allahabad.

\**Bengali*.—*Prose*.—Adarsha Sahitya Sangrah by Pramatha Nath Sen (Sen Brothers & Co., Calcutta).

*Poetry*.—Padya Patha, Part III, by Jadu Gopal Chattopadhyaya.

*Grammar*.—Bangala Sishu Vyakaran by Kali Prasanna Vidyaratna.

For rapid reading :—

Banger Ratnamala by Kali Kristo Bhattacharji. (For Class VII.)

Sadalap by Rai Bahadur Makund Deva Mukharji. (For Class VIII.)

#### Grammars.

*Urdu*.—Risala-i-Qawaid-i-Urdu, Parts I and II, published by the Mission Press, Allahabad.

*Hindi*.—Bhasha Vyakaran, by Pandit Chandra Mauli Sukul, M.A., I.T., published by the Indian Press, Allahabad. Hindi Middle Vyakaran, published by the Newal Kishore Press, Lucknow.

### AIMS AND METHOD IN TEACHING DRAWING.

*Method.*—Teachers of drawing should bear in mind that it is far more important to train the eye and develop the suppleness of the hand than to produce mechanically accurate copies of drawings. They should therefore see that pencils of suitable length are used and kept properly pointed. They should forbid the shifting and turning of the paper in the process of drawing and insist on the adaptation of the hand to the lines required. They must accept responsibility for seeing that scholars do a satisfactory amount of work, and while on the one hand hasty and untidy work is to be checked, on the other hand anything of a laboriously minute and mechanical nature is to be avoided.

In model drawing the importance of rapidity as well as accuracy should be emphasized. The principles of perspective must be thoroughly explained and ample demonstration and personal correction must occupy each lesson. The surface on which the object stands should always be indicated, and the drawing should be made as large as the paper will allow.

It must be borne in mind that geometrical, perspective and model drawing—though related—a distinct exercises; while the former requires the application of geometrical knowledge, the latter fails in its object unless it strengthens the ability to draw simple objects freely, in good line, and correct relationship of position.

As regards geometrical drawing, neatness, absolute accuracy and facility in using a few instruments are the ends to be kept in view.

All diagrams should be lettered and made of large size. Both ink and pencil should be used, alternately or in combination. Each problem must be carefully “taught” by the teacher and not merely copied by the boys on the larger scale from the text-book pages.

In freehand and model drawing no mechanical aids should be allowed.

### SYLLABUS OF THE COURSES IN DRAWING.

#### PREPARATORY SECTION.

##### CLASS A.

Drawing of straight lines, squares and oblongs.

##### CLASS B.

Drawing of curved lines, circles and figures like circles, bounded by curved lines (or slate). Drawing to be taught on the blackboard; no books to be prescribed.

LOWER PRIMARY, UPPER PRIMARY, LOWER MIDDLE AND UPPER MIDDLE SECTIONS.

As in the drawing books prescribed.

#### TEXT-BOOKS.

##### CLASS I.

As in Macmillan's Official Drawing book no. 1, or as in Nelson's Graduated Drawing book no. 1, or as in Indian Drawing books for Vernacular Schools, Book I, or as in Banbery's Scholars' Drawing book no. I, in Urdu or Hindi, or as in Indian Drawing Copy-slips for Vernacular Schools, no. 3, published by the School Book and Apparatus Dépôt, Lucknow (slates to be used during the first half year, then paper).

##### CLASS II.

As in Macmillan's Official Drawing book no. 2, or as in Nelson's Graduated Drawing book no. 2, or as in Indian Drawing books for Vernacular Schools, Book II, or as in Banbery's Scholars' Drawing book no. 2, in Urdu or Hindi, or as in Indian Drawing Copy-slips for Vernacular Schools, no. 4, published by the School Book and Apparatus Dépôt, Lucknow.

##### CLASS III.

As in Macmillan's Official Drawing book no. 3, or as in Nelson's Graduated Drawing book no. 3, or as in Banbery's Scholars' Drawing book no. 3.

##### CLASS IV.

As in Macmillan's Official Drawing book no. 4, or as in Nelson's Graduated Drawing book no. 4, or as in Banbery's Scholars' Drawing book no. 4.

##### CLASS V.

As in Macmillan's Official Drawing book no. 5, or as in Nelson's Graduated Drawing book no. 5, or as in Banbery's Scholars' Drawing book no. 5.

##### CLASS VI.

Macmillan's Oriental School Drawing book, Part I, or Nelson's Graduated Drawing book no. 6 or 7, or Banbery's Scholars' Drawing book no. 6.

## CLASSES VII AND VIII.

*Free-hand Drawing.*—Macmillan's Oriental School Drawing-books, Parts II, III and IV (the designs in Part IV to be copied in outline only), or Nelson's Graduated Drawing books nos. 9 and 11.

N.B.—Teachers of limited experience in the teaching of drawing are recommended to use "Longmans' Complete Drawing course, Part I," by I. H. Morris, Longmans, Green & Co. Teachers of drawing in schools where Banbery's Scholars' Drawing Books are used are recommended to use "Teachers' Drawing Manual" in English, Urdu or Hindi, by H. Banbery, Indian Press, Allahabad.

## SYLLABUS OF THE COURSES IN BRUSH-WORK.

## PREPARATORY SECTION.

## CLASS A.

Free-arm drawing on the blackboard or on slates, of straight lines, squares and oblongs, with coloured chalks—the squares and oblongs being filled up with a mass of colour.

## CLASS B.

Free-arm drawing as in the preparatory section A, and free-arm drawing on the blackboard or on slates, of curved lines, circles and figures like circles, bounded by curved lines with coloured chalks—all figures being filled up with a mass of colour on the same system as the brush-work.

## LOWER PRIMARY SECTION.

## CLASS I.

Some of the elements and their combinations in brush-work which compose simple flowers and leaves—those known technically as blobs, lines and spots.

## CLASS II.

Further brush-work forms, lily-leaves and thick curves.

## UPPER PRIMARY SECTION.

## CLASS III.

Petals, and right and left petal curves, with combinations of all the past work.

## CLASS IV.

Various combinations of past forms, making leaves, etc., and well-known flowers.

## LOWER MIDDLE SECTION.

## CLASS V.

Brush-work of ordinary Indian flowers.

## CLASS VI.

Further forms, insects, birds, flowers, etc.

NOTE.—In Brush-work the following are recommended for teachers' use:—

Longmans' Charts of Colour, Drawing and Design in three series by Cecil L. Purns, Principal, School of Art, Bombay, together with a Teachers' Hand-book explaining the charts.

*Elementary series.*—Ten sheets containing alternate lessons in colour and geometrical drawing.

*Intermediate series.*—Ten coloured copies of leaf-forms with a sheet of geometrical problems and exercises showing their connection with geometrical patterns.

*Advanced series.*—Ten large coloured free-hand copies of flowers, animals or other objects seen in nature, each accompanied by a design based upon a flower, illustrating the connection between nature and design.

### AIMS AND METHOD IN THE TEACHING OF SCIENCE.

In framing the courses for Classes VII and VIII the Department has kept in view on the one hand the limitations of poorly-equipped schools, in which there are few facilities for practical work, and, on the other hand, the ambition of the better-equipped schools to commence laboratory work as early as possible. The courses for Classes VII and VIII may be worked through entirely in an ordinary class-room; but it is desirable that, where facilities exist, even in these classes there should be some individual practical work by pupils. Where there are no facilities for practical work, as many as possible of the experiments (e.g., on length and area) should be performed by pupils at ordinary school desks, the remainder being done at the demonstration table by the teacher, assisted by pupils chosen from the class. In Classes IX and X, in addition to class work and demonstrations, all pupils should receive a regular course of practical instruction in the laboratory.

The subject-matter of the courses has been divided into different topics: "length," "area," "volume," "heat," "chemistry," etc., and each class advances its knowledge under each of these heads as far as possible; the main factors which determine the amount which can be attempted in a class are the knowledge of Mathematics possessed by the class, and the skill in experimental work which may be expected from it.

Although the subject has been thus divided into several topics, it does not follow that these should be taught as separate "subjects" in water-tight compartments. In teaching under any particular head the teacher should freely refer to what has been taught under other heads, when by so doing he can bring items of knowledge into close relation. In particular, it is undesirable and unnecessary to draw fine distinctions between Physics and Chemistry, and there is no need of separate laboratories for these two branches of Elementary Science.

The best laboratory for elementary work is the simplest, and any paraphernalia which tend to obscure the relation of cause and effect should be scrupulously avoided. The Department does not recommend elaborate and expensive fittings; on the contrary, teachers are encouraged to utilize the simplest means by which the subject can be adequately studied.

While great importance should be attached to experimental work, it must not be forgotten that a principle is not thoroughly known unless it can be applied. The teacher should therefore invariably test the pupil's grasp of general principles, laws and formulae, by applying them, wherever possible, to the solution of examples involving calculation.

Thus each pupil in Science will have two note-books: one in which he enters a record of all experiments performed by him, and another in which he writes accounts of demonstration experiments performed by the teacher, and works numerical examples.

Diagrams of apparatus should be sectional elevations, not perspective drawings; these sectional sketches must be neatly and accurately drawn with the various parts approximately proportional in size.

Some uniform plan should be followed in entering the results of experiments; the headings, "object of experiment," "apparatus used," "method," "results," and "conclusion" are appropriate. Where possible, observations should be entered in tabular form.

Pupils should not rely on single determinations of quantitative results, whenever possible several should be found and the average calculated. The standard of accuracy should be laid down for each experiment, and each pupil should obtain results within the standard, or should repeat his experiment until he has obtained a satisfactory result. This standard must vary with the nature of the experiment and the apparatus available, and should be laid down by the teacher himself.

### SYLLABUS OF THE COURSES IN SCIENCE.

#### UPPER MIDDLE SECTION.

##### CLASSES VII AND VIII.

*Class VII.*—Measurement of length, area, volume, mass and weight, the balances; density; the three states of matter; heat, expansion of solids, liquids and gases; temperature; the Centigrade thermometer.

**NOTE.**—A course is given in the Appendix which indicates the minimum amount of practical work required to be performed by students and suggests a method of treatment of the syllabus for the guidance of teachers. It should be understood that teachers may substitute other experiments of equal educational value. Practical work should be co-ordinated with the theoretical work, and follow it consecutively as far as possible.

The practical experiment should be performed individually as far as can be arranged.

---

*Class VIII.*—Area and volume (continued).

Heat : Fahrenheit and Centigrade thermometers ; melting and boiling points, conduction, convection and radiation.

Principle of Archimedes ; specific gravity.

Chemistry : common properties of common substances ; solubility ; crystallization ; mixtures and compounds ; physical and chemical change.

Books recommended for use of teachers :—

Exercises in Practical Physics by Gregory and Simmons, Parts I and II (Macmillan & Co.).

Introductory Chemistry for Intermediate Schools by Jones (Macmillan & Co.).

Physics and Chemistry for Middle classes of Secondary Schools in India, in Urdu or Hindi, by E. G. Hill and A. H. Mackenzie (Macmillan & Co.).

## APPENDIX.

**Suggested treatment of the Science syllabus prescribed for Classes VII and VIII.**

Note.—If there are no facilities for individual practical work by pupils, the experiments marked by an asterisk may be omitted, and the remaining experiments may be done by the teacher at the lecture table with the assistance of pupils.

Subject.	Detailed Syllabus.	List of experiments which should be done by the pupils individually so far as possible.
<b>CLASS VII.</b>		
Length	Units in British system and Metric system. Calculations. Measurement of straight line	1. Find the number of c m. in 1 inch.
	Measurement of curved lines. Rule for the length of the circumference of a circle.	2. * Measure the circumference and diameter of a circle and so find the value of "pi."
Area	Units in British system and Metric system. Rule for area of a rectangle. Calculations	3. By squared paper, prove the formula for the area of a rectangle.
	Use of squared paper to find the area of figures other than rectangles. * Formula for the area of a triangle	4. By squared paper, find the area of a triangle and irregular figures.
Volume	Units in British system and Metric system. Rule for the volume of a rectangular solid	5. Use of graduated cylinder to find the volume of large solids and the capacity of large vessels
	Calculations. The graduated cylinder. The Burette	6. Use of Burette to find the volumes of small solids and the capacities of small bottles.
Weight	Distinction between mass and weight. Units in British system and Metric system. The balance.	7. Simple exercises in weighing, e.g., find the number of gm. in one ounce
Density	Definition .. .. .	8. Find the density of solids, being given rectangular pieces.
	Calculations .. .. .	9. * Find the density of common liquids by means of the Burette.
Heat	Expansion of solids, liquids, and gases by heat. Construction of a thermometer. Explanation of Centigrade thermometer.	10. Simple observations with the thermometer, e.g., find the boiling points of water and alcohol.
<b>CLASS VIII.</b>		
Heat	Comparison of Centigrade and Fahrenheit thermometers. Calculations	1. Observation with thermometer, e.g., cooling curve for water.
Area	Formula for the area of a circle. Calculations.	2. By means of squared paper or by weighing find the ratio of the area of a circle to the area of the square on its radius.
Volume	* Formulae for the volume of sphere and cylinder. * Calculations.	3. * By weighing similar cubes, spheres, and cylinders verify the formulae for the volumes of cylinder and sphere. (The experiment may also be done, but less accurately, by the displacement of water.)
Heat	Melting point of ice. Melting point of any solid. Conduction of Heat. Comparison of the conducting powers of common solids. Convection of heat. Radiation of heat.	4. Find the melting point of paraffin wax or of naphthalene.
Hydrostatics	Relative density (or specific gravity). Principle of Archimedes. Determination of Relative Density by Archimedes Principle. Calculations.	Determination by Archimedes Principle of the Relative Density of (a) bodies which float in water, (b) bodies which sink in water.
Chemistry	Definitions and common properties ..	Measurement of relative hardness of different substances.
	Solubility. Influence of temperature on solubility.	To find out which of certain substances are soluble in water, e.g., lime, salt, marble; in alcohol e.g., wax, salt.
	Crystallization, water of crystallization ..	From solution. From molten sulphur.
	Mechanical mixtures .. .. .	Filtration. Separation of sand and salt. Separation of iron and sulphur (magnet). Charcoal and nitre, by solution and filtration.
	Chemical compounds, Physical and Chemical change	Heating salt, sugar, sand, etc. Charcoal and nitre. Iron and sulphur. Iron in solution of copper sulphate.

**SYLLABUS OF THE COURSES IN MANUAL TRAINING.****LOWER MIDDLE SECTION.****CLASSES V AND VI.**

Courses to be proposed for the approval of the Department.

**UPPER MIDDLE SECTION.****CLASSES VII AND VIII.****1. *Woodwork*—**

- (a) A series of models, graduated in respect of the tool manipulations involved, to be made in wood from working drawings (drawn in plan, elevation, and side-view) or from a given pattern in wood; the construction of the models to involve the use of one or more of the following tools :—

Jack Plane, Try Square, Marking Gouge, Marking Knife, Smoothing Plane, Tenon Saw, Bevel, Screw-driver, Firmer Chisel, Hammer, Mallet, Bradawl, Nail Punch, Compass, Firmer Gouge, Gimlet, Trying Plane.

The following joints should be included amongst the models :—

Half-lap, Housing.

- (b) The care and maintenance in good working condition of the above mentioned tools, omitting the sharpening and setting of the tenon saw.

**2. *Drawing*—**

Drawing in plan, elevation and side-view of all models in the course.

NOTE 1.—A scheme drawn up on the above lines is given in the Appendix. Teachers need not keep strictly to the particular models mentioned in the scheme, but if any changes in the models are made these should not involve changes in the new tool manipulations employed.

NOTE 2.—“Manual Training for Secondary Schools in India,” by A. H. Mackenzie, Principal, Training College, Allahabad (published by the Indian Press, Allahabad), is recommended for teachers' use in instructing classes in Manual Training.

## SCHEMES OF OBJECT LESSONS.

## Instructions to teachers.

## OBJECT LESSONS.

*Aims.*—The chief aims of these lessons are to train children to observe accurately and to quicken their interest in the world around them. In the preparatory stage these are the sole aims. In the higher classes the lessons will further be used to train children to reflect on the results of their observations and to reason about things; they will compare and contrast things. The lessons may be used for other purposes; they may add to the children's intelligent knowledge of common things, and be made the basis of instruction in language and drawing. While it is of importance to keep these additional aims in mind, we must regard them as of secondary importance; if we endeavour to impart to children information, however useful it may be, without making them handle and examine things for themselves, we shall fail to make our teaching the means of developing habits of observation, and the information imparted will be superficial and inaccurate.

*Choice of objects.*—Familiar objects, chosen from the locality in which the school lies, are recommended. These are better than unfamiliar objects, as a means of training children to use their eyes; we shall make them observant if we get them to see what they had failed to notice in obvious things. Thus, the majority of children regard all leaves as having the same shape and structure, until their attention is drawn in an observation lesson to differences. Further, objects which can be so easily procured that all children may bring a specimen to the class and examine it, will give more interest to the lessons than objects which can be shown from the teacher's desk or by pictures. A lesson on milk would therefore be a much wiser choice than a lesson on sodium, and a lesson on a parrot than one on a rhinoceros.

The objects should be chosen with reference to the season of the year and to the age of the pupils. Thus, lessons in which flowers are being examined should be taken in the months of March and April, when the children will have opportunities of examining many varieties; and while a lesson on germination would be suitable for class IV, it would be too difficult for class II.

In order to give opportunities for comparison, the objects chosen should have some connection with each other. In the lowest classes they will be linked together by dealing with similar groups of objects (e.g., common crops) between which the pupils may note comparison and contrast. In the higher classes there should be more continuity of subject; the series of lessons should give the children opportunities to make deductions, and should lead them to the statements of simple general truths such as "Animal life is dependent on plant life." By association in this way the lessons will gain greatly in interest, and will admit of gradual progress in difficulty along particular lines.

The actual objects should, wherever possible be obtained. Nearly all the lessons in the following lists can be illustrated by objects which the children can bring to school. If the teacher encourages his pupils to exert themselves in this way, he will help greatly to make his lessons a success. Pictures are a poor substitute for the real object and should be used in the place of objects only when lessons are given on certain animals which cannot be shown in the school, e.g., camel, elephant, but which may form the subject of a lesson if children are familiar with them.

It is not necessary to have many objects in a course. The teacher should not attempt to give lessons in all the objects mentioned in the following lists; he should make a selection. Habits of observation are better cultivated by examining a few objects thoroughly than by cursorily looking at many.

*Method of teaching.*—The first necessity in an object lesson is an object to observe. It would not be necessary to say this, were it not a fact that many teachers are content with a picture, a model, or even a description from a book. A picture or model will help to make a description more vivid, but cannot take the place of the object itself.

The teacher should first find out from the class all they know about the object. He should then lead them to examine it more closely and notice things which formerly they had failed to observe. Finally, he should lead them to see how the object is adapted by its structure to its uses, ways of living, or mode of growth.

The most common fault of these lessons is that the children do nothing but listen. The teacher should guard against the temptation of imparting *much information* in one lesson for children become tired and bewildered by many facts and descriptions. The information should only be such as the object itself gives; any further information may, if necessary, be given in other lessons. Thus a lesson on stamps may be an object lesson, but an account of the way in which letters are conveyed from one place to another should be left to the reading or composition lesson; while the growth of particular plants may be studied in the observation lesson, the distribution of crops in a particular part of the country should be taught in the geography lesson.

"One thing at a time" is a good rule. But while it is not desirable in one lesson to deal with several kinds of objects there should always be several specimens of an object in the class and, if possible, each pupil should have a specimen before him.

Questions should be put at the beginning of a lesson to find out what the children already know about the object. In the course of the lesson questions should be put in order to stimulate the children to think and to look at things for themselves. At suitable stages or at the end of the lesson the teacher should question the class to find out what they have grasped. He should also at the end of suitable stages encourage the class to ask him questions.

The teacher's language should be simple and his own (i.e. not quoted from a text-book) and if he uses technical terms, these should only be such as the boys are likely to use subsequently. The value of the lesson as a means of training pupils in the correct use of language in speaking and writing should not be overlooked. The pupils should therefore be encouraged to express the results of their observations by accurate description in speaking or writing, and while the teacher should not make his lesson one on grammar or composition, he should not allow careless expressions to pass uncorrected. In the preparatory classes the lessons should take the form of conversations between teacher and pupils. In Classes I and II the children should be asked to write the name of the object and, where possible, to make drawings. In Classes III and IV simple records should be made, and children should invariably be asked to make simple drawings. The records may at first be copies of the teacher's summaries on the blackboard, but these should be replaced as soon as possible by simple descriptions, written by the pupils in their own words.

More and more will be expected of pupils as they grow older. In the preparatory stage the sole aim of the lessons will be to awaken in children an interest in things around them; the lessons must be short and bright questions will be put solely to make children examine things. In Classes I and II the objects chosen will be more difficult of analysis and will require more careful examination than those of the preparatory classes; pupils will be led to compare and contrast things, and will be questioned to make them think why the properties and structure of the object are specially adapted to its uses, ways of living or mode of growth. In Classes III and IV there will be greater demand than in previous classes on the reasoning powers; things will be classified, deductions will be made, general truths will be arrived at, and a training will be given in exact measurement.

Diagrams and drawings by the teacher on the blackboard are valuable as means of giving interest to a lesson, but these should follow, not precede, the children's observations. The blackboard sketches should not be elaborate drawings. The fewer lines in them the better; each drawing should bring out only one or two points, for any elaboration will only distract the class.

When experiments are performed information should not be given as to what may be expected to happen; when the experiment has been carried out the children should be questioned and led to reason out for themselves what it teaches.

For successful teaching, the *teacher's interest* is the first essential. If instead of depending solely on books, he works at the objects himself saying "How can I kindle the interest of children in these? How can I awaken their curiosity and stimulate them to observe and enquire?" his teaching will be successful.

#### SCHEME OF OBJECT LESSONS.

Teachers should *select* their lessons from the following lists:—They should choose from the lists objects which are found in the district in which the school is situated, and are best suited to the ages of the children.

## PREPARATORY CLASSES A AND B.

*Common things.*—Simple forms : sphere, cube, cylinder—illustrated by balls, pieces of sugarcane, pencils, *pichkari* (syringe), *bansri* (flute), bricks. Colours : The children should be taught to distinguish the colours white, black, red, green, yellow, and blue. The following should be used as illustrations: Flowers, coloured paper, cloth, wool, beads and *churies* (bangles).

*Common animal and birds.*—Cow, goat, sheep, cat, dog, parrot, pigeon, *titar*.

*Common fruits.*—Guava, mango, orange, tamarind, *ber*.

*Common articles of food.*—Milk, water, bread, *dal* (lentil), *ghee* (clarified butter), *dahi* (curds).

## CLASS I.

*Common things.*—*Takhti* slate, knife, *khurpa* (hoe), *pharua* (spade), *khapra* (tile), *ghara* (pitcher).

*Common animals and birds.*—Buffalo, horse, ass, camel, sparrow, *maina*.

*Common crops.*—Wheat, barley, gram, maize, rice, *bajra*, peas.

*Common vegetables.*—*Sag* (spinach), *bhindi* (lady's finger), *gajar* (carrot), *mul* (radish), potato, *konhra* (pumpkin).

## CLASS II.

*Common things.*—Stamps, metals (iron, brass, copper), coins, clay, sand, sulphur, saw, *chheni* (chisel), *barmi* (borer), *hal* (plough), harrow, *kolhu* (sugar mill).

*Common animals.*—Elephant, monkey, fish, snake, squirrel, rabbit, frog (to be selected only if they are frequently seen in the locality, and if suitable pictures are available) peacock, crow, blue-jay.

*Common trees and plants.*—Mango, *pipal*, *nim*, tamarind, bamboo, cotton, castor-plant.

## SCHEME OF OBJECT LESSONS

Serial no.	Subject.	Detailed syllabus	Month of the year in which the subject is to be taught.
		CLASS III. •	
1	Classification of objects.	Living and non-living objects. Natural and artificial objects	July.
2	Plants and their parts	Examination of a number of the common flowering plants of the neighbourhood with reference to their flowers, leaves, stems, roots, fruits, and seeds and also to the following :— (a) Flowers yield seeds and fade away. (b) The stem holds the leaves up to the sunlight and supports the flowers. (c) The root fixes the plant in the soil.	July and August.
3	Flowers ...	Examination of some of the common flowers of the season with reference to the following parts : petals, sepals, and stamens. The following are examples which may be studied :— <i>Khira</i> (cucumber), <i>bhindi</i> (lady's finger), <i>lauki</i> (gourd), jasmine, rose, <i>dhatūra</i> , <i>gul hazara</i> .	August and September.
4	Fruits ...	Examination of some of the common fruits of the season with reference to differences in colour, smell, taste, shape, and size, and also to the fact that fruits contain seeds. The following fruits may be examined :— Castard-apple ( <i>sharifa</i> ), lemon, orange, cucumber.	September and October.
5	Leaves and their classification	Classification of leaves of different plants; leaves to be brought by pupils. (a) By shape— (i) long and narrow, e.g., grasses, especially the following :— <i>Kans</i> , <i>makka</i> , <i>sarkanda</i> , wheat, rice, barley. (ii) needle-shaped, e.g., <i>chir</i> ; (iii) oval-shaped e.g., <i>tidhara bargad</i> . (b) By structure— (i) simple (one blade), e.g., mango, <i>pipal</i> , <i>bargad</i> , mulberry, <i>kelu</i> ; (ii) compound (blades divided into separate leaflets, e.g., <i>arhar</i> , gram, <i>nim</i> , <i>shisham</i> ). (c) By margin— (i) leaves with entire margins, e.g., mango, <i>bargad</i> , <i>mahua</i> , <i>gular</i> , bamboo, jack fruit ; (ii) leaves with toothed margins, e.g., mulberry, castor, rose. (d) By veining— (i) net-veined leaves, e.g., <i>pipal</i> , <i>bargad</i> , gourd, melon ; (ii) parallel-veined leaves, e.g., sugarcane, bamboo, <i>haldi</i> .	November and December.

Serial number.	Subject	Detailed syllabus.	Month of the year in which the subject is to be taught.
		CLASS III—(concluded).	
6	Flowers ...	Examination (resumed) of some of the common flowers of the winter season with reference to their petals, sepals and stamens. The following may be studied:—Cotton, poppy, <i>bhanta</i> , mustard, <i>dhaniya</i> , peas.	January.
7	Trees ...	Identification of some of the common trees of the neighbourhood by their leaves of which drawings should be made by the pupils.  The following are examples which may be studied:— <i>Shisham</i> , <i>nim</i> , <i>mahua</i> , <i>sal</i> , mango, <i>pipal</i> , <i>bargad</i> , <i>kathal</i> , mulberry, bamboo, toddy palm, date palm.	January and February.
8	Fruits ...	Examination of some of the common fruits of the winter season, as in September and October.  The following are examples which may be examined:—Guava, plum, <i>kamrak</i> , <i>anar</i> , <i>anjir</i> .	February.
9	Observation lessons.	Observation lessons on the following:—Cotton, jute, tobacco, wool, paper and pencil.	March and April.

## CLASS IV.

Serial number.	Subject	Detailed syllabus.	Month of the year in which the subject is to be taught.
1	Needs of a plant.	Plants require (1) sunlight, (2) air, (3) water. Plants are living things.	July.
2	Flowers ...	Examination of some of the common flowers of the season with reference to their carpels, sepals, petals and stamens. The following are examples which may be examined:—  Rose and jasmine—to show petals.  Rose and <i>dhatūra</i> —to show sepals.  <i>Dhatūra</i> and <i>bhindi</i> —to show carpels.	August.
3	Examination and classification of plants used for food.	A simple classification of plants used as food by men or animals and an examination and comparison of these. The following are examples:—  (a) Seeds used as food— <i>arhar</i> , <i>urd</i> , pea, gram, <i>mung</i> , bean.  (b) Fruits used as food—orange, lemon, peas, guava, mango, banana.	September and October.

Serial number.	Subject.	Detailed syllabus.	Month of the year in which the subject is to be taught.
4	Mensuration...	<p>CLASS IV—(concluded).</p> <p>(c) Coots used as food—turnip, carrot, radish, sweet potato.</p> <p>(d) Stems used as food—sugarcane, <i>ganthgobi</i>.</p> <p>(e) Leaves used as food—cabbage, <i>chana sag</i>, <i>melhi</i>, <i>sarson</i>, <i>marisa</i>, <i>palak</i>.</p> <p>Yard measure ... ..</p> <p>Examination of a yard measure and its divisions. How to measure to the nearest inch.</p> <p>Class to guess lengths to nearest yard, e.g., length of class-room, height of door, etc. These to be verified by measurements made by the class. Class also to guess lengths, to the nearest foot of smaller objects, e.g., width of table, etc., and the measurements to be verified by experiments.</p> <p>Foot-rule.</p> <p>Examination of a foot-rule (divided into eighths and tenths of an inch). To copy part of the rule and its divisions. How to measure to the nearest eighths or tenths of an inch.</p> <p>Measurement of straight lines.</p> <p>The blocks of wood of rectangular shape, rectangular pieces of cardboard, tin, etc., for measurement. Measure lengths of sides in inches and eighths of an inch and also in tenths of an inch, expressing the latter in the decimal notation.</p>	<p>November.</p> <p>December.</p> <p>January.</p>
5	Flowers ...	<p>Examination (resumed) of some of the common flowers of the winter season with reference to their nectaries as well as petals, sepals, stamens and carpels (previously done).</p> <p>The following are examples which may be studied :—</p> <p>Mango, mustard and <i>dhaniya</i>—to show nectaries.</p> <p>Mustard and cotton—to show carpels.</p> <p>Mustard, peas, beans and cotton—to show stamens.</p> <p>Poppy and rose—to show sepals.</p> <p>Cotton and gourd—to show petals.</p>	February.
6	Observation lessons.	<p>Observation lessons on the following :—</p> <p>Wood, tobacco, and the common vegetable oils, e.g., mustard, linseed, cocoanut, and <i>sesamum</i>.</p>	March and April.

## ALTERNATIVE SCHEMES OF OBJECT LESSONS FOR CLASSES V AND VI.

## No. I.

*Note.*—As much as possible of the course should be done in outline in Class V; the remainder, with special attention to details, should be done in Class VI.

## A.—STUDIES DURING THE "R.AINS."

1. *Physical.*—The monsoon, its causes and where it comes from. Classification of natural objects into Animal, Vegetable and Mineral kingdoms.

2. *General characteristics of the "rains."*—Re-awakening of many animals and plants after the hot weather. Moisture, the principal stimulus in plants; abundance of food for animals. With return of moisture and cooler weather we have—(a) The springing up of grass and low herbage, and vegetation reaches its greatest luxuriance and activity. (b) The appearance of insect life in its myriads, scorpions and centipedes; the appearance of snakes, frogs, earthworms, lizards, etc.

3. *Animal life.*—

Aquatic life at its maximum.

Contents of a small pond or tank—

- (i) *Life-history of the frog.*—Collect spawn and place with weed in an aquarium, which may be constructed from large bell jars inserted and fixed into stout blocks of wood.

Note each egg surrounded by jelly; jelly a protective coat; eggs adhere together by means of gelatinous coats to form masses ("frog spawn"). Note when eggs hatch. Draw eggs and first formed "tadpole." Characters of the early tadpole (i.e., head and tail but no limbs); tail an organ of locomotion, animal purely aquatic and practically a fish. Later tadpole; fore limbs appear (draw). Last tadpole stage with hind limbs and reduced tail (draw). Animal grows at expense of tail. Full-grown frog. General description.

Reference book for the teacher:—"Biology of the Frog" by Holmes (Macmillan & Co.)

- (ii) *Insects*—Collect some water with weeds from a tank and very little mud from the bottom; place in an aquarium, and allow to settle. Note that the animal life consists of: Insects, water snails, and microscopical animals (chiefly water fleas and their allies).

Place the insects in a separate vessel with water and note that they consist of beetles, water bugs, and the young forms (larvae) of many insects (dies, dragon flies etc.). Try to rear the larvae. Note the characteristics common to all insects:—

A pair of feelers, three pairs of legs, and generally two pairs of wings.

Reference books for the teacher:—"Pond Life; Insects" by E. A. Butler (Swan Sonnenschein & Co). "Insect Life in Pond and Stream" by F. M. and L. T. Duncan (Oxford University Press).

- (iii) *Life-history of a mosquito.*—Expose aquarium with water and weeds to the air of the room. Note egg rafts layed on surface of water by mosquitoes. Examine "egg rafts." Note when young larvae hatch out. Note exact method of swimming, and that they live near the surface of the water; come to surface for air. Animal as it grows casts its skin. Note date when larva turns to pupa. The pupa a quiescent period; takes no food; period when the organs of the future mosquito are built up; two breathing tubes; need of air. Note when first mosquito appears. Description of adult mosquito; two wings, three pairs of legs, a pair of feelers, and between the latter, a needle-like trunk for piercing. Difference between males and females determined by form of feelers. Males feed on juices, fruits, etc.; females suck blood. How to determine anophelae; mosquitoes carriers of malaria. Lesson on malaria, its treatment and prevention.

For reference by the teacher:—"A Short Course of Object Lessons of Mosquitoes" by Major S. A. Harriess, I.M.S., to be obtained from the Sanitary Commissioner, United Provinces.

4. *Plant life.*—Revision of the work of Classes III and IV in conjunction with the making of a school garden, and with particular reference to the following points:—

Herbs, shrubs, trees. Take any common plant in flower at the time; wash soil from roots and note stem, branches, roots, and rootlets, leaves simple and compound, petiole and

net-veined, disposition of leaves on the stem, margin of the leaf. The flower and its various parts. Use abundant examples and make sketches.

The relationship between insects and flowers; note only certain kinds of insects visit flowers; why insects come to flowers; advantage to flowers of insects' visits.

Reference books for the teachers:—"A Botany for India" by Fyson (Christian Literature Society, Madras). "The Study of Plant Life" by Stokes (Blackie and Son). "First Studies of Plant Life" by Atkinson and Wood (Ginn and Co)

#### B.—STUDIES FOR THE DRY WEATHER.

1. *Physical*.—Departure of the monsoon; decreasing heat of sun and length of day.

2. *General characteristics*.—Dry and parched nature of herbage; only roots remain alive; prove that roots are living by supplying moisture.

General scarcity of animal life and its disappearance below ground; insect life, however, fairly abundant, also scorpions and centipedes.

3. *Life-history of a common butterfly*.—The teacher will find clear directions which may form the basis of object lessons under this head in "Directions for the cultivation of Eri Silk," bulletin no. 29 of the Agriculture Research Institute, Pusa, published by Superintendent, Government Printing, Calcutta; price three annas.

Reference book for the teacher:—"Butterflies and Moths" by F. M. and L. T. Duncan (Oxford-University Press).

4. *Plant-life*.—Revision of work of Classes III and IV in conjunction with the upkeep of school garden and with special reference to the following:—

Hot and dry weather, the time for the ripening of fruits.

Collect and examine as many fruits as possible; kinds of fruits, uses of fruits, various fruit structures, and their meaning; dispersal of fruits and seeds. Germination of seeds with sketches of the stages of growth; plant out in soil and pots

Recognition of the common trees by bark, branching and leaves, with sketches and descriptions.

Object lessons on economic vegetable products, e.g., wood, coal, jute, cotton and cork.

General reference books for the teachers:—"How to teach Nature Study" by T. W. Hoare (Sidgwick and Jackson, London). "Nature Study and Life" by C. F. Hodge (Ginn and Co)

#### No. II.

*Note*.—The "periods" as suggested in the following outlined syllabus are not to be adhered to strictly. They merely indicate the seasons of the year and the general sequence in which the work should be taught. If there is no time or proper facilities to cover the whole course in the year, certain portions may be omitted; the syllabus is meant only to be a general guide to teachers as to the kind of work that may be attempted.

#### Object lessons for Class V.

*Time*.—Not less than three periods per week.

#### SECTION I.

1. The effect of heat on water.

(a) Evaporation.

(1) Observations and experiences from daily life—drying up of ink pots (inking being renewed more frequently in summer), pits, ponds, etc.; drying up of wet clothes, etc.

(2) Experiments in class—

(i) artificial, by heating water in a flask.

(ii) natural, by placing a drop or two or more in a dish in the sun and the consequent disappearance of the drops

(b) The presence of water vapour in the air.

(1) Observations and experiences from daily life—common salt, in our homes, becomes moist in this season; almost all articles of food become moist when kept for some time, e.g., *namkin* or *pappad*.

(2) Experiments in class—

(i) Expose a little calcium chloride or some such substance on the table. It becomes moist.

- (ii) The sides of a tumbler containing ice are covered with drops on the outside which must have come from the atmosphere.
- (c) Condensation.
- (1) Observations and experiences from daily life—
- (i) Steam (visible) coming out from a boiling kettle (just above the liquid it is invisible).
- (ii) Steam coming out of the pipes in engines (just near the mouth it is invisible).
- (iii) We can see our breath on a winter morning, but not on a summer morning.
- (iv) A glass of cold water when brought into a warm room becomes covered with moisture.
- (v) The surface of a slate becomes damp from breath.
- (2) Experiments in class—hold a piece of ice or some cold thing in the jet of steam coming out of a flask of boiling water and note the effect; hold a red hot iron bar in the same way and note the difference in the effects produced in the two cases.
2. The effect of heat on air.
- (1) Observations and experiences from daily life—
- (i) A flame tapers to a point upwards
- (ii) Smoke always goes up.
- (iii) Paper balloons are let off in fairs and marriages; they have a flame burning inside and thus go on rising up in the sky.
- (iv) A paper kite, when flown at noon in May and June, rises upwards and comes overhead
- (v) Tasha (a kettle-drum) has to be heated before being beaten.
- (2) Experiments in class—
- (i) Drop a few small pieces of paper, or some light substance, down the chimney of a burning lamp. They do not go down but rise up.
- (ii) A football bladder half filled expands more on heating.
- (iii) Some experiments mentioned in Frew's "Object Lessons in Geography and Science," volume II, pages 55 to 59.
3. Hot air can hold more invisible water vapour than cold air.
- (1) Observations and experiences from daily life—compare the drying of wet clothes in summer, in winter, and in the rainy seasons.
- (2) Have ready a flask of boiling water: take another empty flask, heat over spirit lamp; invert second flask over flask of boiling water; cork second flask, continue to warm it over flame. Cool the flask and notice the cloudiness.
4. The effect of cooling on the water vapour of the air.
- (a) The formation of clouds of various kinds—
- (i) Observations and experiments—the same as noted under condensation (1) and (2) respectively.
- (ii) Compare steam from a kettle or a locomotive with cloud in the sky—(a) both are white, (b) both have a more or less curly shape, (c) both are light and float in the air.
- Note.*—The kinds of clouds—Cirrus, Cumulus, Stratus and Nimbus—to be taken in class.
- (b) Rain. Its formation—how the clouds further condense into rain by the running together of the particles of water forming drops which, unlike the clouds, cannot remain suspended in the air. Observe the little drops of water falling from the white steam coming out of a pot.
- (1) Its disposal.
- (i) Part of it soaks through sandy soil—hence goes underground to re-appear again in springs and wells.
- (ii) Part of it is evaporated, perhaps to form clouds again.
- (iii) Part of it runs off the ground and forms streams, rivers and lakes.
- Note.*—All these to be supplemented by experiments and actual observations of the

## (2) Its work.

- (i) It dissolves some minerals, carries with it mud and sand, which it takes to rivers, streams, etc., which do the work of fertilizing especially at flood times (the boys have observed a layer of soil left over flooded river)
- (ii) It revives dried up vegetation, and animal and insect life becomes more abundant (to be supplemented by actual observations).

## 5. The source of all this water and its distribution.

- (a) From former observations, deduce that water vapour comes from every surface of water—especially the ocean.
- (b) Winds are the carriers of this moisture from the ocean to the interior of land.
- (c) After falling on land, it again returns to the sea in some shape or other.

## 6. The School Garden.

## (a) Agriculture ('Kharif' crop).

- (1) Preparation of very small beds having different kinds of soil—sand, mud or clay; gravel; clay having salts; sand and mud and other combinations.
- (2) Different kinds of seeds sown—Rice, bajra, juar, maize (makka) and others—in different kinds of soil.
- (3) Notice the results in different beds and draw conclusions, which should be recorded
- (4) Also sow seeds of grains, not usually grown in this season; note the results, and thus understand why they are not sown in this period.
- (5) Try different artificial manures and note the results.
- (6) Notice the effect of over-watering and under-watering on the different kinds of plants in different kinds of soils [see (1) above].

## (b) Flowering plants.

Take some of the very common flowering plants of the rainy season and study them and their parts.

## SECTION II.

## 1. The effect of cooling on the water vapour of the air.

## (a) Dew.

## (i) Observations and experiences from daily life—

- (1) More dew on a calm than on a windy night.
- (2) More dew on a clear than on a cloudy night.
- (3) Window panes are found damp and covered with very small drops of water.
- (4) Is dew deposited more on a piece of slate, sheet of paper, blade of grass or bamboo, etc., on a clear, cloudless night?

## (ii) Experiments in class—(a) Show that the outside of a glass containing ice or ice-cold water is covered with drops of water which might be compared with dew drops.

(b) Also place some water in a glass and note the difference in the effect.

*Note.*—The facts mentioned in (i) should be thoroughly discussed.

## (b) Mist and Fog.

## Observations and experiences from daily life—

- (1) Mists often seen early in the morning even at night.
- (2) Mountain tops or even hill tops are seen wrapped in mist: even hillocks present a hazy appearance.
- (3) Fogs seen on cold mornings near a lake or a river.

## (c) Difference between Mist and Fog and Cloud.

It must be clearly brought out that fog is only a much denser and blacker mist, and that cloud is nothing else but mist or fog formed high up in the air—only a difference of locality.

## 2. Resistance due to air.

Air is substance. Ordinarily we do not seem to feel it except in a high breeze or storm. Make a boy walk briskly outside with a broad sheet of stiff paper holding it right in front of the wind and then make him walk holding the sheet edgewise and notice the difference.

## 3. Winter rains.

The same treatment as for monsoon rains. The following points should however be clearly brought out :—(1) amount of rains less in winter than in the monsoon period because of less evaporation in winter and consequently less water-vapour in the air. Draw upon the experiences and observations of the boys themselves; (2) water-vapour in the atmosphere is deposited more in the form of dew mist, and fog than in that of rain.

## 4. Solids heat and cool more quickly than liquids.

(i) Observations and experiences—(1) Boys have walked on sand at noon and perhaps at night also; (2) they have walked over stones and stone pavements at noon and night also; (3) they have waded through some river or streamlet at noon and perhaps after dark also; (4) the water of the wells feels warm early in the morning in winter and cold in summer at the same time.

(ii) Experiments in class—Place in the sun pieces of solids—slate, iron, glass, etc., and also water and other liquids in dishes or cups and after some time let them note the effect of heat. Place all these things in shade and let them note the difference.

## 5. Where does air get heated (a) most quickly?

(b) most slowly?

The boys know very well that the air over land surface—sand or gravel specially—gets more heated than near a river or a lake. They feel the cool breeze when along the banks of a river or a lake and they feel warm breezes when nearing a sandy place.

## 6. School Garden.

(a) Agriculture ("Rabi" crop).

The same treatment as noted under kharif in the monsoon period—instead of rice, bajra, jwar, and maize we shall have wheat, millet, barley, etc.

(b) Flowering plants—Study the very common plants and their parts.

## SECTION III.

1. The heating power of the sun on different kinds of things, e.g., mud, wood, iron, liquids, air, etc.

March to June—  
"The Hot and Dry  
Period."

(a) Draw upon the observations and experiences of the boys—How wood cracks; how iron expands; how air expands; and so also how *chapati* (a loaf of Indian bread) swells up when put on the hearth or in an oven.

(b) Some experiments showing these effects may also be shown. With water the formation of currents in the ocean can also be shown by hanging a piece of ice at one side of a trough full of water and having a heated iron rod (kept hot by a flame) at the other end. Pour some drops of heavy coloured liquid near the hot end of the rod and notice how they are sent away to the other end and how on striking the cold surface of ice they sink and again rise at the other end and are again sent to the other, and so on.

## 2. The effects of wind and heat on the earth

(i) Observations and experiences.

(a) As a whole—Here draw their attention (1) to the cooling effect of *khas kitattis* in this wheather; (2) also how water kept in an earthen jar or *surahi* keeps cool. But this does not happen so in the monsoon period; (3) why perspiration has a cooling effect now, but in the rainy season it is so troublesome.

(b) On plant life.—Plants in flower pots wither and die when kept away from light and heat. Their growth is also stunted and other effects.

(ii) On animal and insect life.—This abounds where there is great heat and consequent rainfall brought about by the winds. No such abundance in very cold countries. Refer to actual localities and draw attention to abundance of animal and insect life in the rainy season and comparative scarcity in this period. Here refer to the natural law of preservation of life—green insects found among green leaves, etc.

## 3. School garden.

- (a) Notice the results of the rabi crop sown in the preceding period.  
 (b) Study some of the common flowering plants.

*Practical.*

- (a) Tabular, or graphical, records of various kinds should be kept. These may be arranged in a very elementary manner to suit the capacity of the students. In this class the records may be approximate and comparative ones, e.g., as of rain, much, little or none ; of temperature, very hot, hot, muggy, cool, etc.

*Records to be kept of—*

- (1) Temperature.
- (2) Wind and its direction.
- (3) Clouds.
- (4) Rain.
- (5) Thunder storms
- (6) Rain storms.
- (7) Duststorms.
- (8) Dew, mist, fog.

*Note.*—For clouds the following is an easy method of reckoning :—

High clouds	..	..	..	..	..	..	..	1
Medium clouds	..	..	..	..	..	..	..	2
Low clouds	..	..	..	..	..	..	..	3
Fog or mist ..	..	..	..	..	..	..	..	4

As the seasons vary so greatly stress should be laid on keeping the appropriate records.

*(b) Records should be kept of—*

- (1) Sunrise and sunset—the varying lengths of days and nights.
- (2) No moon visible, full moon, and other phases.

- (c) Records should be kept of when it is discovered that cultivators are planting various crops : reasons should be given if possible for the special times being selected for the various crops. Records should be kept of the times when these crops give their products and whether in large, medium or small quantities. Records should also be kept of the prices of these products and also of imported fruits, vegetables, etc., which can be bought in the local bazars.

As far as possible brief reasons should be deduced for the fluctuation of prices, e.g., in the year 1913-14, owing to the failure of the monsoon.

- (d) Students might be encouraged to collect (in bottles, if necessary) and label specimens of common things of which they read and hear and which they see in the bazars, e.g., flax, cotton, wheat, bajra, sugar, coffee, etc. Prizes might be given for the best specimens, which might be kept in a school museum.
- (e) In favourable localities excursions should be made to see places and things of historical interest of which pupils have heard or read, e.g., a river in flood ; the effects of a great storm of hail or rain or snow ; the effects of a forest fire ; a landslide due to rain or an earthquake, etc.

*Object lessons for Class VI.*

*Time.*—Not less than three periods per week.

The work for this class is the same as for Class V, only it is to be treated more fully.

Additional and more fully and accurately kept "Records" or "Charts" should be maintained.

*Additional and more accurate charts* to be kept as graphs on large mill-boards and "hung up" in the class, as well as in individual boys' note-books.

1. Rainfall.
2. Temperature.
  - (i) Dry bulb thermometer.
  - (ii) Wet bulb ditto.
  - (iii) Maximum ditto.
  - (iv) Minimum ditto.

## 3 Barometric pressure.

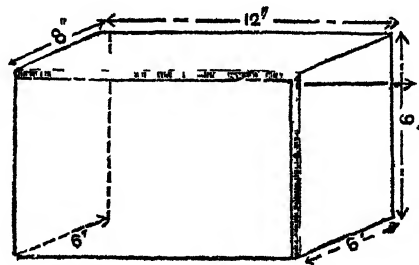

For fuller information about keeping weather reports, the rules may be obtained for the keeping of Indian Observatories from any Meteorological office.

*Books to be consulted.*

1. "Object Lessons in Geography" by Dexter and Garlick.
2. Frew's "Object Lessons in Geography and Elementary Science."
3. Simons and Stenhouse's "Physical Geography."
4. Carey's "Physical Geography."
5. "Introduction to Practical Geography" by Simons.

*Equipment for object lessons.*

It is suggested that schools in which object lessons are attempted should be supplied with flower pots, if possible one between every two children, and a sufficient quantity of sawdust so as to enable scholars to see root development. Provided that money be available, it would be still better to supply the schools with germinating boxes made as in the sketch below:—

*Iron ribbon  
nailed to keep  
sides straight.*

These boxes are made open at the top with a pane of glass in front fitting into a groove and sloping inwards. By this means the development of roots is seen and can be measured; the difference in the branching of roots in the two main groups illustrated by any grass (barley, wheat, maize, rice, oats, etc.), and plants, such as beans, peas, gourds, etc., can be made out. These boxes are never-failing source of interest and a valuable adjunct in teaching.

**SYLLABUS OF THE COURSES IN DRILL.**

*(For all classes including the high section)*

As in the text book prescribed. In the preparatory section the exercises should be short and very simple

## PART IV.

OFFICE OF THE DIRECTOR OF PUBLIC INSTRUCTION, UNITED PROVINCES.

### NOTICE.

The Local Government has approved the enclosed scheme for the language examinations in advanced Urdu and Hindi. The examinations will be held for the first time in April, 1919. The selections referred to in the Appendix attached to the scheme will be notified by the Registrar, Departmental Examinations, United Provinces, shortly.

#### SCHEME FOR THE LANGUAGE EXAMINATIONS IN ADVANCED URDU AND HINDI.

1. The language examinations in advanced Urdu and Hindi comprise written tests in the following:—

- (1) Prose.
- (2) Poetry.
- (3) Composition.
- (4) Persian in the case of the Urdu and Sanskrit in that of the Hindi examination.

NOTE.—In awarding marks consideration is paid to handwriting, spelling, and penmanship.

2. The examinations are conducted by the Registrar, Departmental Examinations, United Provinces. All enquiries regarding the examinations should be addressed to him.

3. The question papers for each examination are moderated by a board specially called together for the purpose.

4. The courses of study for the examinations are given in the Appendix.

5. The examinations are open to teachers who have served for not less than two years in a recognized school.

6. The fee for admission to each examination is Rs. 5.
7. The examinations are held annually at each Government normal school along with the Vernacular Teachers' Certificate examination. The exact dates are notified by the Registrar annually.
8. Teachers who wish to be admitted to either of the examinations should, between the 3rd and 10th January, submit their applications in the prescribed form together with the examination fee to the deputy inspector of schools.
9. The deputy inspector of schools should pay the amount of fees into the Government Treasury to be credited to the head "Fees, Provincial Examinations, XIX—Education, Provincial." He should by the 20th January forward the Treasury "Oilce." receipts, together with two copies of the list of candidates for his district, to the inspector of schools, who should check the lists and send one copy to the Registrar by the 31st January.
10. To obtain a certificate of having passed either of the examinations the candidates must gain at least 40 per cent of the total number of marks in each paper. Unsuccessful candidates are allowed to appear at any subsequent examination.
11. Successful candidates are classified in two divisions as follows:—  
*In the first division*—Those who obtain 60 per cent. or more of the total.  
*In the second division*—Those who obtain 40 per cent. and less than 60 per cent. of the total.
12. The names of successful candidates are published in the *United Provinces Government Gazette* and successful candidates receive a certificate signed by the Registrar.
13. The fee for the issue of a duplicate copy of a certificate is Rs. 5. Before issuing a duplicate copy the Registrar should require the applicant to produce satisfactory evidence of the loss of the original certificate.

(3) Domestic Science may be taken as one of the alternative subjects prescribed from class VI onward.

(4) Calisthenics may be taught in place of Drill.

The course in Sewing is as follows :—

**PREPARATORY SECTION.****Class A.**

Threading a needle ; making knots ; use of humble ; tacking and running.

**Class B**

Running ; running double seams ; placing ; twisting threads ; back stitching.

**LOWER PRIMARY SECTION.****Class I**

Practice in running and back-stitching ; top-sewing ; hemming.

*Optional*.—Chikan-stitch ; *kachcha-phanda* ; *ulti bakhya* (stem-stitch).

**Class II**

Hemming ; run and fell ; knitting with two needles (plain) ; darning stitch on untorn material

*Optional*.—Chikan stitch ; *pakka phanda* ; hem-stitching ; crochet (chain-stitch)

**UPPER PRIMARY SECTION.****Class III.**

Sewing on buttons and tapes and loops ; button hole stitch ; darning a hole ; gathering and setting in ; knitting (plain and purl) ; casting on and off with two needles.

*Optional*.—Chikan stitch ; *sursiri* ; crochet ; feather-stitching.

**Class IV.**

Darning ; patching ; knitting on four needles (plain and purl) ; button-holes ; practice of stitches previously learnt ; to cut out and make up a simple garment, e.g. *kurti* or *paasore*.

*Optional*.—Chikan stitches ; *bakhya* ; *hatkati* ; crochet ; satin stitch.

**LOWER MIDDLE SECTION.****Class V.**

The course in Domestic Science is as follows :—

**Class VI.**

(a) *Physiology and Hygiene* :—

(i) *Outlines of Physiology*.—Bones, muscles, skin, lungs, heart, circulation of blood.

(ii) *Hygiene*.—Air, food, water, rest, exercise, clothing, cleanliness of person malaria and mosquitoes.

(iii) Elementary instruction in the care of the sick.

(b) *Sewing*—To cut out and make up any garment from the list given in class V.

*Note*.—The optional work will be the same as in class V.

(c) *Cooking* (optional).—The course should be drawn up by the headmistress for approval and should include dishes suitable for invalids.

**UPPER MIDDLE SECTION.**

**Classes VII and VIII.**

(a) *Physiology and Hygiene*.—Simple first aid; bleeding wounds; scalds; bites and stings; broken bones; dislocations; poisons.

Treatment of fits and other forms of unconsciousness.

Arrangements for reception of the wounded.

Preparation for doctor's visit.

Applications of triangular bandage.

Head bandage.

Jaw „

Shoulder „

Hand „

Chest „

Foot „

Arm strings bandage.

Practical instruction in methods :—

(1) of cleaning house, furniture, china, glass, brass.

(2) of washing cotton, woollen and silk materials.

(3) of disposing of rubbish.

(4) of getting rid of flies and mosquitoes.

(b) *Sewing*—

Two garments selected by the Manager to be cut out and made.

*Optional*.—Chikan work, karchobi work, English embroidery, drawn thread-work, rochet, knitting.

(c) *Cooking* (optional).—The course should be drawn up by the headmistress for approval.

**TEXT-BOOKS.**

*Class VI*.—Shahrah Tandurusti, Rai Sahib M. Gulab Singh & Sons, Lahore.

*Classes VII and VIII*.—Simple Lessons in First Aid by N. E. Collins. Indian Manual of First Aid (for bandages only).

**PREFATORY MEMORANDUM.**

Headmistresses and managers of secondary English schools are permitted, with the approval of the Inspectress, and in conformity with the general principles that underlie the curriculum, to make modifications in the distribution of the work in any subject among the various classes. Permission is also given, with the approval of the Inspectress, to re-group scholars in classes above the primary stage for Arithmetic, Drawing, Classical Languages, and Domestic Science independently of the recognised classification.

Object lessons have been prescribed as an optional subject from preparatory class B upwards up to Class IV and Nature Study as an optional subject for classes V and VI, but the subjects should not be introduced into any school without the permission of the Inspectress, who should satisfy herself that trained teachers are available and can be spared for teaching them. In no case should the work be entrusted to untrained teachers.

The teaching of English by the Direct Method should not be attempted except by specially trained teachers. Where such teachers are not available in sufficient numbers for all classes, a teacher or teachers, qualified to give such instruction, might be employed to supplement the ordinary class teaching by taking classes separately for an hour or so a week each.

## MEMORANDUM ON HOME LESSONS.

(Issued under the authority of G. O. no 70/XV—12, dated the 19th August, 1910,  
Educational Department.)

FROM the frequent complaints received regarding the excessive amount of work set to scholars by teachers for preparation at home there is reason to believe that the proper relation between work done out of school by the scholar and work done in the class room is not always perfectly understood. Investigation has disclosed much divergence of opinion as to the amount of home lessons that may be reasonably exacted from the pupil in the different stages of her school career, the kind of work most suitable for preparation out of school hours, and the proper distribution of the time available for home preparation among the different subjects of study. Enquiries concerning the prevalent practice yield the conclusion that the matter is left too much to the discretion of individual teachers. Sometimes the pupil is expected to prepare for every lesson in school, and sometimes the work set is wholly unsuitable in both quantity and quality for study at home. The matter clearly does not receive the attention it deserves, and since the abuse of the system of home lessons may produce permanent injury, both physical and mental, it is necessary that steps should be taken to protect scholars from it. It is desirable, therefore, without prescribing any rigid uniformity of system, to lay down certain general principles for the guidance of teachers.

(1) The fundamental principle on which home work rests is one which, it is to be feared, is too often forgotten, viz., that teaching and learning are two complementary processes, neither of which can be dispensed with or divorced from the other without detriment to educational progress. Activity on the part of the teacher must correspond to activity on the part of the learner. If either is absent, the process becomes one-sided and the result barren. Accordingly the teacher who confines herself to the "delivery" of lessons in school, with which home work is not at all or imperfectly correlated will be little less deserving of condemnation than the teacher at the opposite pole, who neglects her class teaching and endeavours to make up for it by setting long tasks to be done at home.

(2) Though axiomatic it is too often forgotten that home work must be adapted, both in quantity and quality, to the capacity and the age of the scholar. Home work should not exceed the quantity which a girl of average capacity can be expected to prepare without undue mental strain and without engrossing all her spare time. The clever girl will no doubt take rather less and the dull girl rather more than the approximate time for home preparation indicated below, for they have been estimated to suit the capacity of the scholar of average ability. The aim in setting home lessons should be that a girl should be able to prepare her tasks thoroughly, and yet have sufficient spare time to devote to healthy recreations, mental and physical, of her own choice:—

(a) In the Lower Primary and Preparatory Sections no home lessons should be set at all. If the school hours are properly utilized, there is ample time for the teacher to teach and for the scholar to learn and apply what she has been taught.

(b) In classes above the Lower Primary stage the approximate time to be devoted to home lessons should not exceed, in the Upper Primary Section, *one* hour, in the Lower Middle Section *one and a half* hours, in the Upper Middle Section *two* hours, and in the High Section from *two to three* hours.

(3) Home work should not be exacted from a scholar in too many subjects on the same day, nor too much in one subject. In this matter, the headmistress must exercise controlling authority over the class teachers. She should enquire from them from time to time what amount of work is set in the various subjects, and should see that too much time has not to be given to the study of one subject at the expense of another.

(4) Home work is one of the most important means whereby the student can be trained in the habit of doing things for herself. It must be something which she can accomplish on the basis of what she has learnt in school, not something beyond her powers which necessitates recourse to the assistance of a private tutor. A girl who is always being helped in the preparation of her home work by a private tutor loses confidence in herself and the habit of doing things independently. Moreover, work which is the result of collaboration with a private tutor, affords no criterion of the girl's capacity, progress or industry.

(5) Home work should be not only such as can be done without assistance but such as implies effort. It should never be a merely mechanical exercise which involves no intellectual exertion. It should not, for example, consist of the transcription of "rough" work done in school. Under the influence of unsound tradition there has been and still is much waste of labour in this way. Such work is manual, not mental, and should be altogether unnecessary for girls who have been trained in habits of neatness and accuracy.

(6) In the lower stages, it cannot be expected that girls should break much new ground for themselves. They should therefore be almost exclusively occupied in going over the ground already covered in class, and this work of assimilation should be tested by the teacher at the beginning of a fresh lesson. It may therefore be laid down as a general rule that written exercises upon matter not already taught in school should rarely be set in the Upper Primary Section. The work at home should take the form of recapitulating the work done in the day and of training the memory, which at this stage may be most usefully exercised. But since scholars cannot be expected to take much interest in what they find neglected by the teacher, written exercises should be punctually corrected and returned to them as soon as possible. It is most important that the work of this nature should never be allowed to fall into arrears. In the higher classes, pupils will of course have to break ground for themselves, e.g., to solve "a deduction," to study the history or the literary text-book, for the next day's lesson.

(7) There is a tendency to relegate too much written work to out-of-school hours. It cannot be too strongly emphasized that the best means of training pupils to write clearly, to arrange their work neatly, and to take pains is to insist on these points in class note-books, used in school under the eye of the master. There is plenty of time in school for written work of the nature of applying knowledge, if the teacher arranges her lessons properly. It may, in fact, be laid down as an almost invariable rule that no written work should be set as part of home lessons in the following subjects:—Arithmetic, algebra, grammar, exercises, original composition, nor should work be set in copy-book writing, in drawing or in elaborate map-making. In the higher classes, where a greater variety of subjects is taught, and consequently time has to be economized, sketch maps and geometrical constructions may have to be done at home.

The abatement of the evil of excessive or unsuitable home lessons is a matter of such urgency and importance that now that their attention has been directed to it, it is hoped that managers of schools and headmistresses will lose no time in making a searching enquiry into the practice prevailing in their own schools and take measures along the lines indicated above to prevent abuses in future. The responsibility for seeing that the nature and amount of home lessons set throughout the school are suited to the capacities of scholars is an important part of a headmistress' duties, and she should from time to time assure herself that the teachers are acting strictly in accordance with her instructions.

ENGLISH.

AIMS IN THE TEACHING OF ENGLISH.

The aims in the teaching of English are—

A. *Practical*.—To enable the pupil—

- (1) to speak and read aloud English with correct pronunciation and some degree of facility ;
- (2) to understand the language when spoken ;
- (3) to write the language with grammatical correctness and with facility.

B. *Literary*.—To enable the pupil to read intelligently for pleasure modern English prose and poetry of moderate difficulty.

SYLLABUS OF THE COURSES IN ENGLISH.

UPPER PRIMARY SECTION.

Class III.

*Conversation and reading*—The early stages of instruction will be mainly oral, and should include systematic training in the sounds of spoken English, in connection with the pronunciation of easy words. By the end of the year the class should be able to carry on simple conversation about familiar objects and actions.

To read with correct pronunciation an easy primer; to render into the Vernacular easy sentences from the primer; to use the words of the primer in simple sentences; and to answer in English simple questions based on the matter in the primer.

*Spelling and writing*.—To spell the words of the primer; copy-writing in ruled books of easy familiar words; writing in copy-books (in the latter half of the course), dictation in ruled books of words and sentences previously read in the primer.

Class IV.

*Conversation and reading*—To converse about common objects and actions; to read with correct pronunciation from a reader; to render into Vernacular easy sentences from the reader; to use the words of the reader in simple sentences and to answer in English simple questions based on the matter in the reader.

*Spelling and writing*—To spell the words of the reader; dictation in ruled books of words and sentences previously read in the reader; writing in copy-books.

*Grammar*—To point out nouns, pronouns, and verbs.

LOWER MIDDLE SECTION.

Class V.

*Conversation and reading*.—To carry on simple conversation in English; to read with correct pronunciation from a reader; to render into the Vernacular passages from the reader; to use the words of the reader in simple sentences and to answer in English questions based on the matter in the reader.

*Spelling and writing*.—To spell the words of the reader; dictation in ruled books of words and sentences previously read in the reader; writing in copy-books.

*Grammar*.—To point out simple subject and predicate.

## Class VI.

*Conversation, reading and recitation.*—To carry on simple conversation in English ; to read with correct pronunciation from a reader ; to render into the vernacular passages from the reader ; to use the words of the reader in simple sentences, and to answer in English questions based on the matter in the reader. To recite from memory passages chosen from the reader.

*Spelling and writing.*—To spell the words of the reader ; dictation in ruled books of passages chosen from the reader ; writing in copy-books.

*Grammar.*—Revision of previous work in grammar. Analysis of simple sentences (subject, enlargement of subject, predicate, simple predicate, object, direct object, indirect object)

Verbs, number and person, transitive and intransitive, weak and strong, conjugation of remaining tenses, active and passive voices. Oral and written exercises in the above

*Composition.*—Written composition (at least once a week), e.g., using the words and phrases of the reader in simple sentences, reproduction of simple stories, practice in answering in writing easy questions on the subject-matter of the text. Written composition from the vernacular into English idiomatic sentences and continuous prose. In connection with the above, incidental instruction in elementary points of arrangement, construction, and punctuation.

## UPPER MIDDLE SECTION.

## Classes VII and VIII.

*Literary course (at least four periods a week).*—To carry on conversation in English to read with correct pronunciation and expression ; to render into the Vernacular passages from the prescribed text ; to form sentences and to answer questions in English based on the vocabulary of the text ; to recite from memory suitable passages of English poetry and prose (to be selected by the Headmistress).

*Supplementary reading.*—At least one easy book per session (for suitable books see lists of books recommended for supplementary reading issued by the department)

*Dictation and writing*—Dictation (at least once a week) of unseen passages of the standard indicated by the prescribed text. Writing in copy-books.

*Grammar.*—Classification of nouns, pronouns, adjectives, and adverbs. Noun in apposition. Verbs. Auxiliary verbs. Complements of verbs. Clause analysis of complex and compound sentences. Elementary instruction in direct and indirect speech.

Written composition (at least once a week), including simple free composition, e.g., letter-writing and description and composition from the Vernacular into English idiomatic sentences and continuous prose. Incidental instruction in arrangement, construction, and punctuation

## HIGH SECTION.

## Classes IX and X.

*Literary course*—To carry on conversation in English ; to read with correct pronunciation and expression and to render into the Vernacular passages from the books read ; to form sentences and to answer questions in English based on vocabulary of the text ; to recite from memory suitable passages of English poetry and prose (to be selected by the Headmistress).

*Supplementary reading.*—At least two easy books per session (for suitable books see lists of books recommended for supplementary reading issued by the Department).

*Grammar.*—Revision of previous work. Verbs, moods, gerunds, and verbal nouns. Formal parsing. Further practice in analysis and in direct and indirect speech.

*Dictation.*—Dictation (at least once a week) of unseen passages of the standard indicated

**TEXT-BOOKS.**

In classes III to VIII the following primers and readers are prescribed :—

Class.	Nelson's Readers.	Christian Literature Society's Readers.	Macmillan's Readers.	Tipping's Direct Method Books	Longmans' series
III	Primer .. ..	Primers, nos I and II, Indian Readers.	King Primer...	A first book of English and 3rd Standard Reader	1st year teachers' book. For teachers' use only.
IV	Book I .. ..	Reader no. I ..	New English Reader I	4th standard ..	1st year reading book
V	Book II .. ..	Reader no. II ..	New English Reader II	5th standard, omitting lessons 8, 17, 25, and 31.	2nd year reading book.
VI	Book III .. ..	Reader no. III ..	New English Reader III	..	3rd year reading book.
VII	.. ..	..	New English Reader IV,	..	4th year reading book.
VIII	.. ..	..	New English Reader IVB	..	..

In classes IX and X no text-book is prescribed, but at least two of the following should be read carefully :—

Golden Deeds—C. Young.

Kingsley's Heroes.

England—Peeps of Many Lands Series.

Wanderings of Rama—Gandy.

Ten poems should be selected for reading from Indian Treasury of English Verse, Part I and III.

The English copy-books to be used are—

Class.	Series			
	Longman's, Green & Co.		Gulab Singh & Sons	Blackie & Sons (Verses)
	Upright.	Semi-Upright		
III and IV .. ..	1, 2, 8	2, 3, 4	1, 2, 3, 4	1, 2
V .. ..	4, 5	6	5, 6	3, 4
VI .. ..	6, 7, 8	7	7, 9, 10	5, 6
VII and VIII .. ..	10, 11, 12	8, 10	12, 13	7, 8, 9, 10

The books approved for translation exercises are those by—

- (1) Gordon ; (2) Stapley ; (3) Munshi Dwarka Parshad ; (4) Manual of Translation into English for Hindustani Students, by E. S. Oakley ; (5) Translation Practice in four Parts for Lower and Upper Middle Sections, by B. D. Gordon (for use of the Middle Section) ; (6) Exercise in Translation from Urdu into English, by J. R. Cornah, published by M. Gulab Singh & Sons, Lahore.

The following books on English Grammar and Composition are recommended for use :—

- (1) A Primer of English Grammar
- (2) A Manual of English Grammar
- (3) The Middle School English Grammar, Parts I and II (Standards V and VI), by L. Tipping, *Macmillan & Co*
- (4) Longmans' Junior School Grammar for India, by D. Salmon and A. J. C. Oakley.
- (5) A Simple Grammar of Modern English, *Longmans, Green & Co.*
- (6) The Suggestive Composition Book, Parts 2, 3 and 4, *Blackie & Sons.*
- (7) Lessons in English Composition, Books 1—3, by J. C. Nesfield, *Macmillan & Co.*
- (8) A Junior Course of English Composition, *S. K. Nath and G. O. Nath, Calcutta*

- (9) Progressive Practice-Book in "Direct" English Composition, Oral and Written, by P. Wren (*K. & J. Cooper, Bombay*).
- (10) Picture Composition, Pupils' Book, by J. N. Fraser (*K. & J. Cooper, Bombay*).
- (11) An Easy Course of English Grammar and Composition, *K. & J. Cooper, Bombay*, (for use in the High Section).

## MATHEMATICS.

### AIMS AND METHODS IN THE TEACHING OF MATHEMATICS.

*Reasons for teaching Mathematics.*—We teach Mathematics with a two-fold aim. On the one hand we use the subject as a means of developing the intelligence of the pupil; on the other hand we endeavour to make her skilful in such operations with numbers as are likely to be of practical use. Thus the teacher will endeavour to make clear to pupils the reasons which underlie processes, and will also train them to gain the power of rapid, accurate, and confident calculation.

*Neatness and arrangement in written work.*—Great stress should be laid on neatness and care in arrangement. Errors in working can often be traced to slovenly arrangement or badly-formed figures. Pupils should be trained to arrange their work in a series of logical steps for each of which a reason can be given. Particular care should be taken in the early stages that units are not omitted, and that every line is a correct statement.

*Oral work.*—All new processes should be introduced and fixed in the mind by means of examples worked on the blackboard. These should involve only small numbers, so that calculations may be performed without resort to pen and paper. Even after a new rule has been established "Mental Arithmetic" should be a feature of most lessons. A few minutes given daily to the oral solution of problems is a valuable means of revising past works and in training pupils to gain rapidity and confidence in calculation. Up to class IV the teaching should be largely oral. In Geometry definitions must be first explained and understood and then learnt by heart.

*Concrete illustrations.*—Wherever possible concrete aid should be used. In the earliest stages the various operations should be taught by means of illustrations with objects which can be easily procured, such as headless matches, nuts, etc. Tables of weights and measures should be visualized by measurements of lengths, areas, volumes, capacities and weights; pupils should be practised in estimating the weights of common objects, the heights of tables and rooms, the areas of surfaces; the capacity of vessels and the distances between fixed points in the class-room and play-ground; and should verify their estimates by experiments. At a latter stage in the teaching of vulgar fractions and decimals the foot-rule graduated in inches and twelfths of an inch and in centimetres should be in constant use.

*Nature of examples.*—Once a rule has been learnt it should be applied to varied examples, both oral and written. Examples should, as far as possible, relate to matters within the experience of pupils, and the numbers employed should be such as are likely to occur in practice; thus although pupils should be made familiar with operations in British money, prices in problems should as a rule be given in Indian money. Operations with large numbers should be the exception, and when they are employed they should be taken from real life. In multiplication and division of decimals the methods adopted in the early stages should be such as can be employed in contracted work at a later stage; thus the methods given in Hall, Stevens and Sims' School Arithmetic for Indian schools are preferable to the older methods. To test the grasp of a new process and to connect it with what has been already learnt, it should be applied to problems which involve also the application of previous rules; thus no preceding rule should be allowed to drop out of sight.

*Revision.*—In no subject is revision more necessary than in Mathematics. As the mental machinery of pupils becomes somewhat rusty from lying up for the vacation, such revision is especially necessary at the commencement of each session.

*Text-book.*—Even the best text-book cannot take the place of the teacher. She has to expand the theory, which is usually a brief summary; she has also to provide the concrete illustrations, to break down the artificial barriers which separate topic from topic and to supplement the lists of examples, by supplying oral questions and by inventing problems which are likely to bring the subject into close touch with the interests of the pupils.

## SYLLABUS OF THE COURSES IN MATHEMATICS. ARITHMETIC.

### PREPARATORY SECTION.

#### Class A.

Notation and numeration from 1 to 50 to be taught by means of concrete objects. Oral addition and subtraction of numbers whose sum does not exceed 20 in connection with concrete objects.

#### Class B.

Notation and numeration to 100 to be taught by means of concrete objects. Addition and subtraction of numbers whose sum does not exceed 100. Construction and memorising of tables  $5 \times 10$ . Simple oral problems on the above.

NOTE.—Problems should be introduced as soon as a new rule is begun.

### LOWER PRIMARY SECTION.

#### - Class I.

Revision. Notation and numeration to 1,000. Construction and memorising of tables  $10 \times 10$ . The four simple rules with no term or answer exceeding 1,000. Simple factors and multiplication and division by factors.

NOTE.—Short division should be taught before long division and should be used wherever possible.

Simple oral and written problems on the above.

#### Class II.

Revision. Notation and numeration to crores. The tables of Indian money and weights with exercises in reduction. The four compound rules with miscellaneous problems. (Terms with many digits must not be used.) Oral exercises on all the rule, learnt.

### UPPER PRIMARY SECTION.

#### Class III.

Revision. Tables of time and linear and square measures in common use with application to simple problems. Domestic accounts. Simple idea of vulgar fractions with denominators limited to 3, 4, 5, 6, 10, 12, 16. Oral and written problems on the above.

#### Class IV.

Revision of previous work. Vulgar fractions; all examples to be simple and to be limited to two or three terms only with small numbers as numerator and denominator. L. C. M. to be taught as required for the addition and subtraction of fractions. Simple examples in unitary method.

### LOWER MIDDLE SECTION

#### Class V.

Tables of English money and problems involving its use. More advanced examples in Unitary Method. Simple interest.

#### Class VI

Revision of previous work. Simple examples in square measure; simple examples in profit and loss solved by Unitary Method.

### UPPER MIDDLE SECTION.

#### Classes VII and VIII.

Revision of previous work. Compound interest. Ratio and simple proportion. Decimal notation and metric measures. Use of Algebraic symbols to express rules.

### HIGH SECTION.

#### Classes IX and X.

Addition, subtraction, multiplication, and division of decimal fractions Percentages. Compound proportion.

## ALGEBRA AND GEOMETRY.

### UPPER MIDDLE AND HIGH SECTIONS.

#### Classes VII to X.

*Algebra.*—Classes VII and VIII.—Symbolic expressions; substitution; brackets; addition; subtraction; easy multiplication; easy division.

*Classes IX and X*—Simple equations ; simultaneous equations involving one or two unknown quantities.

*Geometry—Classes VII to X—*

*Experimental.*—Drawing and measurement of straight lines and angles ; parallel straight lines ; angles of a triangle ; construction of triangles and parallelograms.

*Practical.*—As in the text-book prescribed.

### TEXT-BOOKS.

The books recommended for use are—

#### ARITHMETIC.

For class VII and upwards.

- (1) A School Arithmetic for Indian Schools, by Hall, Stevens, and Sims (*Macmillan & Co.*).
- (2) Longmans' Senior Arithmetic [Indian edition by Dexter, Garlick and Pollard (*Longmans, Green & Co.*)]
- (3) A New Arithmetic for Indian Schools by Workman and Sime (*Gulab Singh & Sons*)
- (4) Modern Arithmetic by Banbury.

For classes below VII.

*Classes I and II.*—Vernacular School Arithmetic for classes I and II (Urdu or Hindi), published by Macmillan & Co.

*Classes III and IV.*—Anglo-Vernacular School Arithmetic for classes III and IV (Urdu or Hindi), published by the Newal Kishore Press, Lucknow.

*Classes V and VI.*—Anglo-Vernacular School Arithmetic for classes V and VI (Urdu or Hindi), published by the Newal Kishore Press, Lucknow.

#### ALGEBRA.

Baker and Bourne's Shorter Algebra or Hall's School Algebra, Part I, for Indian Schools (*Macmillan & Co.*)

#### GEOMETRY.

Pierpoint's Elements of Geometry in Theory and Practice (The Indian Middle School edition), published by Longmans, Green & Co

#### HISTORY.

#### AIMS AND METHODS IN TEACHING HISTORY.

*Classes V and VI*—Whether the pupils have copies of the text-book or not is immaterial. If they have, the greatest care must be taken that the lesson does not develop into a reading lesson. Spontaneous narrative alone will secure the desired ends. As the story proceeds, the teacher should question the class to see whether they follow the course of events, and should encourage free communication of the feelings which the narrative produces in the minds of the pupils. The pupils may at intervals be required to write out a story, which they have heard, in their own words. No notes should be taken, for these will be memorised and reproduced. What is chiefly required of the teacher is a power of vivid narrative and of feeling the emotions which she strives to arouse. There should not be a written examination in these classes, but occasionally the headmistress or a senior teacher should test each class as a whole by an oral examination.

*Classes VII and VIII.*—However simple the book may be there is an ever present danger that the pupils will derive incorrect ideas from it. The lessons therefore should be read in class in sections of suitable length, the teacher confining her explanation of the text to making the meaning clear. After the reading she should partly by narrative and partly by questions build up a connected account of the events described. During this she should, as far as the means at her disposal allow, bring to the aid of the text pictures, sketch maps, time charts, reproductions of coins, and other historical objects. The aim at this stage is to connect the main facts as a whole and to develop a sense of time and of cause and effect. She should

These arithmetics are recommended for use provisionally, pending the publication of new arithmetics for girls' schools

not fail to seize any chance of showing how one event was the natural outcome of others. The treatment should be largely biographical. New ground should as a rule be broken with the help of the teacher; the pupils however should independently learn at home what has been previously taught in class. It will be found useful to set the class questions to answer in writing at fairly frequent intervals. This makes for clarity of ideas and expressions.

*Classes IX and X.*—The treatment does not differ radically from that in classes VII and VIII, but the pupils should usually read each day's lesson before it is taken up in class. The teacher should emphasize the sequence of events. It is often found effective at this stage to follow a topical order in preference to a chronological one, as this consolidates and systematizes the pupil's knowledge better.

#### GEOGRAPHY.

##### AIMS AND METHODS IN TEACHING GEOGRAPHY.

Geography is on the one hand a study of the configuration of the Earth—its continents, seas, mountains, forests, rivers, etc.; on the other hand it is a study of the needs of man and how he makes provision for these needs. Thus we only partly teach geography if we limit our teaching to a study of physical facts; the chief value of these facts is that they help us to understand how men live and work in different parts of the earth.

In studying a country consider it first as a whole—its general build, the long and short slopes of the land, the way in which rivers run, where there are large fertile tracts, where deserts and where forests. Then in more detail; the great mountain ranges, the chief river basins, the great plains, the climate, the population and occupations, the political divisions, the trade routes and towns. For each of these topics a separate map should be drawn on the blackboard and by the pupils.

The teaching should not be confined to a mere list of names. Facts are of value only if brought into relation with other facts. The teacher should point out why here there is a forest, there a desert, how the nature of the coast has promoted intercourse with other countries, how

mountains have prevented intercourse, how rivers have promoted trade and density of population, what natural resources have given rise to particular industries, how the climate has influenced the life and work of the people. Facts are needed and must be learnt; but a fact is remembered with greater ease if it is understood, and facts are of use only if we can connect them with causes and results.

In giving facts to the class something more than a bare recital is needed. No subject makes greater demands on the descriptive powers of the teacher. She should endeavour to carry the pupils in imagination to the country she is describing; to do this she should, as far as possible, supplement vivid description by pictures, photographs, picture postcards, and, if suitable arrangements can be made, lantern slides.

*Sketch maps by pupils.*—The pupil's note-book should contain a series of sketch maps for each country, each map illustrating a particular feature. Thus, one map should contain the mountain system, a second map the river system, a third the distribution of rainfall, and so on. Almost every topic discussed can be illustrated by a sketch map and benefits thereby. In order to draw these sketch maps it is not necessary for pupils to learn to draw the outline by heart, except perhaps in the case of India, whose outline is easily remembered. The teacher should supply blank outline maps (cyclostyled or printed) and these should be used to illustrate various topics. Many maps, each illustrating a single feature, are preferable to one elaborate map crowded with details.

*Blackboard map by the teacher.*—These should be built up as the lesson proceeds; each map should contain the elements essential to the lesson and no others. Coloured chalks are a valuable help; they make the various features stand out clearly from one another, and if the same colour be used consistently to represent the same features, e.g., red for high land, blue for rivers, yellow for towns, etc., much time will be gained. Outline maps drawn on blackboard cloth are convenient as the basis for these maps; they may be procured from Messrs. G. Phillip & Son, through Messrs. Longmans, Green & Co., Bombay.

*Wall maps.*—The school should in addition possess for each continent (1) a photographed relief map, and (2) a plain orographical map, preferably without names. It is important that the map chosen should contain only essentials.

In addition to these printed maps, the teacher should make her own maps to illustrate special points, e.g., vegetation, density of population, rainfall, etc.

*Atlases.*—Each pupil should possess an atlas. The atlas should be brought regularly to the geography class, and should be constantly referred to during the course of the lesson.

*Books and apparatus.*—The teachers should consult the "Guide to Geographical Books and Appliances" published for the Geographical Association, by G. Phillip and Son (Messrs. Longmans, Green & Co., Bombay).

## SYLLABUS OF THE COURSES IN GEOGRAPHY

### LOWER PRIMARY SECTION.

#### Class I

Story lessons describing the life of children in Arabia, Japan, Africa, and of the Esquimos.

*Note.*—The course should be introduced where the school wishes to do it and can make satisfactory arrangements for teaching it.

#### Class II

Story lessons describing the life of children in England, Russia, Italy, Holland, and France.

*Note.*—The course should be introduced where the school wishes to do it and can make satisfactory arrangements for teaching it.

### UPPER PRIMARY SECTION.

#### Class III.

*General Geography.*—Measurements of distances; direction, North, South, East, West; North-East, North-West, South-East, South-West, drawing of North and South line in playground by means of shadow cast by vertical stick; meaning of scale; plan of class-room, plan of school and playground, explanation of the map of the district, description of town or village in which the school is situated and of surrounding country.

#### Class IV.

*General Geography.*—Revision of the work of class III.

The Himalayas, the Deccan Plateau, the Eastern and Western Ghats, the coast strips and the towns, Calcutta, Madras, Bombay, Delhi, Allahabad, Lucknow, Cawnpore.

Description of Northern India with reference to the nature of the country and the climate.

The following maps to be drawn by the pupils :—

(1) Map of India, showing the Himalayas, the Sulaiman Mountain, the Vindhya, the Indus with the five rivers of the Punjab, the Ganges with its main tributaries, the position of the United Provinces.

(2) Map of the United Provinces, showing divisions and their headquarters.

*The World.*—Shape of the Earth, its rotation, light and darkness, land and water, the names and relative position on the globe of continents.

*NOTE.*—Where arrangements can be made oral lessons should be given in Classes III and IV describing typical scenery or the life of man in various parts of the world. They should be illustrated by pictures, lantern slides, etc. In preparing these lessons the teacher should consult the following books :—*World Pictures*, by J. B. Reynolds (Black), *Man in Many Lands* by Lyde (Black), and *The Peoples of Many Lands Series* (Black)

*Physical Geography.*—Explanation of the following terms by reference to the globe and map :—Continent, ocean, gulf, bay, lake, strait, cape, peninsula, isthmus, mountain, island. Description of the sea.

#### LOWER MIDDLE SECTION.

##### Class V.

*General Geography.*—Revision of previous work.

*India.*—Position, outline, nature of coasts, important harbours and neighbouring islands, the chief physical features, climate, production, provinces, chief Native States, and chief towns.

The following maps should be drawn :—

(1) Outline map with main harbours and neighbouring islands.

(2) Outline map with chief mountains and rivers.

(3) Outline map with provinces and principal Native States.

(4) Outline map with chief towns.

(5) Complete map including all the above.

*British Empire.*—Position of the following :—British Isles, Canada, Australia, New Zealand, South Africa, with a very brief description of climate and nature of the country. As far as possible lessons should be illustrated by pictures.

*The World.*—Where arrangements can be made, oral descriptive lessons on the lines prescribed for class IV.

*Physical Geography.*—Simple explanation of clouds and rain; the effect of mountains in producing rain; the monsoons; the formation of a delta.

##### Class VI.

*General Geography.*—Revision of previous work.

*Asia.*—Coast line, great mountain ranges and table lands, great plains, chief rivers, countries, neighbouring islands, chief towns, people, climate, products.

*The World.*—Where arrangements can be made, oral descriptive lessons on the lines prescribed for class IV.

*Physical Geography.*—Surface of the earth, volcanoes and earthquakes, the zones, poles and equator.

#### UPPER MIDDLE SECTION.

##### Classes VII and VIII.

*General Geography.*—Revision of previous work.

Europe, America, and North Africa, to be treated in the same way as Asia in class VI.

*Physical Geography.*—Latitude and longitude. Simple explanation of changes of season, eclipses.

#### HIGH SECTION.

##### Classes IX and X

Geography of World in outline. Winds, tides, currents.

**VERNACULAR.****AIMS AND METHODS IN THE TEACHING OF VERNACULAR.**

The aim of the study of the Vernacular is—

- (1) to enable the pupils to understand and to appreciate Vernacular literature;
- (2) to train them in clear and idiomatic expression.

Method of teaching—

The subject-matter of the lessons should from the first be made the basis of conversation in order that the pupils may grasp its meaning and take an intelligent interest in it. Difficult words and phrases should be explained with reference to their context, and not by substituting synonyms except in the cases where the latter are very familiar to the pupils. In repeating a lesson the pupils should be trained to single out the salient facts or ideas, and should not merely give a running paraphrase of its entire contents.

The teaching of composition should begin with oral work in the lowest classes; by its means the children will learn to frame sentences, to use the new words and phrases learnt in their reading, and to give expression to their thoughts. When they have some mastery of writing and spelling written composition should be given regularly; the subjects should be simple and familiar and the main aim of the work should be to train the pupils in clear and straightforward expression. Later more advanced subjects should be given and more attention should be paid to literary form; abstract subjects should be avoided and in all cases the pupils should be thoroughly at home with the subject before attempting to write upon it.

Handwriting—

*Takhtis* should invariably be used in the preparatory section and class I. In class I writing on paper with reed pens may be begun but practice in writing on *takhtis* should still be given periodically. Slates should never be used either for copies or dictation in any of the classes. Reed pens must be used for copy-writing and transcription, and ordinary English pens should never be used for Vernacular script. Great care should be taken from the very beginning that the pupils should acquire the right method of holding and turning their pens. The position in writing must be regarded as of great importance; *takhtis* should be supported on the knee and copy-books should be placed either on a *takhti* correctly held or on a desk.

**SYLLABUS OF THE COURSES IN VERNACULAR (URDU OR HINDI.)****PREPARATORY SECTION.****Class A.**

*Reading.*—To read correctly words and easy sentences from a primer.

*Writing.*—To copy characters and easy words from a primer. Special *takhtis* with letters and figures in indelible ink are recommended for use.

**Class B.**

*Reading.*—To read sentences at sight from the text-book, to know the meanings of words, and to answer questions on the subject-matter of the reader.

*Writing.*—To copy sentences from the text-book in Urdu or Nagri character. Special *takhtis* with letters and figures in indelible ink are recommended for use.

also geographies are recommended for use occasionally, pending preparation of new geographies for girls' schools.

#### DRAWING AND BRUSHWORK.

##### AIMS AND METHOD IN TEACHING DRAWING.

*Method.*—Teachers of drawing should bear in mind that it is far more important to train the eye and develop the suppleness of the hand than to produce mechanically accurate copies of drawings. They should therefore see that pencils of suitable length are used and kept properly pointed. They should forbid the shifting and turning of the paper in the process of drawing and insist on the adaptation of the hand to the lines required. They must accept responsibility for seeing that scholars do a satisfactory amount of work, and while on the one hand hasty and untidy work is to be checked, on the other hand anything of a laboriously minute and mechanical nature is to be avoided.

In model drawing the importance of rapidity as well as accuracy should be emphasized. The principles of perspective must be thoroughly explained and ample demonstration and personal correction must occupy each lesson. The surface on which the object stands should always be indicated, and the drawing should be made as large as the paper will allow.

It must be borne in mind that geometrical, perspective, and model drawing—though related—are distinct exercises; while the former requires the application of geometrical knowledge, the latter fails in its object unless it strengthens the ability to draw simple objects freely, in good line, and correct relationship of position.

As regards geometrical drawing, neatness, absolute accuracy, and facility in using a few instruments are the ends to be kept in view.

All diagrams should be lettered and made of large size. Both ink and pencil should be used, alternately or in combination. Each problem must be carefully "taught" by the teacher and not merely copied by the girls on the larger scale from the text-book pages.

In Freehand and model drawing no mechanical aids should be allowed.

As in Macmillan's Official Drawing book no. 5, or as in Nelson's Graduated Drawing book no. 5, or as in Banbery's Scholars' Drawing book no. 5.

##### Class VI.

Macmillan's Oriental School Drawing book, Part I, or Nelson's Graduated Drawing book no. 6 or 7, or Banbery's Scholars' Drawing book, no. 6.

#### UPPER MIDDLE SECTION.

##### Classes VII and VIII.

*Free-hand Drawing.*—Macmillan's Oriental School Drawing books, Parts II, III, and IV (the designs in Part IV to be copied in outline only), or Nelson's Graduated Drawing books nos. 9 and 11.

#### HIGH SECTION

##### Classes IX and X.

*Free-hand Drawing.*—Light and shade, as in Macmillan's Official Drawing Books nos. 9, 10, 14, 19, or any similar books, as also copying to an enlarged and reduced scale.

*Geometrical Drawing*—As in *Geometrical Drawing for Arts Students* by J. H. Morris; specially edited for Indian students, by William Jesse, M. A., pages 1 to 107 (omitting pages 68 to 71) and pages 117 to 120.

*Free-hand Model Drawing*.—Rectilinear and curved forms in outline, and in addition simple every-day objects, such as tables, trestles, *surahis*, etc., as also the following geometrical solids: cubes, prisms, pyramids, cylinders, cones, and spheres.

N.B.—Teachers of limited experience in the teaching of drawing are recommended to use "Longmans' Complete Drawing Course, Part I," by I. H. Morris, Longmans, Green & Co. Teachers of drawing in schools where Banbery's Scholars' Drawing Books are used are recommended to use "Teachers' Drawing Manual" in English, Urdu or Hindi, by H. Banbery, Indian Press, Allahabad.

## SYLLABUS OF THE COURSES IN BRUSHWORK.

### PREPARATORY SECTION.

#### Class A.

Free-arm drawing on the blackboard or on slates, of straight lines, squares and oblongs, with coloured chalks—the squares and oblongs being filled up with a mass of colour on the same system as the brushwork.

#### Class B.

Free-arm drawing as in the preparatory section A, and free-arm drawing on the blackboard or on slates of curved lines, circles and figures like circles, bounded by curved lines with coloured chalks—all figures being filled up with a mass of colour on the same system as the brushwork.

### LOWER PRIMARY SECTION.

#### Class I.

Some of the elements and their combinations in brushwork which compose simple flowers and leaves—those known technically as blobs, lines, and spots.

#### Class II.

Further brushwork forms, lily leaves, and thick curves.

### UPPER PRIMARY SECTION.

#### Class III.

Petals, and right and left petal curves, with combinations of all the past work.

#### Class IV.

Various combinations of past forms, making leaves, etc., and well-known flowers.

### LOWER MIDDLE SECTION.

#### Class V.

Brushwork of ordinary Indian flowers.

#### Class VI.

Further forms, insects, birds, flowers, etc.

### Books for teachers' use.

The following are recommended for teachers' use:—

Longmans' Charts of Colour, Drawing and Design in three series by Cecil L. Burns, Principal, School of Art, Bombay, together with a Teachers' Hand-book explaining the charts.

*Elementary series*—Ten sheets containing alternate lessons in colour and geometrical drawing.

*Intermediate series*.—Ten coloured copies of leaf-forms with a sheet of geometrical problems and exercises showing the connection with geometrical patterns.

*Advanced series*—Ten large coloured free-hand copies of flowers, animals or other objects seen in nature each accompanied by a design based upon a flower, illustrating the connection between nature and design.

## DOMESTIC SCIENCE

### Hygiene.

#### AIMS AND METHODS IN THE TEACHING OF HYGIENE

The aim in teaching hygiene is a practical one, i.e., to enable the girls to live healthy lives and to secure healthy conditions in their homes.

The formation of good habits while young is the only certain means of securing these ends, and teachers should use all means in their power to train children from the lowest class upwards in habits of cleanliness and order; the theoretical instruction that comes later should

slow them the reason for habits they have already formed and give principles for regulating their future lives.

In the lessons in home nursing and first aid the pupils should be given regular practice in carrying out the instructions given in them; e.g. they should have practice in applying bandages, making beds for invalids, etc. They should not be brought into contact with actual illness, but for the purpose of practice one of the members of the class can act the part of the invalid.

SYLLABUS OF THE COURSES IN PHYSIOLOGY AND HYGIENE.

### LOWER AND UPPER PRIMARY SECTIONS.

### Classes II and III.

Practical training in the care of house and class room and in habits of personal tidiness and cleanliness.

**Class IV.**

**Informal instruction on cleanliness of air, water, milk, food, clothing, person.**

*Practical work.*—Plant experiments to show need of air and light. Care of sick-rooms. Boiling of milk and water, burning of rubbish, etc. Making of beds, soaking bandages and use of boracic solution.

LOWER TRIANGLE SECTION.

CL. 33 V and VI.

Hygiene of the person. Hygiene of the home. Hygiene of the school. Hygiene of the community. Hygiene of the nation. Hygiene of the world.

### AIM AND METHOD OF TEACHING CROSEWING.

In teaching sewing the aim should be to train the pupil to do neat and careful work and to finish it well.

The younger children should be supplied with coarse soft material and with large needles ; fine stitching should not be required from them as it is injurious to their eyes.

In teaching cutting out garments should be selected such as will be worn by the pupils themselves, and whatever style is adopted they should study carefully the proper proportioning of the different parts of the garment made in order to ensure its comfort and durability. Opportunities should be made to train the pupils' taste in the choice of style, colour, and material.

The object of the school is to provide instruction in those branches of design and handicraft which bear on the more artistic trades and professions now practised, or which may be developed in the province.

The school session commences about the middle of July and ends about the middle of May. Admissions will be made only at the commencement of the session. Application for admission must be made to the Principal, through the Head Master of the school at which the applicant was educated, or if the applicant has not been at school, through his legal guardian. Applications must reach the Principal not later than 1st May. An entrance examination will be held for the selection of suitable applicants.

In all departments of the school ability to draw is essential, and no student will pass into a higher class unless he has received 50 per cent. marks at the annual examination.

The course will ordinarily be of 5 years' duration, but may be longer or shorter according to the student's ability, and the requirements of the special branch of work which he proposes to adopt.

The Principal is empowered to admit as exceptional cases students who would benefit by a short course of training in any branch of instruction given in the school.

Each student will be expected to take up a particular class of work and endeavour to become a competent worker in the special branch of art or handicraft adopted.

The curriculum of studies will embrace the following subjects:—

(a) Fine Arts.

(b) Industrial Arts.

*Fine Arts.*—The Fine Arts section of the school is limited to 10 students and will mainly be devoted to giving instruction in three branches of art work, viz., Figure and Landscape Painting, Portrait Painting from Life, Modelling from Life.

School hours—9-15 a. m. to 4-30 p. m.

Fees.—Rupees 5 per month

*Industrial Arts.*—In the Industrial Art section there will be the following classes limited to a total of 150 students:—

(a) Metal work, including—

- (1) Goldsmith work—jewellery, gold casting, and engraving.
- (2) Silversmith's work—Shape making, engraving, casting, and repousse.
- (3) Brass and Coppersmith's work—Repousse, casting, and sheet metal work.
- (4) Iron work—Hot and cold.

(b) Wood work—Constructive, Turning, Carving, Inlaying, and Polishing.

(c) Architectural decoration—On the flat, in colour, and in relief.

(d) Book-binding in leather and cloth.

(e) Art printing—

- (1) Lithography and chrome-lithography from stone, zinc, and aluminium plates.
- (2) Photo-Lithographic processes.
- (3) Line Blocks in zinc.

(1) Half tone, three-colour blockmaking, and other photo-mechanical processes.

**FEES.**—The classes in metal work, wood work, architectural decoration, book-binding, and art printing are primarily intended for artisans who are admitted free, but students other than artisans taking these subjects will pay a monthly fee of one rupee.

(f) Drawing for reproduction—Illustration of books, pictures, and charts for educational purposes. Poster-designing and general advertising and commercial work.

(g) Architectural Draftsmen—Architectural drawings of various styles in different methods. Working and measured drawings. Study of good examples of existing buildings in Lucknow and neighbourhood.

**FEES.**—Students attending the classes in drawing for reproduction and architectural draftsmanship will pay a monthly fee of two rupees.

Detailed syllabuses of the above subjects of instruction can be seen at the school and may be obtained upon request.

School hours—9-15 a.m. to 4-30 p.m.

Applicants must be between the ages of 13 and 18; only such will be admitted as are likely to make a proper use, after leaving the school, of the instruction imparted.

All students are on probation during their first year in the school and no student may remain in one stage of instruction for more than two sessions.

As far as practicable, all designs by the students will be executed by them in the school workshops. Objects thus produced will remain in the school collection. The name of the student designing and executing a piece of work will in all cases be attached to the specimen.

A room for the exhibition of art objects made in the school is provided in the Museum building.

Employers and buyers of art work are invited to inspect the productions of the students exhibited there.

Visitors wishing to look over the school may do so on any working day on arranging the visit with the Principal.

A record is kept of all designs executed, and patrons desirous of obtaining duplicates of any of the objects in the school collection may have the designs and working drawings on loan, or the Principal will place the orders with passed students for execution.

#### Scholarships.

Government scholarships have been made available for students of the Industrial Art classes as follows, but need not necessarily be given in their full number or to their full amount. They will be awarded quarterly by the Principal on the result of the preceding quarter's work :—

|                       |     |     |     |     | Rs.           |

| 5 ditto ...           | ... | ... | ... | ... | 15 ditto      |

In addition to the above, 23 more Government scholarships are available, to be competed for as follows :—

(1) Two scholarships annually for boys of Anglo-Vernacular schools who have ability to draw and who are desirous of adopting some profession for which a training in art is essential.

These will be awarded for one year, but may be extended up to four years.

The value of each scholarship will be during the—

|              |     |     |     |     | Rs.            |
|--------------|-----|-----|-----|-----|----------------|

| 4th do. ...  | ... | ... | ... | ... | 12 ditto       |

The award of the scholarships will be made on the result of the examination in drawing at the School-Leaving Certificate Examination.

Candidates must be between the ages of 15 and 19 years on the date of the examination.

Any candidate desiring to obtain one of the above scholarships shall inform the Head Master of his school before 1st January.

(2) Three scholarships annually for boys of Vernacular schools who have taken drawing as one of the optional subjects at their Vernacular Final Examination and who are desirous of adopting some trade or craft which is taught in the school.

The scholarships will be awarded for one year, but may be extended up to five years.

The value of each scholarship will be during the—

|          |     |     |     |     | Rs.           |
|----------|-----|-----|-----|-----|---------------|
| 1st year | ... | ... | ... | ... | 7 per mensem. |

| 4th do.  | ... | ... | ... | ... | 10 ditto      |
| 5th do.  | ... | ... | ... | ... | 11 ditto      |

The award of scholarships will be decided on the result of the examination in drawing at the Vernacular Final Examination.

Any candidate desiring to compete for the above scholarships shall inform the Head Master of his school before 1st January.

In accordance with G. O. no. 501/XVIII, dated the 1st April, 1912, District and Municipal Boards may also, where circumstances permit, offer scholarships to suitable applicants. Applicants must in all cases be selected and recommended for admission because of the likelihood of their becoming satisfactory designers or craftsmen.

(3) Twenty-four apprentice stipends of the value of Rs. 7 per mensem are provided annually for award to passed-students during their first year's training in an approved office or workshop.

This stipend is intended to supplement pay.

Employers who receive apprentices who are in receipt of stipends are expected to report on their work. Such report will be taken into consideration before the final certificate is issued.

#### **RULES OF THE SCHOOL OF ARTS AND CRAFTS, LUCKNOW.**

1. The school year shall consist of one session from the middle of May to the middle of July.

2. The prescribed form of application for admission must be signed by the parent or guardian and filed in the school records. If a parent's or guardian's statement regarding the applicant shall be found to contain wilful misrepresentation, the Principal may remove the student's name from the school register.

3. An entrance examination will be held to test the ability of the applicants to follow the school course.

4. A student, on leaving the school, shall, after payment of all school dues, receive, upon a written application in the prescribed form signed by the parent or guardian, a certificate showing his record at the school. A student desiring a duplicate copy of the final certificate will be required to pay Rs. 2.

5. For irregular attendance (including unpunctuality and absence without leave) the Principal may impose a fine up to a limit of one anna for each occasion. If a scholar continues to be absent without leave for two weeks in succession his name will be struck off the register; in which case he will be required before re-admission to pay the fine already incurred.

Unless a student makes 75 per cent. attendance he will be debarred from sitting for the annual promotion examination.

Applications for leave must be attested or countersigned by the parent or guardian, otherwise they will not be considered.

NOTE—Overstaying leave or holidays is absence without leave within the meaning of the above rules.

6. When school property is wilfully injured the damage shall be repaired, as far as possible, at the expense of the author.

7. Scholarship students absent without leave will be fined double the amount of their scholarships for the period during which they were so absent.

#### **GENERAL INFORMATION.**

##### **Library.**

An Art Library is provided for the use of students and teachers.

It has been selected to deal directly with the arts and crafts practised in these provinces.

##### **Museum.**

A valuable collection of exhibits illustrating the arts and industries of India and of these provinces in particular has been collected during the last 30 years and deposited in the Provincial Museum.

This collection has been removed from the Provincial Museum to the Museum of this school.

Students in all classes study from the collection, and it is hoped by this means to preserve the best traditions of the arts and handicrafts practised in these provinces.

The Museum is open to the public on each week day, except during vacation months, from 11 a.m. to 4 p.m. Admission free.

**Recreation.**

A play-ground is provided in the school grounds and equipped for playing hockey, football, and other games.

**Prizes.**

Medals and certificates are awarded on the result of the annual examination and year's work.

If a sufficiently high standard of work is attained, a first and second prize will be awarded to each year's students in each class.

Prizes will also be awarded for attendance and for exemplary conduct in the boarding-house

**Vacation and holidays.**

The school is closed during the summer vacation and for one week during Christmas and for such other holidays as are notified on the school notice-board.

**Boarding-house.**

A boarding-house is provided for students. The average cost of living in the boarding-house, including school fees, for a student of Industrial Art is Rs. 10 per month, and for a student of Fine Arts Rs. 15 per month.

**Rules.**

**Admission.—I.** No one will be admitted who has not been vaccinated or had small-pox.

**II.** Application for admittance or withdrawal should be made to the Principal through the Superintendent, who will report on the merits of the case.

**III. (a)** Every boarder shall pay an admission fee of one rupee and a monthly fee of 8 annas as rent.

The hostel must be vacated during the summer vacation months and no fee will be charged for those two months.

(b) If a student applies for re-admission into the hostel at any time during his school career, he will be admitted without paying any admission fee, provided that his conduct was satisfactory during his previous residence.

**IV.** Every boarder shall make his own arrangements for food and personal service (if any), and is expected with others to form messes under the supervision of the Superintendent.

**Offences and penalties, V.—**If any boy is found habitually in debt for his mess or hostel fees, etc, he will be liable to dismissal from the hostel. Guardians must undertake that their wards be provided with sufficient funds to meet their hostel expenses, fees, etc.

Each applicant for admission into the hostel is required to deposit with the Principal the sum of Rs. 7 as caution money against any damage, loss or dues.

This is repayable at the end of the session or earlier on leaving the hostel after all dues have been collected.
